Introduction

Collier County held a Public Information Workshop for the Wilson Boulevard Extension/Benfield Road Corridor Study on the following date:

Wednesday, March 26, 2008 – St. Agnes Church in Naples.

The local public was notified of the workshop in advance in the following ways (refer to Appendix A for details):

- Mailing of Newsletter via USPS standard mail (mailed to Stakeholders)
- Mailing of Postcard Announcement via USPS standard mail (mailed to property owners and stakeholders)
- Newspaper advertisement in Naples News on March 16 and 23, 2008
- Media press release
- Notification letter to public officials and agencies

The purpose of the workshop was to review and discuss a potential new north-south roadway located east of Collier Boulevard (CR 951). The area being studied is approximately 20 miles in length, bordered by US 41 to the south, CR 951 to the west, 18th Street S.E./Miller Boulevard to the east and Golden Gate Boulevard to the north.

As participants arrived, they were asked to sign in and provided a handout packet (refer to Appendix B for handouts). Citizens were provided a map of the study area and asked to "draw" a preferred alignment, given the constraints of the project area and their knowledge of the area. In addition, a comment sheet was provided on the back of the map to record their comments on three special topics of interest, which are:

- Potential Alignment Location
- Environmental Issues
- Other Roadway Concerns/Needs

The format of the workshop provided citizens' an opportunity to learn about the project, understand the social, environmental and economic character of the area, ask questions and offer input to county staff and consultant team members. Maps, displays and other project information were available for viewing to provide participants a good understanding of the project.

Ms. Claudine Auclair, Collier County Project Manager, Mr. Bob Rutledge, Consultant Team Project Manager, other county staff and consultant team members were available throughout the workshop to assist participants in identifying an alignment and answer questions.

A total of 159 people attended the workshop, according to the sign-in sheets. Additionally, a total of 64 comment sheets and 21 maps with preferred alignments were completed at the meeting and/or received by mail at the county.

A summary of all written comments is presented below (Comment Sheets, maps and emails are available at the Transportation Planning Department office and will not be posted to the project Web site).

Summary of Comments

MARCH 26, 2008 – ST. AGNES CHURCH, NAPLES

Written Comments (Comment Sheets, maps and emails are available at the Transportation Planning Department office and will not be posted to the project Web site):

Potential Alignment Location

AGREE

- Should be one of the top priority roads under consideration for construction.
- Traffic on CR 951 should receive relief – so much happens to cities when no planning is done for the relief of traffic congestion.
- An additional north/south corridor in this area is greatly needed to alleviate congestion at US 41 and CR 951 and to reduce the potential for an extreme 'bottleneck' at this intersection in the event of a major evacuation.
- I support the Wilson Blvd. alignment connecting to Landfill Road. It will ease traffic on Golden Gate Parkway & CR 951. This will provide an additional hurricane evacuation route.
- Idea of having more routes north and south are of very importance for people especially living in the areas. Any 'new' road will be welcomed.
- We desperately need an on/off ramp at Everglades Blvd. south at I-75 without a toll. Collier, despite the real estate crisis is growing and will continue to grow. We need more than one way in and out, especially during evacuation periods.

OPPOSED

- Unequivocally opposed to any of the proposals that would create **any** bypass to I-75/US 41. The reasons are many but the most important is the environmental tragedies such plans would create. There is no justification to take more away from the panthers, bears, bobcats and cockaded woodpeckers than we have already taken. These endangered species are but a thumbnail sketch of the wildlife that would be harmed permanently. Just so humans can conveniently get to US 41?
 - Quick access to Golden Gate Estates will create an increase in crime as I-75 would be so accessible.
- Oppose any road being built within 1-2 miles of the back of the VeronaWalk property. We moved from a very nice golf community (Naples Lake) because of the unbearable road noise. We specifically moved to the back of VeronaWalk property to avoid road noise. To consider building a road within ¼ mile of the VeronaWalk property jeopardizing the property values of over 1900 families would be a total disregard of this community and unacceptable.
- I have relatives who live in Benfield Road area and on Stable Way who could actually be displaced from their homes depending on how the new road is actually run. Additionally, they own a business, a riding stable, which is solvent and is well placed on the edge of the state park. This business would be ruined as current proposals route the road through their property and this is not the only business that could be ruined (proposed corridor) and with the economy as it is, it disheartens me that the county plans to contribute to the failing of several long standing and solvent businesses.

- I regularly trailer my horses over and take advantage of the close and easy access to the state park. The opening of the corridor could impact that and/or make the ride far less pleasant as cars travel at posted speeds and above. If equine enthusiasts continue to make use of the state park from that venue (if permitted to do so) it could make the ride less safe for them as well as for passing motorists if an unwise rider of an unruly horse were to let it get out of control near the major roadway.
- According to Transportation needs and the 2030 map, a two-lane road (Wilson Blvd.) is proposed to US 41 – against extending our nice quiet dead end street. This will also drop our house value and our neighborhood will be devastated. The trash trucks will use this for a route into the Estates.
- The distance from Collier Blvd. to Benfield along Beck is approximately 1.25 miles. The Collier/Beck/Davis corner is already terribly congested.
 - Don't see how an additional road here will alleviate traffic, will only make it worse.
 - A connection to I-75 at this place will have the same effect – adding more traffic to an already congested area.
 - Appears from the wording the Beck/Benfield/Collier/I-75 connection is the intent and goal of the study, not just one of several alternative routes.
- **Q:** Why is the county expanding these roads to the other side of I-75 where there is nothing but low land? Concerned that some developer is planning something in the low land areas and we as taxpayers are going to pay for it.
- Do not use Benfield Road – its private property.
 - Put the road outside of Benfield properties to border state forest.
 - Move environmental line out farther east.
 - Move road around private lands curves to make scenic drive.
- I have 3 lots on Benfield Road – this project could hold up a TDR (Transfer of Development Right) deal and could cost me money.
- Benfield option is wrong – it is a mistake. It will dump traffic from the north onto Beck and back to Collier-Davis intersection and increase the terrible congestion there.
 - Wilson should not connect to Beck – Beck, Davis, or CR 951 intersections are already a disaster.
 - I live at Forest Glen – you have taken our front entrance on Collier away. If you do the Benfield option, most of the traffic from the north will turn on Beck and 798 homes that now exit from Forest Glen will have a very dangerous exit onto Beck.
- Meeting at the court house promised the bill to make the road end. A barrier was to be placed on the road to protect. This is my retirement home – don't take my dream away.
- I live on Benfield Road and my concerns are privacy, developmental rights, and regress (access to my home and access to Beck Blvd.).

- I ride my horse at M&H Stables (<http://www.mhstables.com/index.html>) which is located within the Benfield Road Corridor Study. I was very disturbed to hear about possibilities of having a four lane highway in the Benfield area. I ride here on a regular basis taking advantage of the Picayune Strand State Forest Mel Meade Horse Trails. This proposed road would prevent us from accessing this area – not only will it impact the wild life which is quite extensive such as American Bald Eagles, Black Bear, White Tail Deer, Florida Panther, Bobcats, Coyotes, Red Cockaded Woodpeckers, Wood Storks and all other smaller species. It will also impact the five equine boarding establishments here, housing over one hundred horses at this time. The Benfield Road area is rapidly becoming an equine community. High traffic will greatly impact all who reside here, both to human and animal society. I urge you to take this into consideration and not place a highway in this highly environmentally sensitive area or anywhere that will cut this equine community or any of us who ride here off from being able to access the Bel Meade Horse Trails.
- We attended the public workshop on March 26, 2008 and were both very disturbed to hear about possibilities of having a four lane Highway in the Benfield area. We have just completed building our home and now reside there since February 2008. The proposed extension and widening of Benfield Road will run directly into our house. We moved to this location with the intention of running an equine boarding facility taking advantage of the Picayune Strand State Forest Bel Meade Horse Trails. This proposed road would prevent us from accessing this area - not only will it impact the wild life such as the American Bald Eagles, Black Bear, White Tail Deer, Florida Panther, Bobcats, Coyotes, Red Cockaded Woodpeckers, Wood Storks and all other smaller species, it will also impact the five equine boarding establishments here, housing over one hundred horses at this time. The Benfield Road area is rapidly becoming an equine community. We have horse riders from all over the County who trailer their horses here for trail riding. High traffic will greatly impact all who reside here, including the residents, horse riders and wildlife. I urge you to take this into consideration and not place a highway in this highly environmentally sensitive area or anywhere that will cut this equine community or any of us who ride here off from being able to access the Bel Meade Horse Trails. I invite you or anyone to take a trail ride to see the beauty of this area and what will be destroyed if this highway is approved.

IDEA GENERATION or SUGGESTION

- **Determine and clearly demonstrate need:** Prior to lines being drawn on a map for potential new corridor alignments, the first step must be a clearly established need for the new road, taking into account current and projected trips per day on the existing roadways and a demonstration of how the system will fail if the new road is not constructed. Other considerations should include the expected future growth consistent with the GMP and the impact of widening existing road networks. Once the outcome of the need assessment has been calculated, this should be presented as the underpinning for proceeding with the Corridor Study. The “no build” alternative must also be examined and kept on the table until it has been demonstrated to be insufficient.

- **Ensure consistency with the Collier County Growth Management Plan (GMP):** The Future Land Use Element (FLUE) gives specific guidance as to how the Wilson Boulevard extension north of I-75 will be planned and constructed. Thus, the Corridor Study must be consistent with the provision contained in the FLUE. However, for the lands south of I-75, there is no specificity contained in the FLUE as to appropriate locations for alignment consideration. When considering alignment suitability through this portion of the corridor study area, a key consideration must be the future land use designations as indicated on the Future Land Use Map (FLUM). In order to be compatible with the GMP, any alignment south of the interstate should focus on the lands west of the line dividing the RFMUD Sending Lands and the Urban Residential Fringe Sub district. The intent of the Sending Lands is to minimize development-related impacts, while the Urban Residential Fringe Sub district allows for more intensive urban uses, as a transition between urban and rural districts. In addition, it would be inappropriate to place connector roads between a Benfield alignment and current east-west corridors, such as Rattlesnake Hammock Road, through Sending Lands. Thus, with a north-south Benfield alignment west of the designated Sending Lands, such incompatibilities are removed.
- **Early coordination with other agencies and rapid assimilation of information into the Corridor Study:** The Memorandum of Agreement (MOA) entered into by Collier County and the various state and federal agencies is a critical component in assuring that once a roadway corridor is selected, there will be necessary attention given to appropriate wildlife crossings, directional fencing and protection of both public lands and Sending Lands. However, prior to alignment selection, the input from these and other agencies must be a significant part of the feasibility assessment for potential alignments. The Efficient Transportation Decision Making (ETDM) process allows for easy access to agency comments, concerns and red flags. Incorporation of these comments early in the determination process for feasibility of alignments should be utilized.
- First consideration should be the environmental issues and the route should be the least intrusive to the wildlife and flora and fauna. If a road must be built to I-75 (not US41), Everglades Blvd seems to be the most practical.
- Extending Greenway north along eastside of south Naples Citrus Grove to Sabal Palm Road continuing north along east side of Toll Brothers property connecting to Benfield Road to Beck Blvd. then across I-75.
 - Connecting to Greenway is more beneficial since the south exit from Marco could be used, Fiddlers Creek, and developments from GL Farms could all tie into Greenway for evacuation purposes.
- By using north Belle Meade as major passage way, the cost for moving traffic both north-south and east-west can be greatly minimized. This would also allow abandonment of Vanderbilt, as proposed, from Wilson to DeSoto. The result would be the Estates, as currently developing, can be maintained and not destroyed.
- Run it down to Tomato Road. Not much R.O.W. concerns down in 6 L, S farm area. We can all see that Collier Blvd. will be a mess in 5/10 years. This location would be perfect as you will be able to go from Marco all the way north with no problems. Just keep the red lights and housing entrances to a minimum – possibly a couple of access roads.
- Proposed N/S highway: From the intersection of 846 and 858 south to US 41 to the east corner of Collier-Seminole State Park.
- Extend 92 NE to the proposed N/S Highway.
- Extend Jane’s Memorial Scenic Drive NW to the proposed N/S Highway.
- Extend Davis Blvd. eastbound to the proposed Highway 829.

- Extend other E-W Master Roads eastward to the proposed Highway. These include:
 - Vanderbilt Beach Road
 - Pine Ridge Road
 - Golden Gate Parkway
 - Rattlesnake Hammock Road
- Extend CR 951 from south of Rattlesnake Hammock Road south to US 41.
- A highway south via Benfield Road that parallels CR 951 is extremely impractical in that it would be too close to 951 and destroy a major rustic area in close proximity to the city of Naples.
- Proposal for Wilson Blvd. extension/Benfield Road corridor study is to continue Wilson through Trinity.
- There is already a precedence of building wildlife crossings such as those built on State Road 29. Connect the areas of Golden Gate Estates with wildlife crossings on the Wilson Blvd./Benfield Road corridor – this will be a model for any future roads built in the area.
 - Left messages with the Southwest Florida Chapter of Audubon and the Florida Wildlife Federation and have already spoken to Nicole Ryan of the Conservancy of Southwest Florida – with the cooperation of these organizations there can be a compromise between development and environmental concerns.
- Connect Greenway Road to Benfield Road – as adjacent land owners we could assist with the needs that may arise as easements or using part of our property on the east side or west side.
 - Road would follow on the west side of the Picayune and on the east side of Toll Brothers Development.
 - Road would help keep panthers on the Picayune state ground – act as a border like you see on your diagrams as soon as there is a road or fence the panther stays to one side primarily.
 - Road could be used as a dyke to keep the states plan of flooding the everglades to the east side of development.
 - Road would have less environmental impact if it is run bordering the states Picayune and Toll Brothers property.
 - Fiddlers Creek could use the road as evacuation route to I-75.
 - South entrance to Goodland and Marco could use the road as evacuation route to I-75.
 - The few other developments on 41 could use the road as evacuation route to I-75.
 - The farm fields of 6-1s could connect to Greenway to use the road as evacuation route to I-75.
- **Q:** In the Project Description it is noted to define the optimum location of Benfield Road to connect to US 41. Since Benfield already exists do you mean to say that it could be moved to a more easterly location? OR Will the southern piece (study area 3) use the existing Benfield Road as a base? Is this a decision that has already been made? Or is essentially made?
- If true intent is to open up and provide access for future development to the east, a corridor further east makes more sense to me. Possibly Collier Blvd. to Miller Road – would accomplish alleviating the congestion at Collier/Beck and Collier/I-75. People will not be eager to travel through an over utilized area already known to be congested – just as people avoid Pine Ridge today.
- **Q:** How much separation is planned between future ROW and existing DRIs (we are located with the winding Cypress DRI)?

