

# BUILDING BLOCKS

---

## TEMPORARY POOL BARRIERS EFFECTIVE DATE: 04/07/2006

A temporary pool barrier meeting all the requirements of such in the Florida Building Code may be installed for temporary pool protection without requiring a separate permit. The barrier shall be inspected and approved prior to the final building inspection being approved in the case where a TCO has been requested for a residence. No CO's will be issued with only temporary pool protection in place. If the construction barrier is to be the permanent pool protection, a separate permit shall be obtained required.