- Due to the high degree of public land acquisition in the area of I-75, additional north/south corridor access should be very limited which will reduce the possibility of the road impacts to wildlife and the overall project cost.
 - Wildlife crossings should be reasonable in size and design so that they may be greater in number to facilitate movement of the greatest number of species.
 - Fencing should be required to avoid the potential for increased panther mortality, particularly for the portion south of I-75.
 - By limiting access points, the profile of the road (4 lanes vs. 6 lanes) may be reduced, thereby reducing the potential for direct impacts to the environment.
- Instead of expansion, the county should focus on more important priorities.
 - Place a 4 way stop sign in the eastern part of Golden Gate Blvd. (East of Wilson) at different intervals as to force the traffic to slow down.
 - This will allow those who live north and south of Golden Gate Blvd. able to cross or join the traffic going east or west at the peak hours (I.e., early morning or afternoon) without inconveniencing their lives.
 - County will be able to save money as well.
 - Opening of some streets from Everglades Blvd. to 951 (no mention of White Blvd. because there is no connection to it after 27th Street SW).
- Wilson Blvd. to Black Road east Everglade west to Benfield Road copy south to Tamiami Trail (41).
- Miller or Everglades to 75 Exit on and off.
 - Put under walk way for wildlife – lived out there for 30 years and have not seen a panther cross yet.
 - Road is already there for Miller extension to US 41 & I-75 exit but it should go straight as an arrow.
- Wilson 5th then east west corridor north of I-75.
- Benfield Road – goes east to Wilson and extends Wilson straight south.
 - Go east to Miller would make much more sense.
- Take Wilson south to I-75 – west to line up with fast line of property (homes, etc.) on Benfield Road then south to US 41.
- **Q:** I own two acres of land about the proposed road route (Benfield). What is the proposal for people who own empty lots – will the county or state be buying these lots that are adjacent to Benfield Road?
- The study has settled (partly) on Wilson south, but do see a great need for road alignment. East-west is important and would like every effort taken to study 16th Ave e/w and roads to east (Everglades) and west 13th Street southwest studied deeply.
- Closer you get to Collier Blvd., the less effective the new road would be. It could act like a service drive for Collier Blvd.
- Come close to subdivisions off of Collier Blvd.; provide a tree-like green belt between the new road and the subdivisions.
- Much wiser to put the road extension down Everglades Blvd. with an interchange to I-75. The current proposal to extend Wilson Blvd. and divert traffic via Benton Road toward CR 951 seems as though it will create too much traffic congestion than there is already. Long range planning and goals should look to the future and build now out further to the east to serve the estates population as well as others for easier traffic flow.
- Use Everglades Blvd. – longest existing N/S road in Estates. Would provide for future growth to the east and evacuation route.

- Appears only alignment that would have the least impacts both to the public and environment would be the alignment from Benfield down through Winding Cypress Drive. (x4)
 - Winding Cypress Drive is a large track of undeveloped land and closest to CR 951.
 - Wilson south to Benfield and on to Tamiami Trail is a good idea. However, I think it is a mistake to construct any less than a six (6) lane roadway. Reason is that much of the morning traffic, which at present has to go all the way to CR 951 in order to go south in the direction of Marco Island, would be siphoned off at that junction and take away tremendous pressure from GG Blvd. to CR 951. Single most important route to develop that will have the biggest impact in reducing congestion.
- Extend Wilson south
 - Interconnect to 951 at Golden Gate Parkway extension (Brantley/Keene) and Markley.
 - Jog over to GLs rural village well south of the Benfield alignment.
- Immokalee Road to Wilson Blvd. to Blackburn Road east to Everglades Blvd. and west to Benfield and south to US 41.
- Wilson Road to Blackburn Road (north of 75) east to Everglades and west to alignment with Benfield Road going south to Tamiami Trail (US 41).
- Wilson Blvd. extended south to Landfill Road and Benfield. This will allow Golden Gate Estates and N Belle Meade residents and evacuation route in the event of a fire or hurricane. Everyone cannot be dumped onto CR 951. We need another n-s road. We were cut off by flames once in our area and would have benefited by a second way out. Emergency vehicles will also have access to N Belle Meade.
- Put Sable Palm through to Miller Boulevard opening evacuation routes. It will also give the 3 new schools in the Golden Gate Estates better access (sic) to hospitals.
- The route from the new school on Everglades needs to go down on Sable Palm to the new hospital on 951 (Collier Blvd.). Then put Miller extension thru from 41 to the end of Miller Road.
- Route from new schools on Everglades down Everglades over to Miller to Sable Palm to new hospital on 951 continue road to 41 for and evacuation route and access to state park.
- For fire control and EMS in the southblocks could be helped by better access through Sable Park from 951 to Miller Blvd. Also paving Miller Blvd. extension through to 41 (Tamiami) Trail.

Environmental Issues

AGREE

- Glad to see plans to include environmental agencies early in the study (i.e., protect archaeological sites, natural flow-ways, panthers and wildlife crossings and avoid using public lands so we can assure future enjoyment of all these special areas).
- Agree to protect our wildlife.
- Unfortunately it is very difficult to mandate a safe area for our bears, deer, etc. when people live in the vicinity.

OPPOSED

- Land of Belle Mead was to be preserved – most animals are in our area (Benfield-Lebuff). We have the (water) lakes 6# in all.
- Environmental issues are so many that if this project was studied with an open, sensitive mind it would end now. Too many wet, panthers, woodpeckers, etc. We have enough land to develop here without tearing up the Belle Meade.

IDEA GENERATION or SUGGESTION

- **Establish a clear connection between transportation and land use planning:** As the corridor study area for this project almost exclusively encompasses environmentally sensitive lands either under public ownership or designated as Sending Lands under the Rural Fringe Mixed Use District (RFMUD), land use planning and existing land use designations must be interlinked into the transportation planning process. Such considerations must include a thorough assessment of need, environmental impacts and compatibility with existing neighborhoods, along with a determination of how such a corridor will compliment the Growth Management Plan (GMP).
- **Avoid publicly-owned conservation lands:** Any north-south alignment east of CR951 must not only be directed away from Sending Lands, but also must avoid the publicly-owned conservation lands contained within South Belle Meade and Southern Golden Gate Estates, also known as Picayune Strand State Forest. These conservation lands were purchased through public dollars in order to preserve and restore our western Everglades. As there are alternative corridor routes that avoid these lands, we ask that corridors through public conservation lands be determined unfeasible and removed from consideration early in the study process.
- **Compatibility with future hydrologic restoration within North and South Belle Meade:** An important component of protecting the lands within North and South Belle Meade is the hydrologic restoration of these currently impacted lands. The feasibility of corridor alignments must be compatible with future restoration plans by the South Florida Water Management District through the Big Cypress Basin.
- **Protection of listed species habitat:** While provisions have been built into the inter-agency MOA regarding mitigation for potential impacts to listed species through wildlife crossings and other mechanisms, avoidance and minimization of impacts must first be demonstrated.
- Road should be built on western edge of environmental ground owned by the State.
 - Road could also be used as a dyke to keep wetlands flooded on the east side; road also would keep panthers more on the east side in Picayne where they should live anyway.
- North Belle Meade is currently miscategorized as an environmentally sensitive area – only a very small portion of the NRPA now designated needs to be 'protected'.

- Building of roadways negatively impacts animal habitats and leads to further degradation of the environment; however, I believe that the negative impacts can be greatly reduced by using engineering techniques that have proven their worth in numerous studies.
 - Studies such as the *Wildlife Crossing Designs and Use by Florida Panthers and Other Wildlife in Southwest Florida*, by Darrell Land and Mark Lotz of the Florida Game and Fresh Water Fish Commission is available online and shows how wildlife crossings such as the one used on State Road 29 is an effective method to permit the safe passage of many species wildlife across a roadway.
 - My dream is to make the entire Golden Gate Estates into an area where humanity can live in harmony with nature. Golden Gate Estates is a rural community – if you add the area that humans actually need to live, it would amount to the footprint of the home they live in, their driveways and the roadways within the community. That amounts to a fraction of the entire area – now if we connect these areas fragmented by roads we would have a thriving habitat for animals.
- The Wilson Blvd. route is across receiving lands. The Wilson Blvd. route to Landfill Road is in the Comprehensive Plan.
- Panther and wild dogs not leashed.
- Depending on the development, keep the road as straight as possible.
- Fence road to protect wildlife.
- Relocate the panthers/bears 'east' of the project.
- Create entrance/exit to I-75 from GS Blvd – concerned with fires to get to Desoto – S. Everglades has to drive a long way.
- Ask yourselves where the rock and minerals will be purchased and do not build roads which put residents' homes in danger that have close proximity to mines. No more blasting near homes please!
- County has existing ROW easements on Everglades Blvd. Widening would be less invasive for all environmental concerns.
- Everything east of Winding Cypress Drive is either state forest preserves or areas filled with environmental wildlife. The preliminary reviews by the county's own consulting ecologists, Passagreilli & Assoc., shows that panther and other wildlife are concentrated on the north & east areas at the ones of study. (x4)
 - Alignment doesn't cross through state forests and affects the fewest homeowners. (x3)
- Rural fringe lines seem to change as big developers mitigate TDRs that they didn't even have. I've owned my place of property for 13-14 years – since then you've added sending rights to my property. The ones on receiving end haven't made me any legitimate offers and they still mitigate away. Seems unfair and if the county that buys a right of way then says less than 5 acres no TDRs.
- Environmental groups signed off on the north portion during TDR development – fewer residents to dispossess and easy construction.
- The rock pit is expanding to the south. An extension of Wilson Blvd. next to the expansion would allow black bears, panthers, etc. to be undisturbed to the east and south since they will move away from active mining anyway. Concentrating earth moving and road building activity helps keep greenways to the east for animal movement.

Other Roadway Concerns/Needs

AGREE

- The roads built recently in Collier County are generally great – the Airport/Golden Gate overpass and the I-75/Golden Gate intersections are beautiful as well as functional. Keep up the good work!

OPPOSED

- Connecting Benfield to Greenway Road as some mentioned would cause tons of homeowners to lose their homes. Further, the connection would ruin a quaint neighborhood that could not handle the traffic. I question the need for this alignment project. (x2)
- Homeowners in the lower Belle Meade area will not stand for a road that takes away their land or homes. The Winding Cypress Drive is owned by a developer and given real estate market conditions at this time it would be to their benefit to dump said property. (x2)

IDEA GENERATION or SUGGESTION

- Future residents applying for a building permit within the study area or along existing roads under consideration of widening should be informed that there could possibly be a road construction in the near future so they will make informed decisions as to where to place their home.
- **Limited access roadway to prevent sprawl:** In order to ensure that the future Wilson/Benfield Road alignments are not simply a catalyst for additional intensive land uses that would be inappropriate based on current land use designations and proximity to public lands, any future roadway must limit access to a set number of connector roads. In addition, there should be no additional access available to the east that would open up Sending Lands or public conservation lands to intensification of development.

- **Sufficient public input:** Public input and stakeholder involvement are an essential component of roadway alignment studies. While this particular Corridor Study has provided for two public workshops, one at the beginning of the study and one at the end prior to presentation of study findings to the Board of County Commissioners, additional public workshops during the summer and fall should be considered. Such workshops would provide the venue to present findings from the need assessment, agency input on environmental issues, and alignments that are being considered and analyzed. Through such meetings, the County will be able to inform the public as to progress on the Corridor Study and receive additional comments and input. Any road alignment selected will likely create controversy. It is better to provide numerous venues for discussion in order to be able to allow for issues to be dealt with prior to the Commission meeting in April 2009.
- Sabal Palm Road should be paved to new road. The Smits family, owners of South Naples Citrus Grove, would like to work with county if they would need easements or donate some property to help make road come through the east side or west side of our property (Smits family).
- Use of Miller Road and providing an intersection at I-75 and Everglades Blvd. are both desirable proposals.
- Sabal Palm Road should be paved to the new road or even to our stand (South Naples Citrus Grove). I could provide a list of about 30,000 customers that would support this road pavement.
- If Sabal Palm Road is to be extended to meet with the proposed extensions then Sabal Palm Road needs to be 4-lane and speed increased (back to 45 mph). There is significant traffic during the winter months on Sabal Palm Road.
 - The rock pit on Sabal Palm Road, the citrus grove, the lengthening of Sabal Palm Road past the black top have all changed the water (ground) flow for the area – 40 years ago we lived on a cypress pond (happily). Now with the mentioned changes the water stopped flowing east then south to not flowing (became stagnant) or going west to the canal, to now no flooding at all for the past 20 years. Our property is now high & dry year round with a complete change in flora.
 - Consider these changes to avoid further deterioration of the natural flow of water. We were a 1 mile designated buffer zone for the water shed area – what happened to those designations? They need to be maintained.
- Section line 1 mile east 951 – Collier Blvd.
- Wilson to US 41 east shortest straight line south.
- The further east on I-75 for a N-S road with connections like Sabal Palm connecting 951 to projected N-S Road, that would handle all projected growth plus serve as another route to connect Immokalee area to Marco and surrounding areas ‘plus’ serve as another hurricane evacuation route leading away from the coast and I-75.
- Keane Ave & Marley (too much rock and dust – needs paving and trees are dying) – east and west.
 - 16th Street to Everglade Road.
 - CR 951 to Marley Avenue.
 - Ancley to Ives and south to Blackview.
 - Nursery taking the beauty of area - too much cover up (Earth Square or American Farm).
- **Q:** If I-75 fly over exits on Bealle Blvd, how can we stop truck noise to the residential area of FGCC?
- Suggest Benfield Road is too close to CR 951 (1 mile) to be effective. Why put it there? Suggest moving it west.
- The state owns more than ½ of the property needed south of I75.
- Build an interchange at I75 Everglades.

- Where you cross I-75, build a new interchange at that location.
 - Build the new road – it is needed. Result should be to reduce the traffic on Collier Blvd.
- We need more stores and medical offices. If my child gets sick in the middle of the night and I need to get to a store, it's a 45-minute trip.
- Too many high speed Collier County cop cars flying up and down Everglades Blvd.
- There are many stables along Newman Drive and the value of the property is greatly enhanced by its proximity and access to the Belle Meade Trails in the P/S state forest. Any road construction must allow access by some means to the Trails for horses by tunnel or bridge.
- Extend White & Green Blvd. east to Wilson & Everglades Blvd to provide more east/west access.
- N.S 17th St SW (this road could provide an alternative N.S. route from Vanderbilt Beach Road to Benfield.
- Extend 23rd Street the same as 17th Street.
- Strongly like to see Golden Gate Parkway extended (Brantly/Keene) through to Everglades Blvd. It is the most logical east/west route as it already connects with I-75.
- Another East/west route to consider would be Pine Ridge/White Blvd. to Everglades.
- Need N/S outlet from the central estates to lighten pressure on Golden Gate Blvd. and CR 951.
- Keene/Brantley east and west.
- 16th Avenue extension to Everglades.
- CR 951 to Markley Avenue to Ines and south to Blackburn Road.
- Strongly feel that road construction west of the main Golden Gate where it now one mile east of and parallel to CR 951 would not be reasonable and would not serve the traffic demand being studied.
- Wilson, a low impact country road (not curb and gutter), is needed – 4 lanes possibly 6 lanes footprint. No curbs so vehicles can pull over in the event of a flat or other emergency. Farm machinery needs this type of road to allow vehicles to go around them. Enough land is available if you work on the right of way now to allow for drainage beside the road.

NEXT STEPS

It is the intent of the county and Consultant team to review all comments, and where necessary, incorporate those comments and alignment suggestions into the technical analysis, development of alternatives and evaluation process.

Three alternatives, plus a No-Build Alternative, will be developed and analyzed and evaluated or ranked against the other alternatives. Evaluation criteria include measures such as: residential and business relocations and impacts, environmental impacts, travel demand, social and cultural effects, right-of-way, mitigation acreage and costs, among others.

An evaluation or ranking matrix will be created based upon the standard FDOT matrix and the one developed for the Vanderbilt Beach Road Corridor Study. The weighting structure of the matrix may be adjusted to address the public's comments/concerns. Once the evaluation is complete, the County will recommend a preferred alternative.

The public will have another opportunity to comment on the three alternatives, evaluation matrix and the recommended alternative at the next public workshop, to be held in late Fall 2008. Comments will again be reviewed and incorporated, where necessary, before a final alternative is recommended to the Board of County Commissioners at a Public Hearing in early 2009.

YOUR Opinion Matters

Due to the environmentally-sensitive nature of the study area and public concerns of developing a potential new roadway, the county is committed to working with agencies and the public to identify and develop the most feasible routes, while being sensitive to public concerns. All citizens are encouraged to participate in the study and provide input. You can make your voices heard in several ways, including the following:

- **Attend the public workshop** on March 26.
- **E-mail us your comments** at claudineauclair@colliergov.net
- **Review project information** on Collier County's Web site at www.colliergov.net; go to **Your Government**; go to **Department - Transportation Planning**; go to **Wilson Boulevard Extension/Benfield Road Corridor Study**.

• **Request a presentation** at your neighborhood or civic association meeting, or other scheduled event.

It is the county's goal to obtain as many comments and suggestions as possible so that the final recommendations are a result of our collective input.

WILSON BOULEVARD extension BENFIELD ROAD corridor Study

Issue No.1

March 2008

PROJECT Description

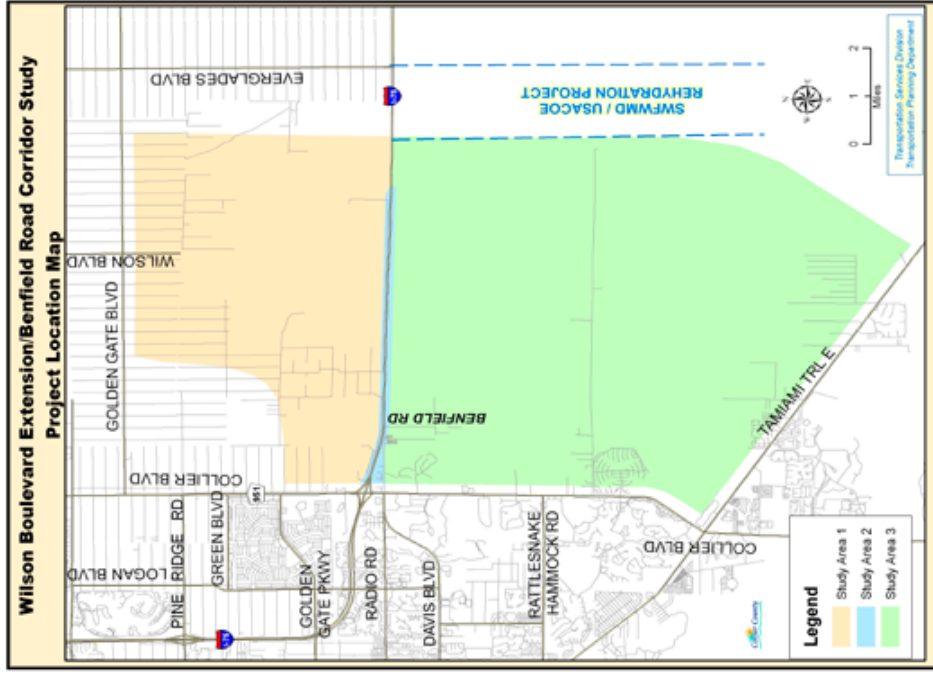

Collier County is in the process of preparing a study for a potential new north-south roadway located east of Collier Boulevard (CR 951). The area being studied is approximately 20 miles in length, bordered by US 41 to the south, CR 951 to the west, 18th Street S.E./Miller Boulevard to the east and Golden Gate Boulevard to the north, as shown on the map.

Specifically, the study will accomplish the following:

- Define the optimum location of Benfield Road (south of I-75) to connect to US 41;
- Extend Wilson Boulevard to Golden Gate Boulevard, Landfill Road and CR 951 via Utilities Drive or City Gate Boulevard North;
- Determine the most feasible crossing of I-75 that will connect the Wilson Boulevard Extension to Beck Boulevard and Benfield Road;
- Minimize any environmental, natural and social impacts during the development of conceptual roadway alignments.

PROJECT Goals and Objectives

- To maximize public outreach efforts and ensure that communication efforts will be maintained throughout the study process.
- To determine the existing and future transportation needs, concerns and how best to address these needs and concerns.
- To describe natural, physical, environmental, social, economic and other constraints within the study area that could have negative effects on any proposed roadway alignments.
- To develop and recommend alternative alignments that are consistent with the county's Growth Management and Long Range Transportation plans.
- To provide environmental, biological and historical information to serve as input for future county activities.
- To promote safe traffic and bicycle and pedestrian movements.

PUBLIC WORKSHOP M A R C H 2 6 , 2 0 0 8

Collier County invites you to attend and participate in a public workshop on **Wednesday, March 26** (see location/time below). By attending the workshop, you will be provided an opportunity to learn about the project, understand the social, environmental and economic character of the area, ask questions and offer input to county staff.

St. Agnes Church
7775 Vanderbilt Beach Road (at CR 951)
Naples, Florida
5:00 p.m. – 7:00 p.m.

See **Workshop** page 2

www.colliergov.net

Page 1

WORKSHOP

The workshop will be in an open house format from 5:00-7:00 p.m., and citizens may attend at any time during the two hour timeframe of the workshop.

There will be maps, displays and other project information on hand to provide you with a good understanding of the project. Citizens will also be provided a map of the study area and asked to "draw" a preferred alignment, given the constraints of the project area. County staff and consultant team members will be available to assist participants in identifying an alignment.

Share this news with your neighbors and friends and join us on March 26!

**St. Agnes Church
7775 Vanderbilt Beach Road
(at CR 951)
Naples, Florida
5:00 p.m. – 7:00 p.m.**

Disclaimer:

If you are a person with a disability who needs any accommodation in order to participate in this proceeding, you are entitled, at no cost to you, to the provision of certain assistance. Please contact the Collier County Facilities Management Department located at 3301 East Tamiami Trail, Naples, Florida, 34112, 239.252.8380 at least two days prior to the meeting; assisted listening devices for the hearing impaired are available in the County Commissioners' Office.

Members of the Board of County Commissioners may be in attendance at this public workshop.

PROJECT Purpose and Need

The purpose of the study is to determine how we can improve traffic congestion in the study area by developing a series of alternative routes that will accommodate transportation needs. Over the past several years, the increase in traffic, development and population has made getting around in Collier County more challenging. This trend is expected to continue, particularly in eastern Collier County. This growth has put a strain on the overall transportation network and prompted a study of potential ways to improve north-south travel.

A new north-south roadway will also provide the following:

- Serve the evacuation needs of western Collier County residents

and significantly enhance overall safety, emergency access and traffic circulation.

- Create a better connection to CR 951 and I-75 from US 41 and the coastal areas of Collier County.
- Accommodate countywide population and employment growth, as well as play an important role in the inter-county roadway network by improving access to US 41 and I-75.
- Provide a travel option that may alleviate traffic congestion on CR 951/Collier Boulevard and Everglades Boulevard, two parallel county facilities.

INITIAL Issues and Concerns

At the beginning of the study, Collier County notified a host of environmental resource agencies about the project, its location and purpose and need, and requested their initial input, concerns and/or comments. Highlighted below is a sample of some responses:

- Approximately 40 archaeological sites within 100 feet of the project area, with three being burial sites. It is suggested that a Cultural Resources Survey be conducted to ascertain the impacts of the project to these sites (source: Miccosukee Tribe).
- The project is located within an area of Seminole historic and ancestral interest; therefore, it is important that the county coordinate with the tribal agency (source: Tribal Historic Preservation Officer, Seminole Tribe of Florida).
- Preserve the integrity of North Belle Meade wetlands; incorporate Big Cypress Basin plans for diversion of a portion of Golden Gate Canada waters to North Belle Meade and

flow to Naples Bay (source: South Florida Water Management District/Big Cypress Basin).

- The study area is located within primary bear range (FWC Data 2004) of the Big Cypress Bear Population and provides habitat which is conducive for bears and bear movement within the Big Cypress bear population (source: Imperiled Species Management, Bear Management Program).

Note that there are federally listed species and fish and wildlife habitat in the project study area (source: US Fish and Wildlife Service).

- Consider the following when conducting your study:
 - Panther Habitat/Red Cockaded Woodpecker (RCW) Habitat
 - Public Lands Conservation
 - Public Lands Acquisition boundaries
 - Picayune Strand Restoration
 - Wetland Impacts
 - Sending Lands
- (source: Florida Wildlife Federation).

Protecting Our Wildlife

As a consideration of this study, Collier County has entered into a Memorandum of Agreement (MOA) with the agencies listed below to recognize the value of wildlife crossings in reducing the number of roadway-related accidents to the Florida panther and other species, as well as to maintain/enable connectivity to wildlife populations.

Agencies involved in the MOA:

- Collier County
- Florida Department of Transportation
- Florida Fish and Wildlife Conservation Commission
- Big Cypress National Preserve
- US Fish and Wildlife Service, South Florida Ecological Service Office

The MOA focuses on two primary goals:

- Construct wildlife crossings within the project corridor, as needed.
- Protect lands adjacent to the crossings and install fencing to ensure its effectiveness.

The MOA is currently being reviewed by our County Attorney and will be signed by all parties.

Public Information Meeting

Wilson Boulevard Extension / Benfield Road Corridor Study

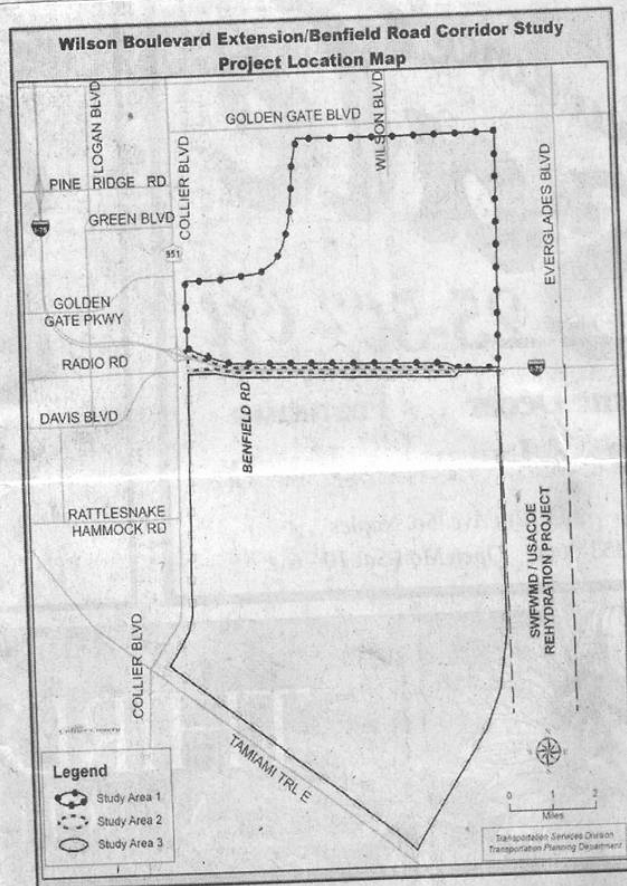

Corridor Study Public Workshop

March 26, 2008 • 5:00 - 8:00 p.m.

St. Agnes Church • 7775 Vanderbilt Beach Road (at CR 951), Naples

- The Collier County Transportation Services Division is presenting an informational meeting in an open house format for the Wilson Boulevard Extension/Benfield Road Corridor Study. Collier County is conducting this corridor study to investigate the feasibility of a potential north-south roadway to help improve traffic congestion on Collier Boulevard (CR 951), while being sensitive to environmental issues and public concerns.
- The approximately 20-mile corridor study limits are US 41 to the south, Collier Boulevard to the west, 18th Street S.E./Miller Boulevard to the east and Golden Gate Boulevard to the north.
- Residents, business owners and other interested persons are welcome to stop in any time between 5 p.m. and 7 p.m. to review the project displays and ask questions of the study representatives. Members of the Board of County Commissioners may be in attendance at this public information meeting.
- If you are a person with a disability who needs any accommodation in order to participate in this proceeding, you are entitled, at no cost to you, to the provision of certain assistance. Please contact the Collier County Facilities Management Department located at 3301 East Tamiami Trail, Naples, FL 34112, (239) 252-8380 at least two (2) days prior to the meeting. Assisted listening devices for the hearing impaired are available in the County Commissioners' Office.

FOR IMMEDIATE RELEASE

Wilson Boulevard Extension/Benfield Road Corridor Study Public Workshop Planned for March 26

The Collier County Transportation Services Division invites residents, visitors, business and property owners to participate in the Wilson Boulevard Extension/Benfield Road Corridor Study Public Workshop on Wednesday, March 26 from 5 p.m. to 7 p.m. at St. Agnes Church, 7775 Vanderbilt Beach Road, Naples. This corridor study is being conducted to identify a potential new north-south road to help improve capacity in eastern Collier County as well as to lessen traffic congestion on Collier Boulevard (CR 951), while being sensitive to environmental issues and public concerns.

The 20-mile wide study area limits include US 41 to the south, CR 951 to the west, 18th Street S.E./Miller Boulevard to the east and Golden Gate Boulevard to the north.

In recent years, Collier County has experienced significant development and population growth. This trend is expected to continue, particularly in the eastern portions of the county. This growth has strained the area's transportation network and prompted an analysis of potential ways to improve north-south travel.

A new north-south roadway is needed to create a better traffic circulation, allow for an alternate connection to Collier Boulevard (CR 951) and I-75 from US 41, improve access to US 41 and I-75 and accommodate countywide population and employment growth. In addition, the potential new roadway will serve the evacuation needs of eastern Collier County residents, enhance overall safety, and allow for better emergency access.

The purpose of the workshop is to present information about the project and study area, and to obtain public input on the location of a new north-south road. Participants will be provided a map of the study area and asked to "draw" a preferred alignment, given the constraints of the project area. Maps and exhibit boards showing these constraints and project parameters will be available to assist participants in identifying an alignment.

This is the first of two workshops. The second workshop will be held once alternative alignments have been developed so that the public will have an opportunity for comment before the study is completed. The study will be completed in summer 2009.

District 5 Commissioner Jim Coletta, in whose district this corridor study is located, would like to see as many of his constituents as possible get involved in the study process.

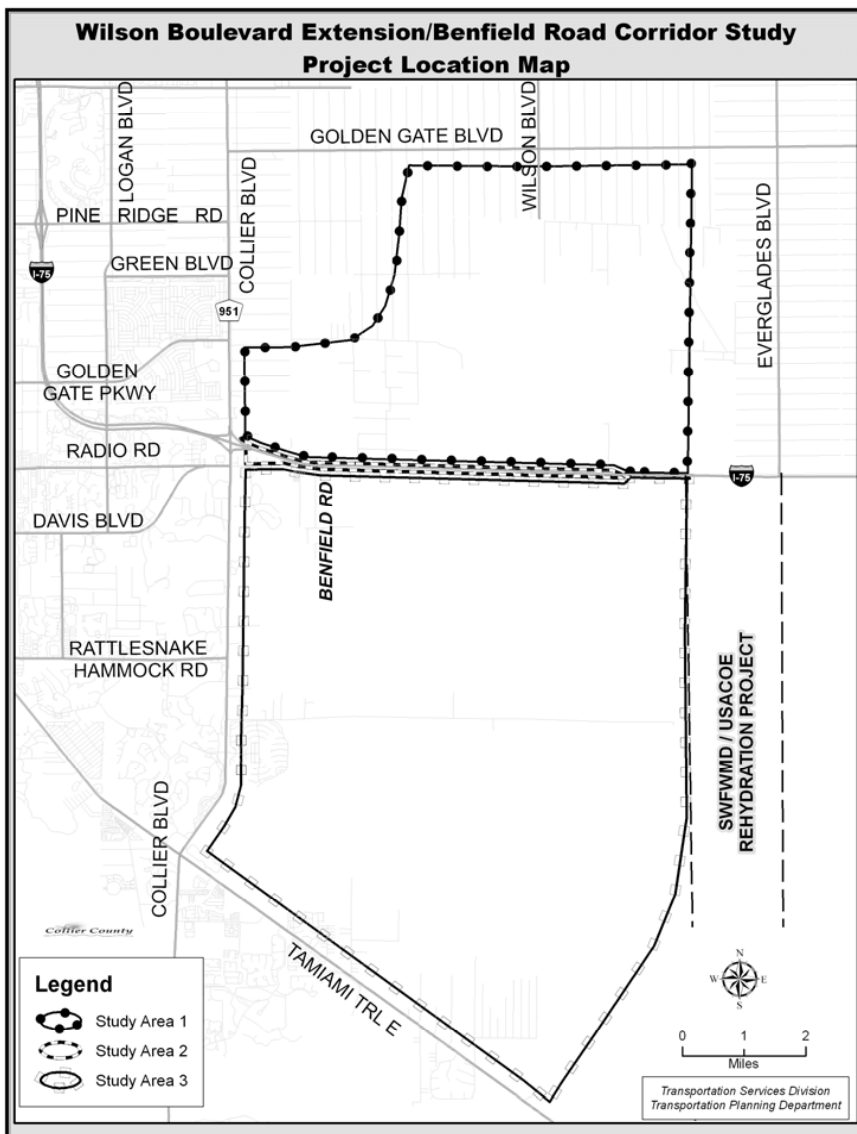

-more-

“This workshop will provide an opportunity for all the residents and business owners in Golden Gate Estates and eastern Collier County to have a say in how, or if, an additional north-south roadway is incorporated into what development has already happened,” said Coletta. “This is the community’s chance to take part in an important county transportation process. With everyone’s input we can better determine where a road can best fit to assist the transportation and emergency needs, if it is determined that an alignment can be done successfully.”

County staff and consultant team members will be at the workshop to discuss the study and answer any questions from residents. Everyone is encouraged to attend and provide input.

Members of the Board of County Commissioners may be in attendance at this informational workshop.

If you are a person with a disability who needs any accommodation in order to participate in this proceeding, you are entitled, at no cost to you, to the provision of certain assistance. Please contact the Collier County Facilities Management Department located at 3301 East Tamiami Trail, Naples, Florida, 34112, 239.252.8380, at least two days prior to the meeting.

Public Workshop

Wilson Boulevard Extension/Benfield Road Corridor Study
St. Agnes Church
7775 Vanderbilt Beach Road
March 26, 2008, 5:00 - 7:00 p.m.

Please join us on March 26 to discuss the Wilson Boulevard Extension/Benfield Road Corridor Study.

The purpose of the workshop is to present information about the project and have citizen's provide input on the location of a potential new north-south road (*see study area map on back*).

County staff will be available to assist participants and answer questions.

For more information, please contact Ms. Claudine Auclair, Project Manager at 239.252.5887 or claudineauclair@collier.gov.net

FAX: (239) 213-5839

November 9, 2007

To Whom It May Concern:

Subject: Wilson Boulevard Extension/Benfield Road Corridor Study
Work Program No.: 601041

Dear Sir/Madam:

Collier County is in the process of preparing a corridor study on the above referenced project. This letter is the county's invitation for you to participate in and comment on this project.

The project includes the study of a new north-south corridor east of Collier Boulevard (CR 951). The study area limits are approximately 20 miles in length and include Collier Boulevard (CR 951) to the west, 18th Street S.E./Miller Boulevard to the east, Golden Gate Boulevard to the north and US 41 to the south. (see attached study area map). The primary purpose of the study is to determine the existing and future transportation demands within this corridor and develop an alternative alignment or possibly more than one alignment that is/are consistent with the Collier County 2030 Long Range Transportation Plan and 2015 Interim Plan while being sensitive to environmental issues and public concerns. It is our collective role to determine the best alternative to improve traffic congestion on CR 951. The consultant team led by Dyer, Riddle, Mills and Precourt, Inc. (DRMP) of Tampa, Florida has been retained by the County to coordinate the development and evaluation of alternative alignments for this project.

Your participation and input will help the county to accomplish the following:

1. Determine any significant issues and the degree of analysis required to accomplish the Study. This will include the identification of alternatives and evaluation of associated impacts, including environmental, natural and social impacts.
2. Identify specific areas of concern and determine the best method for resolving and/or managing them in the context of this corridor study.
3. Identify and eliminate from detailed study those issues which are not significant or which have been covered by prior studies, thereby narrowing discussion in the corridor study to a brief paragraph and providing a reference to their coverage elsewhere.
4. Identify any environmental assessments, impact statements or feasibility studies that are being prepared that may be related to, but are not part of, the scope of the project under study.

5. Identify whether any permits, licenses or entitlements will be necessary if this study is further advanced.

Your individual and agency participation and cooperation in this preliminary issues identification effort is encouraged. Please identify a representative of your agency to be the key contact person with whom the county shall coordinate by completing the attached form and faxing it back to me at 239.252.5839 by **November 28, 2007**. Also, if you have any initial issues or concerns with this Corridor Study, you may include it on the attached form, call me at 239.252-5887 (direct line) or e-mail me at ClaudineAuclair@colliergov.net.

Sincerely,

Ms. Claudine Auclair, Project Manager

WILSON BOULEVARD extension BENFIELD ROAD corridor Study

Issue No.1

March 2008

YOUR Opinion Matters

Due to the environmentally-sensitive nature of the study area and public concerns of developing a potential new roadway, the county is committed to working with agencies and the public to identify and develop the most feasible routes, while being sensitive to public concerns. All citizens are encouraged to participate in the study and provide input. You can make your voices heard in several ways, including the following:

- **Attend the public workshop** on March 26.
- **E-mail us your comments** at claudineauclair@colliergov.net
- **Review project information** on Collier County's Web site at www.colliergov.net; go to **Your Government**; go to **Department - Transportation Planning**; go to **Wilson Boulevard Extension/Benfield Road Corridor Study**.

• **Request a presentation** at your neighborhood or civic association meeting, or other scheduled event.

It is the county's goal to obtain as many comments and suggestions as possible so that the final recommendations are a result of our collective input.

PROJECT Description

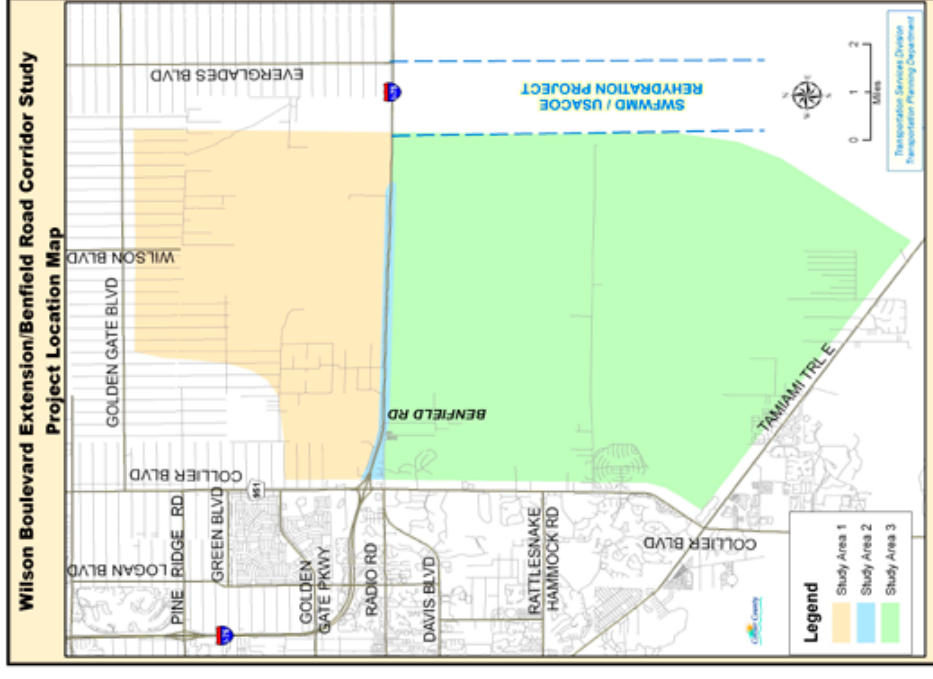

Collier County is in the process of preparing a study for a potential new north-south roadway located east of Collier Boulevard (CR 951). The area being studied is approximately 20 miles in length, bordered by US 41 to the south, CR 951 to the west, 18th Street S.E./Miller Boulevard to the east and Golden Gate Boulevard to the north, as shown on the map.

Specifically, the study will accomplish the following:

- Define the optimum location of Benfield Road (south of I-75) to connect to US 41;
- Extend Wilson Boulevard to Golden Gate Boulevard, Landfill Road and CR 951 via Utilities Drive or City Gate Boulevard North;
- Determine the most feasible crossing of I-75 that will connect the Wilson Boulevard Extension to Beck Boulevard and Benfield Road;
- Minimize any environmental, natural and social impacts during the development of conceptual roadway alignments.

PROJECT Goals and Objectives

- To maximize public outreach efforts and ensure that communication efforts will be maintained throughout the study process.
- To determine the existing and future transportation needs, concerns and how best to address these needs and concerns.
- To describe natural, physical, environmental, social, economic and other constraints within the study area that could have negative effects on any proposed roadway alignments.
- To develop and recommend alternative alignments that are consistent with the county's Growth Management and Long Range Transportation plans.
- To provide environmental, biological and historical information to serve as input for future county activities.
- To promote safe traffic and bicycle and pedestrian movements.

PUBLIC WORKSHOP

M A R C H 2 6 , 2 0 0 8

Collier County invites you to attend and participate in a public workshop on **Wednesday, March 26** (see location/time below). By attending the workshop, you will be provided an opportunity to learn about the project, understand the social, environmental and economic character of the area, ask questions and offer input to county staff.

Naples, Florida
5:00 p.m. – 7:00 p.m.**

Disclaimer:

If you are a person with a disability who needs any accommodation in order to participate in this proceeding, you are entitled, at no cost to you, to the provision of certain assistance. Please contact the Collier County Facilities Management Department located at 3301 East Tamiami Trail, Naples, Florida, 34112, 239.252.8380 at least two days prior to the meeting; assisted listening devices for the hearing impaired are available in the County Commissioners' Office.

Members of the Board of County Commissioners may be in attendance at this public workshop.

PROJECT Purpose and Need

The purpose of the study is to determine how we can improve traffic congestion in the study area by developing a series of alternative routes that will accommodate transportation needs. Over the past several years, the increase in traffic, development and population has made getting around in Collier County more challenging. This trend is expected to continue, particularly in eastern Collier County. This growth has put a strain on the overall transportation network and prompted a study of potential ways to improve north-south travel.

A new north-south roadway will also provide the following:

- Serve the evacuation needs of western Collier County residents

and significantly enhance overall safety, emergency access and traffic circulation.

- Create a better connection to CR 951 and I-75 from US 41 and the coastal areas of Collier County.
- Accommodate countywide population and employment growth, as well as play an important role in the inter-county roadway network by improving access to US 41 and I-75.
- Provide a travel option that may alleviate traffic congestion on CR 951/Collier Boulevard and Everglades Boulevard, two parallel county facilities.

INITIAL Issues and Concerns

At the beginning of the study, Collier County notified a host of environmental resource agencies about the project, its location and purpose and need, and requested their initial input, concerns and/or comments. Highlighted below is a sample of some responses:

- Approximately 40 archaeological sites within 100 feet of the project area, with three being burial sites. It is suggested that a Cultural Resources Survey be conducted to ascertain the impacts of the project to these sites (source: Miccosukee Tribe).
- The project is located within an area of Seminole historic and ancestral interest; therefore, it is important that the county coordinate with the tribal agency (source: Tribal Historic Preservation Officer, Seminole Tribe of Florida).
- Preserve the integrity of North Belle Meade wetlands; incorporate Big Cypress Basin plans for diversion of a portion of Golden Gate Canada waters to North Belle Meade and

flow to Naples Bay (source: South Florida Water Management District/Big Cypress Basin).

- The study area is located within primary bear range (FWC Data 2004) of the Big Cypress Bear Population and provides habitat which is conducive for bears and bear movement within the Big Cypress bear population (source: Imperiled Species Management, Bear Management Program).

Note that there are federally listed species and fish and wildlife habitat in the project study area (source: US Fish and Wildlife Service).

- Consider the following when conducting your study:
 - Panther Habitat/Red Cockaded Woodpecker (RCW) Habitat
 - Public Lands Conservation
 - Public Lands Acquisition boundaries
 - Picayune Strand Restoration
 - Wetland Impacts
 - Sending Lands (source: Florida Wildlife Federation).

Protecting Our Wildlife

As a consideration of this study, Collier County has entered into a Memorandum of Agreement (MOA) with the agencies listed below to recognize the value of wildlife crossings in reducing the number of roadway-related accidents to the Florida panther and other species, as well as to maintain/enable connectivity to wildlife populations.

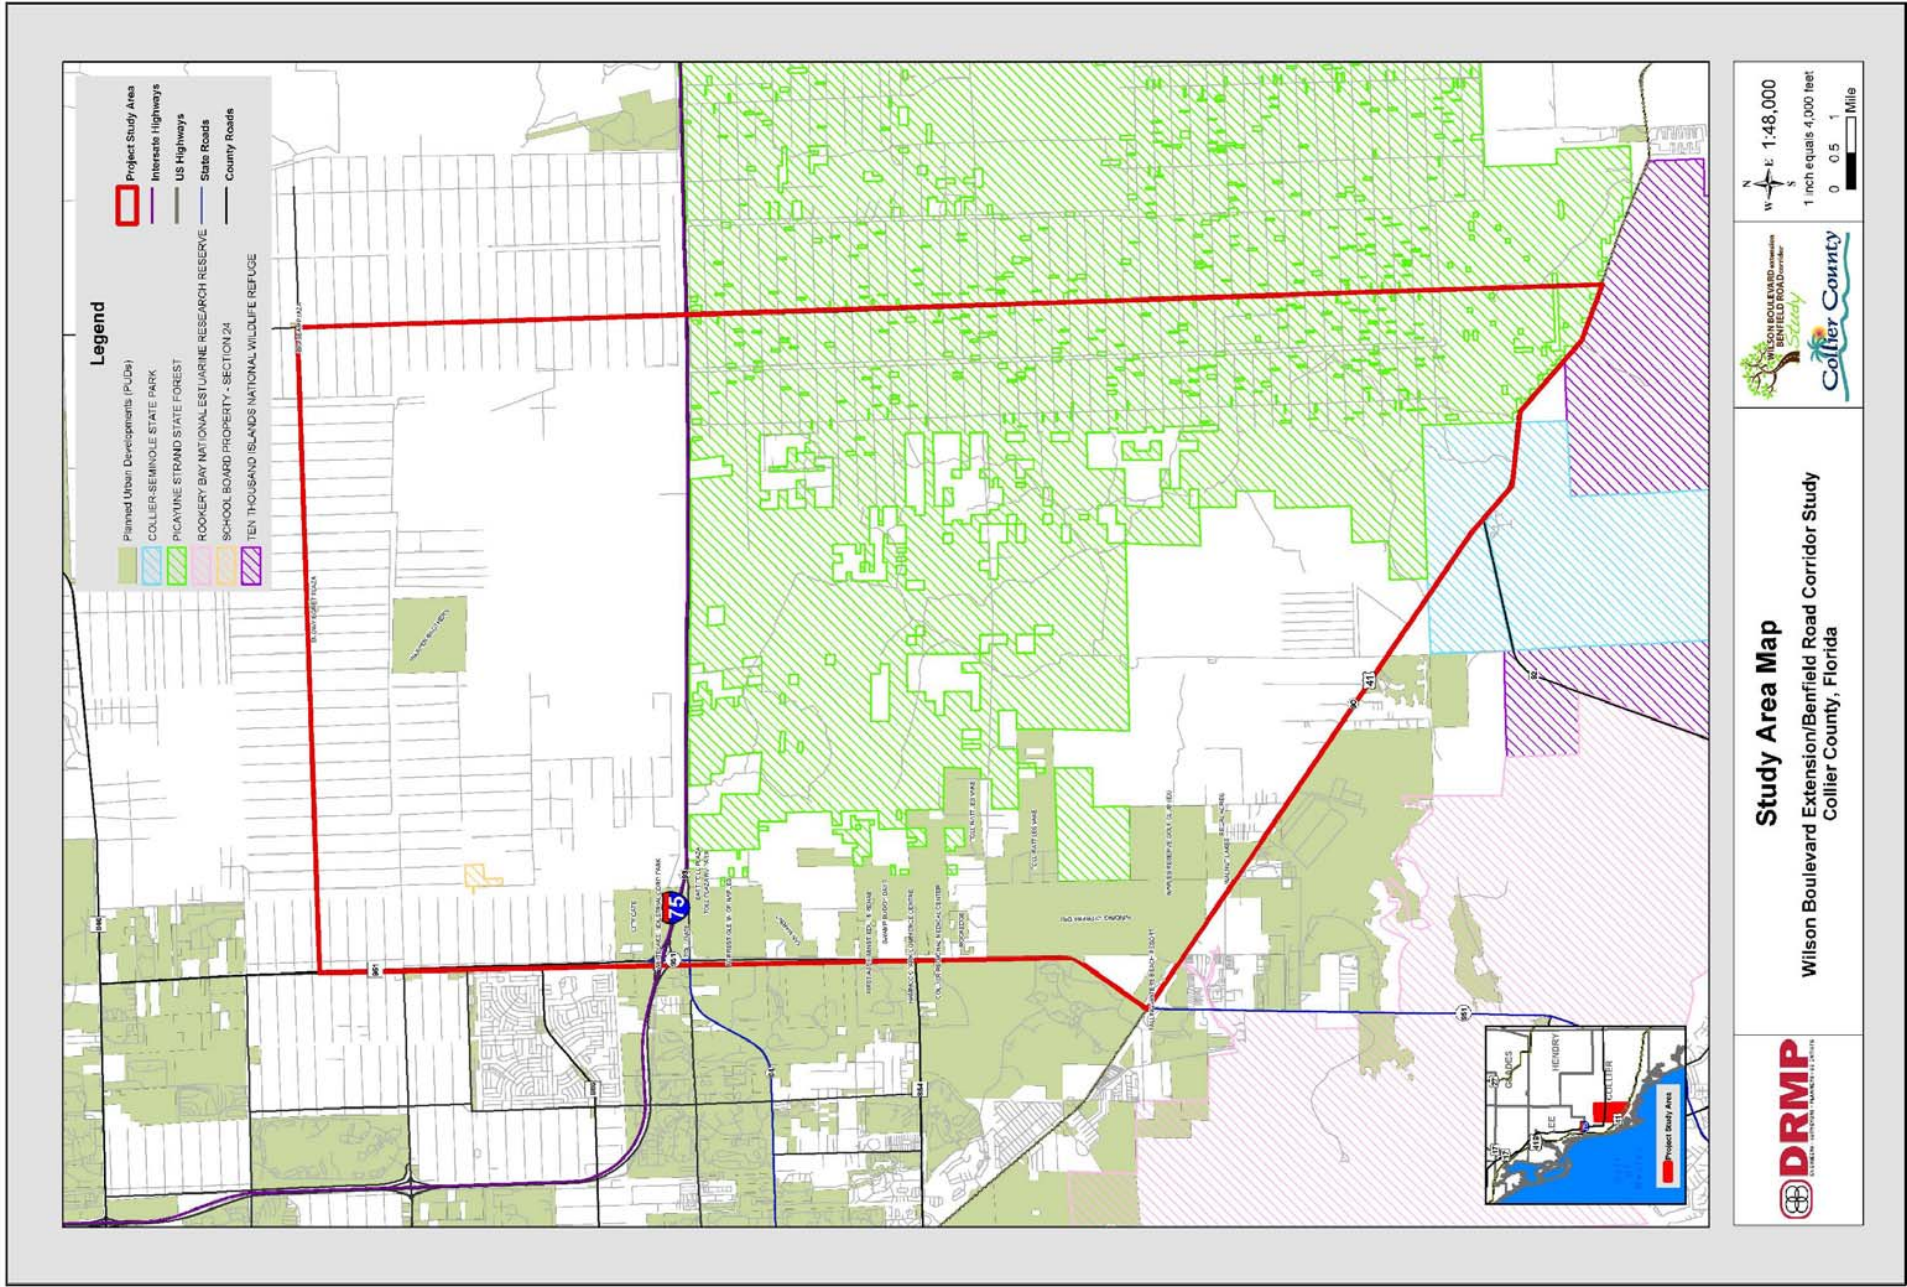

Agencies involved in the MOA:

- Collier County
- Florida Department of Transportation
- Florida Fish and Wildlife Conservation Commission
- Big Cypress National Preserve
- US Fish and Wildlife Service, South Florida Ecological Service Office

The MOA focuses on two primary goals:

- Construct wildlife crossings within the project corridor, as needed.
- Protect lands adjacent to the crossings and install fencing to ensure its effectiveness.

The MOA is currently being reviewed by our County Attorney and will be signed by all parties.

WILSON BOULEVARD/BENFIELD ROAD CORRIDOR STUDY

STUDY PURPOSE

The purpose of the corridor study is to determine how the County can improve traffic congestion in the study area by developing a series of alternative routes that will accommodate our transportation needs. Over the past several years, the increase in traffic, development and population has made getting around in Collier County more challenging. This trend is expected to continue, particularly in eastern Collier County. This growth has put a strain on the overall transportation network and prompted a study of potential ways to improve north-south travel.

STUDY GOALS AND OBJECTIVES

- A. To determine the Corridor's existing and future transportation demands, including traffic volumes, travel characteristics, and historical trends; facility operation (level of service), conditions of existing facilities and plans for improvements; describe what the existing or expected concerns are for the corridor and how the management plan expects to address these concerns.
- B. To determine the existing and projected traffic circulation needs for the Corridor, including traffic volumes, travel characteristics, future conditions and mobility requirements.
- C. To generally describe natural, physical, environmental, social, political, operational, and economic constraints within the Corridor that could have a negative social and economic effect upon any proposed alignments. The proposed alignments should minimize the displacement of residences and businesses as well as damage to ecosystems, wetlands or water quality.
- D. To develop and recommend alternative alignments that are consistent with the Collier County Growth Management Plan and Long Range Transportation Plan.
- E. To coordinate review with existing and proposed development/land use.
- F. To provide sufficient preliminary engineering and environmental information for future County production activities.
- G. To maximize public outreach efforts to ensure that communications efforts and public's participation in all phases of the Study process will be maintained and expanded by identifying and involving stakeholders.

Community Meeting**

September 10, 2008

WILSON BOULEVARD EXTENSION BENFIELD ROAD CORRIDOR STUDY

Summary of Benfield Road Area Community Meeting Comments September 10, 2008 (Comment data as of 3.3.2009)

Collier County held a Benfield Road Area Community Meeting to assist with the Wilson Boulevard Extension/Benfield Road Corridor Study on the following date:

Wednesday, September 10, 2008 - Lely Elementary School in Naples.

Local residents were notified of this meeting in advance by the following ways (refer to Appendix A for actual meeting notice):

- 66 notices of meeting mailed via USPS standard mail.
- 115 notices hand delivered to Club Naples RV Resort.
- 113 notices hand delivered to Panther's Walk RV Resort.

The purpose of this Community Meeting was to review the proposed alignments/alternatives regarding the potential new north-south roadway located east of Collier Boulevard (CR 951), *particularly to those affecting Benfield Road.*

All attendees were provided a comment sheet to complete that addressed three special topics of interest, which are (refer to Appendix B):

- Comments/concerns with proposed alignments.
- Comments/concerns with access on proposed roadway or adjacent property.
- Other roadway or general comments.

Ms. Claudine Auclair, Collier County Project Manager, conducted the meeting, with assistance from other Collier County staff. A total of 41 people attended the meeting, according to the sign-in sheets. Additionally, a total of 12 comment sheets were completed at the meeting, and five emails and two telephone calls regarding the meeting discussion were received by the County to date.

A summary of all written comments is presented below (Comment Sheets and emails are available at the Transportation Planning Department office and will not be posted to the project Web site).

Summary of Comments

September 10, 2008 – LELY ELEMENTARY SCHOOL, NAPLES

Written Comments (Comment Sheets and emails are available at the Transportation Planning Department office and will not be posted to the project Web site):

Comments/concerns with proposed alignments

AGREE

- OK with front or back of Benfield Road.
- We own 2 lots in this proposed alignment and see no problems with it.
- Support the growth plan east of 951 – particularly the S3A6 and favor extension all the way to US 41.

OPPOSED

- Benfield Road alignment prevents me from state reserve area and my business, M&H Stables, along with all boarders who reside there (approximately 100 horses housed). Additionally, I could be in danger of losing my home.
- Waste of Money!
- Oppose any road with a terminal affect on so many already threatened species (Bald Eagle, Fl Panther, red cockaded woodpecker, Gopher tortoise, Black Heron, Fox squirrel and so many others). If an alternate road must be built, infringe on the golf course, not the animals or park. (2 comments received)
- Oppose Benfield Road extension – use Miller Road.
- **Q:** Only one option provided that ran right next to VeronaWalk property – why build next to a developed property? East is owned by Toll Brothers or Toll Rattlesnake-
- Concerned VeronaWalk will be sandwiched between 2 major roads and noise may be unbearable. If built, we want a wall to act as sound and sight barrier.
- **Q:** I own 25 acres on Newman Dr. and the yellow draft option goes right down my west border. Since this major road will impact my property, consider the following: Can NERPA and conservation easements be lifted from these properties that are impacted so the land we have left can be subdivided and developed as a way of compensating us for what we are losing? If the road goes down Stable Way, an underpass to access Belle Mead horse trails is necessary and can you consider all the land west should be zoned either commercial or for increased density such as 1 RDU per 1 ¼ acres?

IDEA GENERATION or SUGGESTION

- Place at least one mile from back of VeronaWalk development. (2 comments received)
- Miller project is the best fit – extension from 951 to Beck to Miller. (4 comments received)
- Prefer no build but, if inevitable, best alignment scenario is S3A5 due to least impact on the equine community.

Comments/concerns with access on proposed roadway or adjacent property

AGREE

- OK with yellow or red alignment – we own lots on the east side of Benfield Road and both front the road.

OPPOSED

- Must have buffer zone – too close to VeronaWalk development (road noise).
- Will impact countless protected animals that live in this area. The Benfield Road access borders up against Picayune (home of the Florida panther, American Bald Eagle, whitetail deer, and countless small animals) and will run them out of their domain by heavy traffic. (2 comments received)
- Using Sabal Palm Road as an access from Collier Blvd. will increase traffic and noise – boxed in with views of cars and noise.

IDEA GENERATION or SUGGESTION

- Want S3A6 proposed 4-lane going N/S on east side of Benfield Road (part of Toll Plaza RV). (8 comments received)
- The money spent on this project could be put towards a smarter plan.
- To alleviate traffic from 951, change to 6 lanes not 4; use Miller to 41.
- Support Everglades Miller extension.
- Can I tie into it from my back yard – Beck Blvd. now is private and needs resurfaced.
- Miller Road best fit – already built and no problems with it and we'll save a lot of money while helping with traffic congestion in Golden Gate, Ave Maria and others.

Other roadway or general comments
--

AGREE

- None

OPPOSED

- Do not understand how SR 951 expansion is being built – goes from 3 to 2 to 3 to 2 lanes with no apparent logic. Seems like a waste of taxpayers money.

IDEA GENERATION or SUGGESTION

- Suggest everyone use the Miller Boulevard area, not Benfield Road access.
- Vote YES to EVERGLADE MILLER project.

NEXT STEPS

It is the intent of the County and Consultant team to review these comments, and where necessary, incorporate those comments and alignment suggestions into the technical analysis, refinement of alternatives and evaluation process. Three alternatives, plus a No-Build Alternative, will be developed and presented at the next Public Workshop to be held in February 2009.

An evaluation, or ranking, matrix will be created to analyze the alternatives, which is based upon the standard FDOT matrix and the one developed for the Vanderbilt Beach Road Corridor Study. Evaluation criteria include measures such as residential and business relocations and impacts, environmental impacts, travel demand, right-of-way, Panther habitat impacts, mitigation acreage and costs, among others. Public comments/concerns will also be considered during the evaluation when determining whether to advance or dismiss specific alignments/alternatives. Once the evaluation is complete, the County will recommend a preferred alternative.

During the final workshop in February, comments will be taken and reviewed again before a final alternative is recommended to the Board of County Commissioners at a Public Hearing in April 2009.

TO WHOM IT MAY CONCERN:

Subject: Wilson Boulevard Extension/Benfield Road Corridor Study
Benfield Road Area - Community Meeting

Dear Sir/Madam:

Collier County is currently performing a corridor study on the potential development of a new proposed north-south roadway facility east of Collier Boulevard (CR 951).

We would like to invite you to attend a very important community meeting to review the potential alignments currently under study by the county. During this meeting, we would like to gather your comments or concerns with regard to this future proposed roadway. Transportation Planning staff will be on hand to answer any questions you may have with regard to this project. The meeting will take place on **Wednesday, September 10, 2008** at the following location:

LELY ELEMENTARY SCHOOL
8125 Lely Cultural Parkway
Naples, FL 34113
Meeting time: 6:00pm until 7:30pm

PLEASE NOTE WE WILL NOT HAVE ACCESS TO THE SITE UNTIL MEETING TIME

The study area limits are approximately 20 miles in length and include Collier Boulevard (CR 951) to the west, 18th Street S.E./Miller Boulevard to the east, Golden Gate Boulevard to the north and US 41 to the south. (See draft proposed alignments map on back). The primary purpose of the study is to determine the existing and future transportation demands within this corridor and develop an alternative alignment, or possibly more than one, that are consistent with the county's Growth Management and Long Range Transportation Plans.

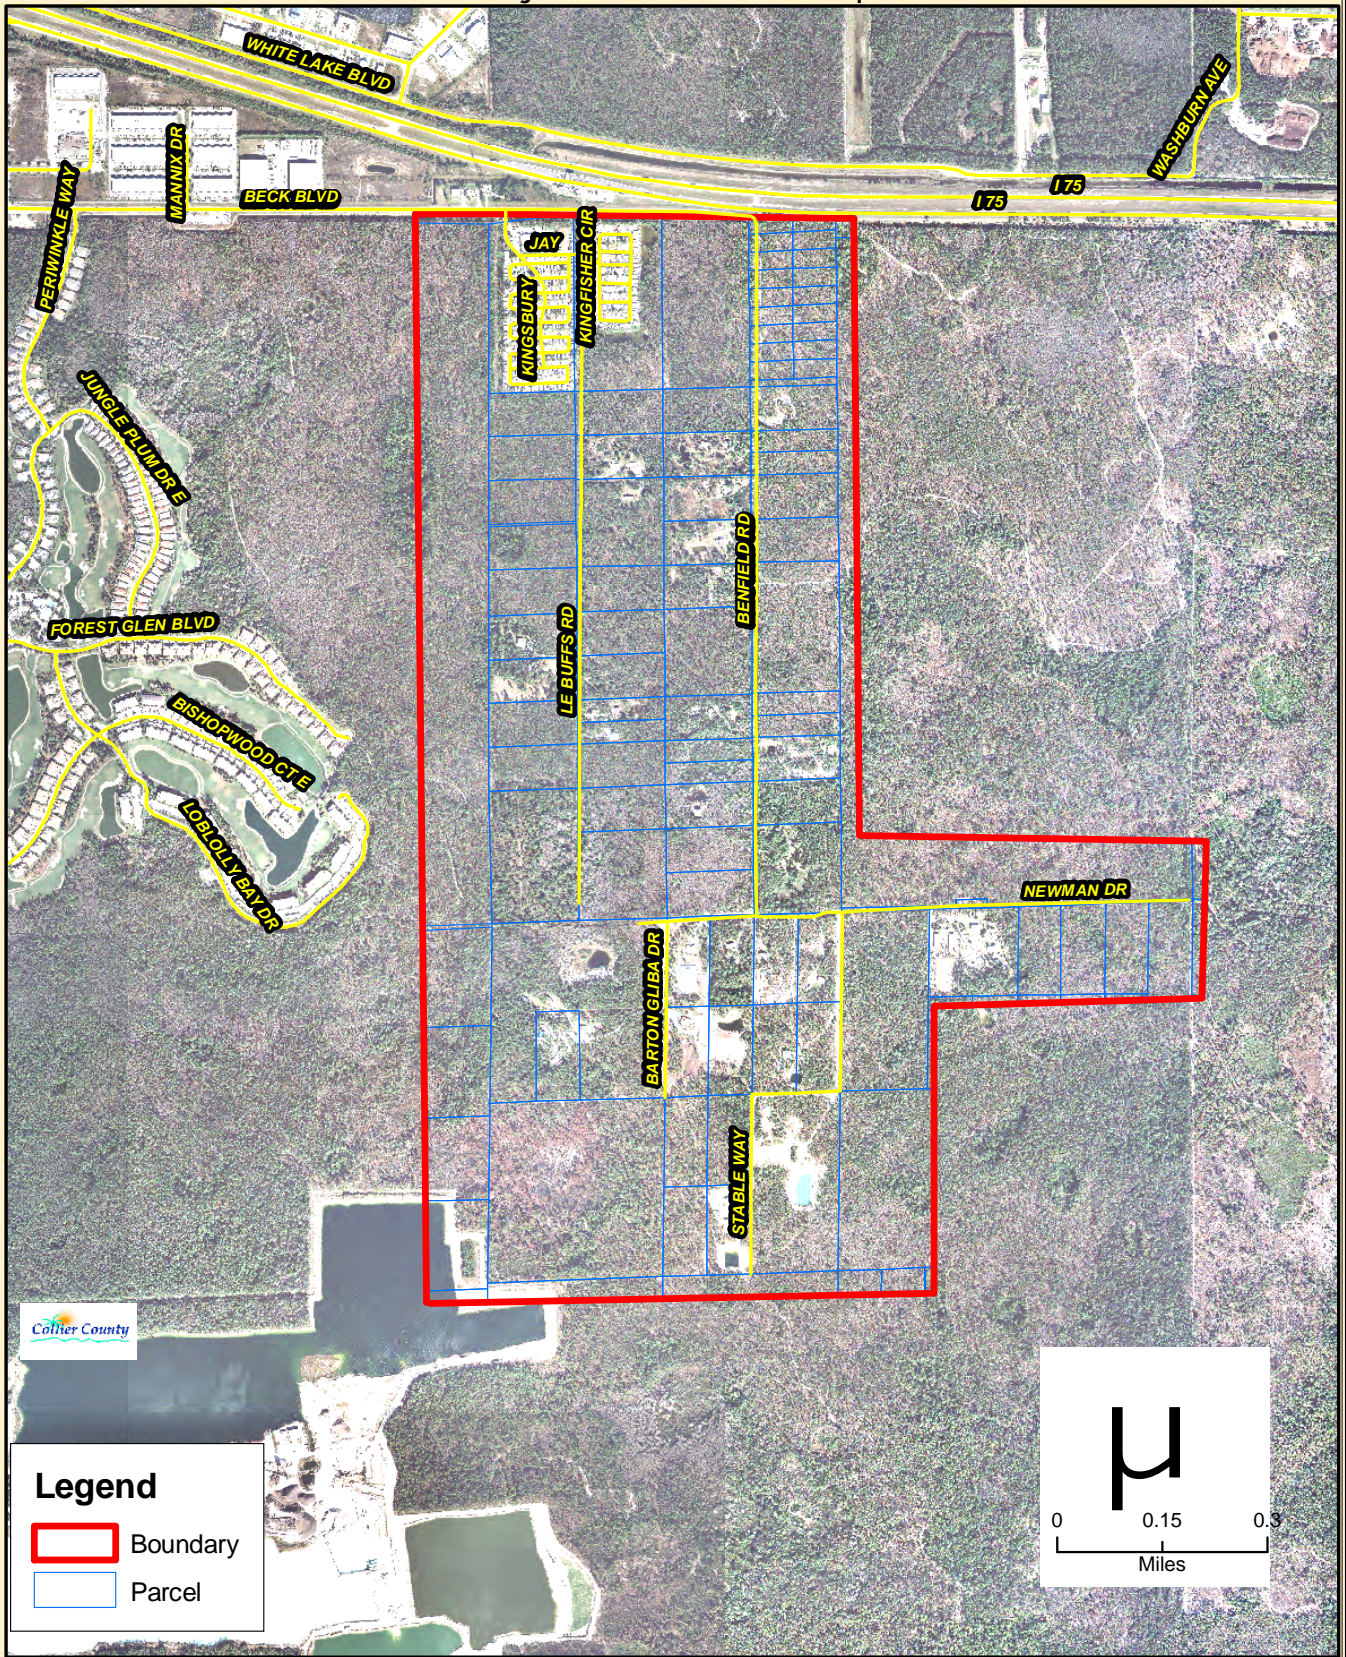

A new north-south roadway will also serve the evacuation needs of residents and significantly enhance overall safety, emergency access and traffic circulation.

If you have any questions or require additional information, please do not hesitate to call me at 239.252-5887 (direct line) or e-mail me at ClaudineAuclair@colliergov.net.

Sincerely,

Ms. Claudine Auclair
Project Manager

WILSON BOULEVARD EXTENSION BENFIELD ROAD CORRIDOR STUDY

Summary of VeronaWalk Community Meeting Comments December 3, 2008 (Comment data as of 1.8.2009)

Collier County held a VeronaWalk Community Information Meeting to assist with the Wilson Boulevard Extension/Benfield Road Corridor Study on the following date:

**Wednesday, December 3, 2008 – 6 – 7:30 p.m.
VeronaWalk Community Ballroom in Naples.**

Local residents were notified of this meeting in advance by the following ways (refer to Appendix A for actual meeting notices):

- Notices were hand delivered to the VeronaWalk Community for placement in the clubhouse location.
- A meeting notice/announcement ad was placed in their November 2008 “Viva Verona” newsletter; notices were also inserted into community newsletters.
- Posters were prepared by VeronaWalk Community and posted in the clubhouse and other facilities to inform the residents of the meeting.

The purpose of this Community Meeting was to review the proposed alignments/alternatives regarding the potential new north-south roadway located east of Collier Boulevard (CR 951).

All attendees were provided a project comment sheet and a study map that identified the three proposed alternatives. Additionally, the county staff presented a PowerPoint presentation that gave a high level overview of the Corridor study. The attendees were encouraged to complete the comment sheet that addressed three special topics of interest, which are (refer to Appendix B):

- Comments/concerns with proposed alignments.
- Comments/concerns with access on proposed roadway or adjacent property.
- Other roadway or general comments.

Ms. Claudine Auclair, Collier County Principal Planner, conducted the meeting, with assistance from other Collier County staff. A total of 34 people attended the meeting, according to the sign-in sheets. Additionally, ten comment sheets were completed and three emails regarding the meeting discussion were received by the County to date.

A summary of all written comments is presented below (Comment Sheets and emails are available at the Transportation Planning Department office and will not be posted to the project Web site).

**Document in Transportation Planning\Final Report\Apendices Interim Data 0809

Summary of Comments

DECEMBER 3, 2008 – VERONAWALK COMMUNITY BALLROOM, NAPLES

Written Comments (Comment Sheets and emails are available at the Transportation Planning Department office and will not be posted to the project Web site):

Comments/concerns with proposed alignments

AGREE

- Proposed #2 Miller Blvd. is much more 'future' sighted with less impact to people and open preserve land. The growth is going east in the long-term. (4 comments received)

OPPOSED

- Not necessary and too close to our home and development. If you 6 lane Collier Boulevard and Rattlesnake Hammock, as well as create the extension of Collier and Santa Barbara, then that is enough. No need to use tax monies and destroy habitat for anything else. (2 comments received)
- Building a road one mile from Collier Blvd is a waste of money and should not be considered – it will be a road from nowhere to nowhere. Waste of money. (2 comments received)
- Resistance of County staff as to the type of use of Miller Blvd.
- No road is acceptable that borders the Divosta property – ½ mile east would be palatable.
- #3A & #3B - road too close to rear of VeronaWalk and infringing on wildlife. (3 comments received)
- #1 roadway is too close to our community and too close to 951. No need for two major highways to be so close.

IDEA GENERATION or SUGGESTION

- If a major road impacts my property (25 acres on Newman Drive), then the sending area overlay, NERPA, and conservation easements should be lifted from properties that are impacted so that the land we have left can be sub-divided and developed as a way of compensating us for what we are losing.
- If the road goes down Stable Way, we would need an underpass to access the Belle Mead horse trails, and then all the land west of the road should be zoned either commercial or for increased density such as 1 RDU per 1 ¼ acres.
- If there is to be so much increased housing development in the future south along US 41, the Miller Blvd/Everglades Blvd option (while also unacceptable) does seem to be a better idea for evacuation rather than bringing even more traffic up to the Collier Blvd area. (3 comments received)
- Miller is acceptable straight down from Smith Road.

**Document in Transportation Planning\Final Report\Appendices Interim Data 0809
Final\Appendix 5.doc**

3 of 7

- #3A & #3B go straight south at Lord's Way not jogging in and keep away from VeronaWalk's back yard.

- Move #3A & B further east of VeronaWalk.
- Logical location for future development of east Naples is off Tamiami Trail east or 41 east to #2 Miller Blvd. to 75.
- Continue #3A plan until it passes VeronaWalk then jog SW to join original #3A route or extend straight down instead of the jog west.

Comments/concerns with access on proposed roadway or adjacent property

AGREE

- None.

OPPOSED

- None.

IDEA GENERATION or SUGGESTION

- A vote approving any such roadway should be mandated by surrounding developments already planned or approved – not solely by political decisions for quick results. We don't have money to throw away so let's plan and accurately construct with confidence.

Other roadway or general comments
--

AGREE

- None.

OPPOSED

- None.

IDEA GENERATION or SUGGESTION

- Communities near 951 use Davis to Livingston which runs direct to Bonita Springs. Davis should be widened from Collier Blvd. to permit this flow better.

NEXT STEPS

It is the intent of the County and Consultant team to review these comments, and where necessary, incorporate those comments and alignment suggestions into the technical analysis, refinement of alternatives and evaluation process. Three alternatives, plus a No-Build Alternative, will be developed and presented at the next Public Workshop to be held on February 12, 2009.

An evaluation, or ranking, matrix will be created to analyze the alternatives, which is based upon the standard FDOT matrix and the one developed for the Vanderbilt Beach Road Corridor Study. Evaluation criteria include measures such as residential and business relocations and impacts, environmental impacts, travel demand, right-of-way, Panther habitat impacts, mitigation acreage and costs, among others. Public comments/concerns will also be considered during the evaluation when determining whether to advance or dismiss specific alignments/alternatives. Once the evaluation is complete, the County will recommend a preferred alternative.

During the final workshop in February, comments will be taken and reviewed again before a final alternative is recommended to the Board of County Commissioners at a Public Hearing in April 2009.

Subject: Wilson Boulevard Extension/Benfield Road Corridor Study
VeronaWalk - Community Meeting

Dear **VeronaWalk Resident:**

Collier County is currently performing a corridor study on the potential development of a new proposed north-south roadway facility east of Collier Boulevard (CR 951).

We would like to invite you to attend an important community meeting to review the potential alignments currently under study by the county. During this meeting, we will present to the residents of VeronaWalk an update of the study and the alignments under review. At the same time, we would like to gather your comments and/or concerns with regard to this future proposed roadway. Transportation Planning Department staff members will be on hand to answer any questions you may have with regard to this project. The meeting will take place on **Wednesday, December 3, 2008** at the following location:

VeronaWalk Ballroom
8020 Sorrento Lane, Suite 1
Naples

Meeting time: 6 - 7:30 p.m.

A FORMAL PRESENTATION WILL BEGIN AT 6 p.m. FOLLOWED BY A QUESTION AND ANSWER PERIOD.

The study area limits are approximately 20 miles in length and include Collier Boulevard (CR 951) to the west, 18th Street S.E./Miller Boulevard to the east, Golden Gate Boulevard to the north and US 41 to the south. (See draft proposed alignments map on back). The primary purpose of the study is to determine the existing and future transportation demands within this corridor and develop an alternative alignment, or possibly more than one, that is/are consistent with the county's Growth Management and Long Range Transportation Plans.

A new north-south roadway will also serve the evacuation needs of residents and significantly enhance overall safety, emergency access and traffic circulation.

If you have any questions or require additional information, please do not hesitate to call me at 239.252-5887 (direct line) or e-mail me at ClaudineAuclair@colliergov.net.

Sincerely,

Ms. Claudine Auclair
Project Manager

VIVA VERONA

Karaoke Dance!

On Friday, September 19th, VeronaWalk held it's first Karaoke Dance and a great time was had by all who attended! Our very own resident, Joe Fusco, led the music filled evening which included residents singing solo, duets, trios and in groups too numerous to count. There is some wonderful talent here at VeronaWalk! Many residents enjoyed the evening by participating in the singing, dancing or supporting their friends using tambourines and maracas, or clapping! This was the first, but certainly not the last Karaoke night for VeronaWalk!

"Turning Houses into Homes and Customers into Homeowners for Life."

Our dedicated lap pool users requested we post this again.

Lap Pool

General Use Guidelines

Many owners have told me that they purchased in VeronaWalk because they wanted to use the Lap Pool for exercise on a routine basis. And that is exactly what the Lap Pool was designed for. As a pool for exercise, the emphasis is on health which is why smoking is prohibited at the Lap Pool. Those who smoke in our community are welcome to frequent the resort pool where smoking is permitted.

Additionally, as this pool was designed for exercise, there are also age restrictions which mandate that children under the age of 12 must be accompanied by an adult. For those who want to play, hang out, cool off in the water, please take advantage of our resort pool because that's what it's there for. We encourage everyone who wants to swim laps to use the Lap Pool for that purpose. The Lap Pool is for swimming laps. Leisure and play swimming should always be conducted at the resort pool so that the Lap Pool is used exclusively for exercise. Compliance enhances harmony for everyone. Thank you.

Lynn A. Bordman

VeronaWalk Town Manager

Wilson Blvd. Project Community Meeting

Collier County is currently performing a corridor study (Wilson Boulevard Extension/ Benfield Road Corridor Study) on the potential development of a new proposed north-south roadway facility east of Collier Boulevard (CR 951).

We would like to invite you to attend a very important community meeting to review the potential alignments currently under study by the county. During this meeting, we would like to gather your comments or concerns with regard to this future proposed roadway. Transportation Planning Department staff members will be on hand to answer any questions you may have with regard to this project. The meeting will take place on Wednesday, December 3, 2008 at the following location:

VERONAWALK TOWN CENTER
8090 Sorrento Lane
Naples, FL 34113

Meeting time: 6 p.m. until 7:30 p.m.

Resident Bar Code Purchase

The following requirements and documentation will be needed to purchase a bar code: (\$5.00 payable by check or cash)

- VeronaWalk Owner, Valid Resident, Authorized Tenant ONLY. (Not for "Permanent" Guests)
- Current Driver's License
- Vehicle Registration
- Vehicle description and license plate number

New Car Purchase (provide one)

- Temporary Registration Slip
- Certificate of Title or application
- Bill of Sale

Rental Car

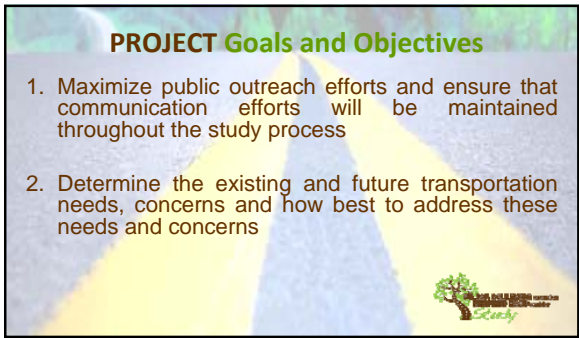

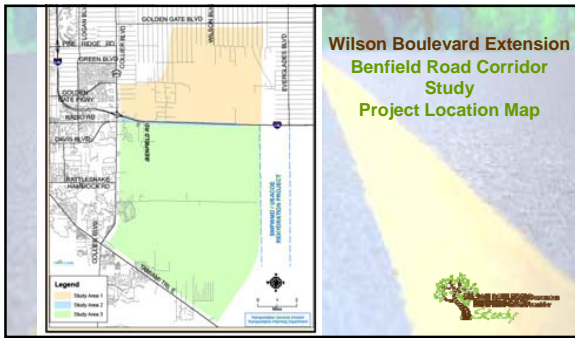

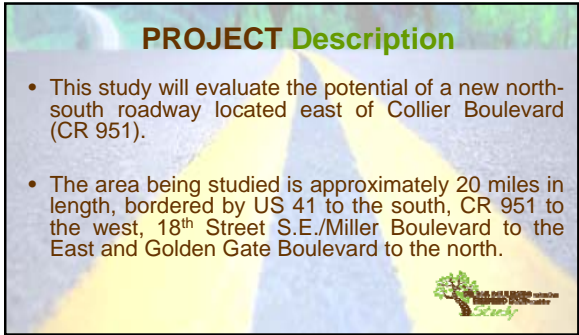

- Lease Agreement

Resident Bar Code Notification

If you do not have a Valid Bar Code corresponding to home ownership, or valid residency, are not an authorized tenant with a current lease on file with Southwest Property Mgmt., or do not have a lease renewal on file with the Town Manager's Office, your bar code will be turned off. Lease application packets are available in the Town Center or by contacting Raquel Viera at Southwest Property Mgmt. at 261-3440, ext. 12.

Weeds in Drive/Walkway Pavers/Debris Under Eaves/Garage

Article VIII – Use Restrictions Section 8.2 (F) states, "All weeds, rubbish, debris, or unsightly materials or objects of any kind shall be regularly removed from the Units, and shall not be allowed to accumulate thereon. All Units shall be kept in a clean and sanitary condition and no rubbish, refuse, or garbage shall be allowed to accumulate."

PROJECT Goals and Objectives

3. Describe natural, physical, environmental, social, economic and other constraints within the study area that could have negative effects on any proposed roadway alignments.
4. Develop and recommend alternative alignments that are consistent with the County's Growth Management and Long Range Transportation Plan.

2030 LRTP update adopted 1/12/2006

COLLIER COUNTY 2030 LRTP Needs Highway Network

PROJECT Goals and Objectives

5. Provide environmental, biological and historical information to serve as input for future county activities.
6. Promote safe traffic and bicycle and pedestrian movements.

PROJECT Purpose and Need

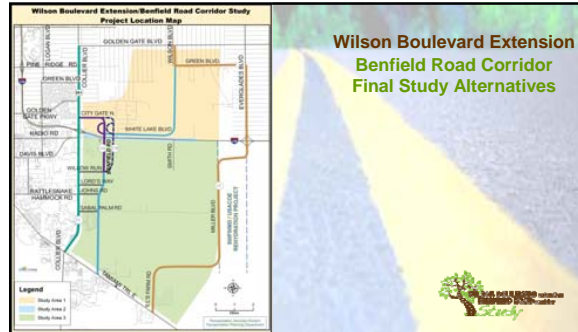

The purpose of the study is to determine how we can improve traffic congestion in the study area by developing a series of alternative routes that will accommodate transportation needs.

A new north-south roadway will also provide the following:

PROJECT Purpose and Need

1. Serve the evacuation needs of western Collier County residents and significantly enhance overall safety, emergency access and traffic circulation.
2. Provide a travel option that may alleviate traffic congestion on Collier Boulevard (CR 951) and Everglades Boulevard, two parallel facilities.

Options?

NO BUILD – What happens?

- Intersection failures along CR 951 (Collier Boulevard) at Davis Boulevard; Rattlesnake Hammock and US 41
- May require 8-laning Collier Boulevard which is inconsistent with Growth Management Plan
- Grade Separated overpass may be necessary at Rattlesnake Hammock Road

Options?

Option 2 – Miller Boulevard

- Miller Boulevard would provide a north/south connection for hurricane evacuation
- Portions of Miller Boulevard south of I-75 currently exists; however, this facility would need to be upgraded to meet current design standards

Options?

Option 3A and 3B – Benfield Road

- Both alternatives are very similar when analyzing the traffic volumes. Nevertheless, there are segments on CR951 that are still projected to operate below the expected Level of Service Standard.

U.S. FISH AND WILDLIFE COMMENT

Data provided by the environmental screening tool indicate that Public Conservation lands are abundant in the project study area south of Interstate 75. These lands are located in the Picayune Strand State Forest and provide valuable habitat for fish and wildlife including the endangered Florida panther (*Puma concolor coryi*).

To minimize the projects impacts to the public conservation lands, the roadway corridor should be located near the western boundary of the study area as close as possible to County Road 951.

Moreover, the corridor should be sited in urbanized and disturbed lands to the greatest extent practicable. Finally, the corridor should be designed to completely avoid public conservation within the Picayune Strand State Forest and any other public conservation lands in the study area.

U.S. FISH AND WILDLIFE COMMENT

Our analysis of the study area indicates that fewer impacts to fish or wildlife resources would result from a road project located near the western boundary of the Study Area, at or near CR-951.

The following recommendations are provided for determining a new roadway alignment within the study area: (1) The road corridor should be designed and sited to avoid public conservation lands in the Study Area including the Picayune Strand State Forest; (2) the road right-of-way should be located within urbanized and disturbed lands to the extent possible, and (3) FDOT or Collier County should purchase functional panther habitat to compensate for impacts to existing panther habitat. The extent, location, habitat type and quality of the target land acquisition area should be dictated by the results of the U.S. Fish and Wildlife Service's functional panther habitat assessment methodology.

Our challenges

Funding:

With the current status of the economy, we cannot determine when this project would be included in our Capital Improvement Plan

However, should we adopt a preferred alignment, we can work with potential developers in creating private/public partnership

Introduction

Collier County held a second Public Information Workshop for the Wilson Boulevard Extension/Benfield Road Corridor Study on the following date:

Thursday, February 12, 2009
Shepherd of the Glades Lutheran Church in Naples

The local public was notified of the workshop in advance in the following ways (refer to Appendix A for details):

- Mailing of Newsletter Issue No. 2 via USPS standard mail (mailed to Stakeholders)
- Mailing of Postcard Announcement via USPS standard mail (mailed to property owners and stakeholders)
- Newspaper advertisement in Naples News on February 1 and 8, 2009
- Media press release (plus reminder release)

The purpose of the workshop was to present the three proposed alternatives for review which provided another opportunity for comments before the study is completed this spring. The area being studied is approximately 20 miles in length, bordered by US 41 to the south, CR 951 to the west, 18th Street S.E./Miller Boulevard to the east and Golden Gate Boulevard to the north.

As participants arrived, they were asked to sign in and provided a handout packet (refer to Appendix B for handouts). Citizens were encouraged to complete a comment sheet that addressed special topics of interest, which are:

- What are your comments/concerns with the proposed alternatives or other issues?
 - #1 NO-BUILD
 - #2 MILLER BOULEVARD
 - #3A WILSON-BENFIELD
 - #3B WILSON-BENFIELD
- Which alternative do you prefer?
- General comments/concerns.

The format of the workshop provided citizens' an opportunity to learn about the project, how the study advanced three preferred advanced alternatives, understand the social, environmental and economic character of the area, ask questions and offer input to county staff and consultant team members. Maps, displays and other project information were available for viewing to provide participants a good understanding of the proposed alternatives and overall project.

Ms. Claudine Auclair, Collier County Principal Planner, Mr. Bob Rutledge, Consultant Team Project Manager, other county staff and consultant team members were available throughout the workshop to assist participants with questions and concerns.

A total of 117 people attended the workshop, according to the sign-in sheets. Additionally, a total of 79 comment sheets were completed at the meeting and/or received by mail or fax at the county along with 1 petition to reject #3A (81 signatures from the Panther's RV Resort located on Beck Boulevard), 17 emails, met with 1 citizen one-on-one, and 14 telephone calls received by the county.

A summary of all written comments is presented below (Comment Sheets and emails are available at the Transportation Planning Department office and will not be posted to the project Web site).

Summary of Comments

FEBRUARY 12, 2009 – SHEPHERD OF THE GLADES LUTHERAN CHURCH, NAPLES

Written Comments (Comment Sheets and emails are available at the Transportation Planning Department office and will not be posted to the project Web site):

What are your comments/concerns with the proposed alternatives or other issues?
--

#1 NO-BUILD

- This alternative is desired by the Division of Forestry.
- We do need the roads. (4 comments received)
- Would save most money. (2 comments received)
- More financially prudent, less intrusive, no incremental environmental impact. (8 comments received)
- This would cause considerable inconvenience to many and money could be used elsewhere.
- There must be another ingress/egress route from eastern GG Estates – no question about it.
- Then why the study? (2 comments received)
- Good enough for now. (2 comments received)
- Not a real option for long term.
- White Blvd. is becoming very congested and is only ingress/egress to west. We need new west/south roadway.
- This would not benefit me.
- Least impactful of all the alternatives.
- Strongly support No-Build south of I 75.

#2 MILLER BOULEVARD

- I support this alignment. (12 comments received)
- Places road through a multi-million \$ restoration project and has major impact on endangered species and an imperiled landscape. (2 comments received)
- Best alternative about 10 miles east of Collier Blvd. – ease congestion on Collier Blvd. (2 comments received)
- Would better serve the long-term needs as stated in the study goals – development of eastern Collier County. (3 comments received)
- Acceptable, if you have to build. (3 comments)
- Would like to see this alternative come to fruition. Have clients that would donate large quantities of right-of-way to help get it selected. Gains greater access for the agricultural industry.
- Golden Gate to Everglades to Miller.
- Not feasible south of I-75.
- Not good, this is conservation and no one would use it anyway. Too much impact on Everglades and too far east. (4 comments received)
- Put Miller through to 41 – save lives also Sable Palm access to hospital.
- No, goes through Picayune Strand.
- Can't believe you are pandering to Lipman developer interests and kills Everglades Blvd. residents – environmental nightmare. (4 comments received)

#2 MILLER BOULEVARD - *continued*

- I like this one – I am a truck driver and it would be a lot easier and safer to just go on Everglades to I-75 then getting Everglades to Randall to Immokalee then I-75. Easier for work, shopping and emergencies.
- Prefer Wilson to Everglades route.
- Poor temporary fix at best – tortuous route, too long and too many turns resulting in poor traffic flow.
- Good for emergency escape from Marco to Ave Maria town – better traffic conditions to go to work in town (currently takes me 50 minutes) and Golden Gate. (13 comments received)
- I live off Miller and this would be faster to get in/out of the estates and for emergencies too. It takes me 30 minutes now from estates to 951 and if they open Miller, it would take me 7 minutes.
- Impact bear and primary panther habitat – lead to increase in wildlife mortality on the roads. Mitigation requirements would be extremely cost prohibitive. Road would only serve the eastern reaches of Belle Meade and Golden Gate rather than relieve congestion on 951 while fragmenting significant areas of important habitat.
- Opposes Alternative 2 north and south of I 75.

#3A WILSON-BENFIELD

- Potentially major impacts on endangered species in Belle Meade and will have negative impacts on critical habitat. (7 comments received)
- This is the best route (S3A6). (9 comments received)
- Would destroy my neighborhood and my retirement home. (4 comments received)
- This would affect the park in every way – Panther’s Walk RV Resort. (7 comments received)
- Noise issue. (4 comments received)
- Kills Benfield residents.
- Potential for failure of both Collier and Benfield in area-wide disaster such as fire.
- Too many environmental issues south of I-75. Should reconsider 15th Ave. to Green Blvd. corridor.
- #3A takes up a good majority of our properties and puts a 4-lane road against the back of our residence.
- Petition received to reject Alternative Alignment #3A by residents from the Panther’s Walk RV Resort at 3050 Beck Boulevard (corner of LeBuff Road in Naples). (81 signed petition)
- More convenient to business areas and I 75.
- This would ruin the RV Park (my winter home); I have many good memories with my late husband and plan to return here as long as I have my health. I have no other place to go in the winter.

#3B WILSON-BENFIELD

- Potentially major impacts on endangered species in Belle Meade and will have negative impacts on critical habitat. (4 comments received)
- This would be my second choice - 3A5. (4 comments received)
- Less disastrous than #3A. (7 comments received)
- Workable but still have concerns about protected wildlife.
- Noise issue.

#3B WILSON-BENFIELD - *continued*

- Not a great proposal either since all the construction equipment would use Beck Blvd. which is a narrow road and already busy.
- G Gate Blvd. to Everglades then Benfield or Miller – no need to build bridge @ south end of Wilson.
- Beyond the county’s urban corridor.
- Best for current residents of Benfield.
- Minimal cost increase and least impact to homeowners on Benfield Road.
- Not good, cuts too many off from the park with horses.
- Potential for failure of both Collier and Benfield in area-wide disaster such as fire.
- Acceptable plan ONLY IF the pond and sufficient foliage on the far shore remained as a buffer and some sort of sound barrier provided (preserve park-like atmosphere and insulate the residents).
- Too many environmental issues south of I-75. Need to open roadway from 23rd St SW to White Lake Blvd.

Which alternative would you prefer? *

#1 NO-BUILD	√√√√√√√√√√
#2 MILLER BOULEVARD	√√√√√√√√√√√√√√√√√√√√√√√√
#3A WILSON-BENFIELD	√√√√√√√√√√
#3B WILSON-BENFIELD	√√√√√√
NONE	√√√√√√√

** This question may have been confusing in the way that it was worded, and therefore, may have created erroneous responses to those answering it. The number of checkmarks per alternative is not a statistically valid sample of those who are interested in or affected by the project. Rather, it represents only those who answered this question on their comment sheet. Of the 79 comments sheets received to date, only 61 answered this particular question.*

General comments/concerns.

- The GMP FLUE discussion of the road extends Wilson south and discusses an I-75 interchange there or taking the road westward to Landfill Road – not provisions to allow for incorporation into County's arterial network. Extending the road south below I-75 was not addressed in the FLU.
- I would like to point out another consideration I did not see mentioned. The DOF will have a difficult time doing controlled burns with proposed new roads especially Miller Blvd. Since most of the plant communities in this region are fire dependent this will make DOFs job of managing the Picayune Forest extremely difficult. If you move forward with one of the new roads I suggest you revisit the provisions of the North Belle Meade Overlay in the FLU and incorporate more of the environmental provisions in your planning and design. If you move forward with one of the western alignments I would suggest you move the road westward to align with the section lines at the quarry rather than going further south to make the bend.
- **Q:** How much property on either side of the chosen route will be needed for the roadway? How will this property be acquired? Is it essentially 'Eminent Domain'? How close to Panther's Walk is the 3A alt? From the view on the web it appears to overlap the property and most of the pond on the east side. Will Alt 3A necessitate acquisition of Panther's Walk property? Is the funding available for the Wilson/Benfield project? How far in the future would development begin? property be acquired? At what point in time would the environmental studies need to be revisited? Have the population growth and development studies been revisited to reflect the current economic situation? Has the cost effectiveness of each alt been revisited to reflect the current economic situation?
- Concerns about the 3A and 3B alts:
 - The traffic will still be routed to Collier at the same area of I-75 and Davis/Beck. The traffic wishing to go west toward downtown and the beaches would still channel through the Collier/Davis intersection which is already a major bottleneck. I don't see these alts as alleviating the traffic problems, but adding to the problems.
 - In these times of economic uncertainty and major growth uncertainty into the foreseeable future, any commitment of taxpayer money to pursue alts 2, 3A or 3B is imprudent and fiscally irresponsible.
 - If the project is determined to proceed, the No-Build alt #1 is the most fiscally responsible. Failing that, Alt 2 would at least make sense for future growth, whenever that may happen.
 - Alts 3A and 3B are 'band-aid' solutions because they are within 1.5 miles of Collier Blvd. and would both dump more traffic onto Collier.
- This project would disregard and diminish all the progress gained in the enhancements of large parcels of natural areas. Also, further contribute to habitat fragmentation, altered hydrologies, and very damaging impacts to numerous floral and faunal species located within these areas.
- Would like copy of final draft of the Alt 3B.
- We have some properties in Golden Gate.
- When would a noise pollution study happen? (3 comments received)
- When would the approved project get started?
- Both 3A & 3B are such short distances from Collier and both will connect to Collier just a short distance north. Neither will relieve congestion on Collier.
- Please do not destroy the Panther's Walk neighborhood. (2 comments received)
- None provide us with an escape route. Residents trying to sell might as well forget it! These are strictly selfish claims!
- Waste of taxpayers' money – yet, we know you people will do as you want anyway.
- Direct impact on community with traffic and noise – large amount of persons and their houses should be a deterrent in site selection.

General comments/concerns. *continued*

- Since 951 is being made into a 6-lane road already at the lower part and from Beck up nothing would change since the new road would be coming onto 951 just north of 75.
- There is wildlife in this area and it took 2 years before we saw it after the hurricane of 2005. New roads would wipe it out again.
- Miller Blvd. looks perfect – a quick option to get from 41 to 75. Will help fire and hurricane routes/congestion on getting out of town. Why dump more on Collier?
- If Lord’s Way were extended to Benfield, then Naples Lakes residents could exit from our front gate and go straight across to Lord’s Way or turn north/south onto 951 – assuming a traffic light was installed. Since the expansion to 6 lanes, we currently can only turn south on 951.
- Thanks for keeping us informed – appreciate your efforts.
- Since GG Blvd. E is already slated to be 4-lane to Desota Blvd., a connection to I-75 via Everglades Blvd then to Miller or Benfield to US 41. The utilization of GG Blvd. to Everglades then south seems as obviously the simplest, least expensive, most logical, most efficient route. Suspicion aroused as to why Wilson Blvd. was ever considered. What entity will see the \$ in choosing Wilson instead of Everglades?
- Marginally a combination of 3A & #2 (Wilson extension connection segment to #3 in NGGE).
- Want to alleviate the bottleneck of residential traffic congestion from GG Estates area to 951 via White Blvd. The proposed Green St extension into GGE would help solve this problem.
- More cost effective would be to use GG Blvd east from Wilson then south on Everglades Blvd. and provide an interchange to I-75. The other alternatives listed could be made later. Divert east of Golden Gate.
- Expedite the building! (2 comments received)
- Willing to work with you regarding #3A only if: density must be changed for my property and a more fair alignment taking less from me and more from neighbor; should run down the current already cleared area; offer at good price since you will impact 10 acres.
- Related to #3A, no road (east-west) be built north of Lord’s Way and that Lord’s Way/Collier Blvd. (951) intersection has a traffic light.
- Want to see a study on Golden Gate Blvd. to be extended from Wilson Blvd. to Everglades Blvd. to 4-lanes. At present, it is one way in and one way out – in a catastrophe, residents will not be able to get out on time. Also like to see a road from Everglades Blvd. and a road that will run adjacent to I-75 by the canal to State Road 951.
- Miller Road provides separation from Collier and connectivity to east. The natural/environmental disturbance appears to be generally equivalent. Failing Miller Road, need to retain the Six L’s to Wilson connection (SIA1) as development expands into this area.
- Related to #3A & #3B, we live at 840 Wilson Blvd. S. and family who lives in the house next door and the double red line goes right through both of our homes. We understand the situation but just want to be aware of what is happening - we probably won’t seal our driveway pavement if we won’t be living there next year.
- Should first improve White Blvd., then reconsider 16th Ave-Green Blvd. corridor, and finally open roadway south from 23rd St SW to White Lake Blvd. This is far more prudent, simple, and needed than other options.
- How can the county spend over \$300 million on this project now or ever. That cost does not even incorporate mitigation associated with T&E species, etc. I think the county and commissioners should strongly consider the NO BUILD option.
- Environmental damage and associated costs with alternatives 2, 3A and 3B are too high to be justified while the No-Build alternative is a viable option.

General comments/concerns. *continued*

- How much will it reduce the amount of traffic on CR 951 if this by-pass is built (by-pass from Hwy 41 to I-75). If 3A is chosen, it will destroy the wildlife and option 3B would be somewhat better but still have a negative impact on the local wildlife. Going further east for this new by-pass would be the least disturbance for resident peace and quiet and for the displacement of local wildlife.
- Related to Miller Blvd. option, need to asphalt streets (numbers 48, 50, 62) – good for the residents because the dust is killing us and too many holes.
- Any route besides #1 No-Build impacts our already in decline panthers, bears - it's a state forest and leave it that way. Picayune is also (Belle Meade) the only access for equestrian recreation.
- One family owns property along Benfield Road and recommends taking alternative #3B and actually moving it in the middle of the properties and not on the back line. This would cost more money in acquisition.
- #3A and #3B is same as #1.
- Money saving – Miller already there and will relieve traffic congestion for Golden Gate, Ave Maria, Marco Island plus evacuation route is better with access to I-75 & Tamiami Trail. Environmental concerns are minimal since the road has been there for 30 years.
- #2 Miller Blvd. alternative (stretch between Miller to Everglades) – please make this commercial area since I travel long destinations to find food and other things.
- Regarding #3A and #3B - constructing the roadway across the property which is **west** of, and adjacent to, the landfill (one half sections) would be prohibitively excessive cost, both financially and environmentally. The total of the land acquisition costs for such alignments, including damages, together with the environmental mediation costs of those alignments, would be significantly greater than the costs of more sensible and cost effective alternatives. The cost in both dollar terms and environmental destruction has not been thoroughly and prudently analyzed.
- Potential Dispute with this project because it is contrary to existing plans, programs and initiatives of a large number of state and federal agencies, including DOF.
 - Picayune Strand State Forest (PSSF) consisting of both the Belle Meade and Southern Golden Gate Estates tracts is highly important state-owned conservation and recreation land that is managed as a State Forest in the public interest.
 - Recommend complete avoidance of this tract and the provision of as much buffer as possible between the footprint of any proposed highway and the State Forest.
 - DOF does not support alternatives 2, 3A or 3B. Will have major negative impacts to federal and state listed threatened, endangered and sensitive species, outstanding natural landscapes, imperiled habitats, and have further deleterious impacts to the hydrology associated with both Belle Meade and Southern Golden Gate Estates. Could substantially unravel an extensive exotic vegetation eradication program that has been quite successful on PSSF.

General comments/concerns. *continued*

- Comments on Effects to resources from the DOF apply to Alternatives 2, 3A and 3B – direct effects to PSSF of these alternatives include: (2 comments received)
 - Fragmentation of natural communities, wildlife habitat and recreation areas, and the creation of additional edge effects.
 - Creation of barriers to management, especially access and ability to conduct prescribed burning.
 - Creation of an additional smoke sensitive area that will hamper and restrict prescribed burning.
 - Impacts to listed species by creating barriers to movement and increasing road kills. (We note, in particular, that these three alternatives traverse through the main red-cockaded woodpecker habitats on the forest and through areas that are important for Florida panther movement. These Alternatives will decrease the amount of habitat available for these species.)
 - Creation of new vector channels for invasive exotic species and diseases. (Again, we note that these alternatives traverse areas that are already being extensively treated for exotic plants.)
 - Impacts to recreation by bisecting trails and creating noise and visual pollution.
 - Increased transportation-related pollution, e.g., runoff and litter.
 - Potential alternation of hydrology in the wetlands that drain into (or out of) the state forest.
- The potential alignment for an east-west road (#3A & 3B) between Benfield and Collier will bisect the Willow Run Quarry property. There is a conservation easement on the Willow Run Quarry Preserve that is held by FDEP as well as Collier County. I am opposed to having a 4-lane road bisect this preserve – this preserve is a tortoise management area with over 60 tortoises and may be the future site for red-cockaded woodpecker groups. Currently, we are required to prescribe controlled burns for the benefit of panthers and other wildlife – this alternative will restrict this ability.
- None of #1, #3A or #3B would be good for evacuation for south east Collier County. #2 would intersect I 75 further east and smooth the traffic flow getting on I 75.

NEXT STEPS

It is the intent of the County and Consultant Team to review all comments, and where necessary, incorporate those comments and alignment preference suggestions into the preferred alternative evaluation process. The Project Team is compiling all public comments, both from Public Workshops, and meetings held with Community Associations, and will be calculating the final impacts. The remaining four (4) Alternatives presented at the Public Workshop #2 will then be reevaluated by the Consultant Team and County staff to determine the Preferred Alternative that will be presented to the Board of County Commissioners.

SCHEDULE Of Events

A simple project schedule of the major milestones is provided below:

Task	Date
Identify Preferred Alternatives	December 2008
Newsletter #2	January 2009
Public Workshop #2: Church information : Shepherd of the Glades Lutheran Church 6020 Rattlesnake Hammock Road, Naples	February 12, 2009 5 – 7 p.m.
Additional Evaluation of Alternatives	February/March 2009
Public Hearing: Present study findings and selection of the Preferred Alternative to Board of County Commissioners.	April 28, 2009 (tentative)

WILSON BOULEVARD extension BENFIELD ROAD corridor *Study*

Issue No. 2

January 2009

Here's What You Told Us

Since the project's inception in 2007, the Collier County staff and Project Team have talked to a number of people, agencies, neighborhood groups and environmental organizations about the project to obtain comments and get an idea about some of the major areas of interest. As a result of this outreach, we received over 100 written comments, e-mails, telephone calls, and many verbal comments about the project.

The comments received varied, with some providing suggestions or ideas for improving other roads in the area, rather than building a new north-south road. While many of you see a need for a new roadway to relieve congestion in the area and provide a connection with Collier Boulevard (CR 951), US 41 and I-75, there is a mix of opinions from residents regarding "how" the county should make these improvements/connections. Several comments we heard included concerns about:

- **Impacts to wildlife habitat** and other environmental effects;
- **Costs to taxpayers;**
- **Impacts to homes and property;**
- **Impacts to horse stables** and the enjoyment of riding horses located in areas along/near Benfield Road; and
- **Concerns about building new roads** versus improving existing roads and providing better connections, both north-south and east-west.

All of the comments we heard to date have been documented and are available for your review.*

PROJECT Description

Collier County is undergoing a study of a new north-south roadway located east of Collier Boulevard (CR 951). The area being studied is approximately 20 miles in length, bordered by Collier Boulevard to the west, Everglades Boulevard to the east, Golden Gate Boulevard to the north and US 41 to the south (see map inside).

Here's Who We've Talked To

- Participants at the public workshop on March 26 at St. Agnes Church
- Participants at the Benfield Road Community Meeting on September 20
- Participants at the VeronaWalk Community Meeting on December 3
- Conservancy of Southwest Florida
- Florida Wildlife Federation
- Florida Fish and Wildlife Conservation Commission
- U.S. Fish and Wildlife Service
- Several individual homeowners
- Defenders of Wildlife
- Audubon Society

Here's What We've Been Doing Since We Last Met

Collier County and the Project Team have been very busy working on the project since the last issue of the newsletter dated March 2008. Take a look at what we've been up to:

- **Conducted "grass roots" outreach**, as discussed in this newsletter;
- **Met with local area stakeholders** to talk about specific alignments and/or locations of the proposed road;
- **Continued to evaluate alternatives** (see page 2 for more details);
- **Conducted traffic model runs** for potential alignments;
- **Based on the alignments** and after reviewing comments from the workshop, continued reviewing alternatives, which are a combination of alignments;
- **Held several meetings** to review and discuss the alternatives;
- **Conducted additional technical analysis** to determine which alignments met the needs for the project (those that did not were NOT carried forward); and
- **Summarized all comments to date**, which were submitted to and reviewed by the county and the county's consultants during their evaluations and technical analysis.

ALTERNATIVES Proposed For Further Analysis

The Project Team began developing alternative alignments after the first public workshop in March 2008. "Alignments" are actually segments of an alternative, and are broken down this way so that detailed evaluations can be conducted. The alignments are then combined to create an alternative.

The alignments were developed based on comments received, consistency with the 2030 Long Range Transportation Plan (LRTP), traffic, engineering and environmental analysis and subsequent discussions with Collier County staff and area stakeholders. The effects that the alignments had on the local road system, residents, environment and other elements were evaluated to identify those that best met the purpose and need of the project, while minimizing negative impacts. Consideration of input provided by the public was also included in the evaluation.

At this time, three alternatives are being carried forward for additional comment and additional analyses, including the No-Build Alternative, Miller Boulevard Alternative, and the Wilson-Benfield Alternative (this alternative also includes a variation). These three alternatives are shown and described on the map to the right.

ALTERNATIVES

#1 No-Build Alternative - this alternative does not include any improvements within the study area other than those addressed in the Long Range Transportation Plan. If a no-build option is chosen, it would require additional improvements to CR 951.

#2 Miller Boulevard Alternative - this alternative includes improvements to Wilson Boulevard and the extension of Green Boulevard between Wilson Boulevard and Everglades Boulevard. Everglades Boulevard would be improved to four lanes to the Interstate 75 interchange (I-75). The Miller Boulevard alternative would shift westward from the Everglades Boulevard alignment to the existing

Miller Boulevard alignment and proceed south to approximately 102nd Avenue then turn westward toward Six L's Farm Road and then proceed south to intersect with US 41/Tamiami Trail.

#3A Wilson-Benfield Alternative - this alternative extends to Smith Road then turns westward along White Lake Boulevard to a position west of Benfield Road. A cross over I-75 and a northern link to Collier Boulevard (CR 951) is proposed. Upon crossing over I-75, this alignment proceeds southward connecting to several minor roadways (Lord's Way, Rattlesnake Hammock Road Extension, Sabal Palm Road). This alignment will then intersect US 41/Tamiami Trail south of Manatee Road.

#3B Wilson-Benfield Alternative - this alternative extends to Smith Road then turns westward along White Lake Boulevard to a position east of Benfield Road. A cross over I-75 and a northern link to Collier Boulevard (CR 951) is proposed. Upon crossing over I-75, this alignment proceeds southward connecting to several minor roadways (Lord's Way, Rattlesnake Hammock Road Extension, Sabal Palm Road). This alignment will then intersect US 41/Tamiami Trail south of Manatee Road.

Note: Once a corridor has been selected, the final location will not be determined until the design phase.

EVALUATION Of Alternatives Process

During the development of alternative alignments, criteria was developed to evaluate each alignment and either advance or dismiss it from further consideration. These criteria were based on our Project Team's experience, Project Development and Environment Study (PD&E), and general acceptance guidelines and familiarity with the area. Below is the list of criteria that were used to evaluate each alignment:

- Environmental Factors
 - Wetlands
 - Floodplains
 - Threatened and Endangered Species (red cockaded woodpecker, panthers, bears)
 - Contaminated Sites
- Right-of-Way (R-O-W) Effects and Costs
- Residential and Commercial Impacts
- Traffic Analysis
- Construction Costs
- Public Comments

The evaluation helped to advance specific alternative alignments as well as "screen out" those that did not meet the established need for the proposed north-south road or are not viable due to other factors.

For those alternative alignments that are being carried forward for additional comment and detailed analysis, a description of "why" is provided to the right. A detailed memorandum of all alternative alignments and the decision/reasons to either advance or omit them from consideration will be available for your review, as well as the evaluation matrix for each alternative alignment, including the No-Build Alternative.*

* The detailed information referenced in this newsletter is available for review by either contacting Collier County Principal Planner, Ms. Claudine Auclair, (see back page for contact information) or on the project Web site at www.colliergov.net.

Alternative Alignments Carried Forward After Initial Analysis/Screening

#1 No-Build	<ul style="list-style-type: none"> • Must be carried forward throughout the project
#2 Miller Boulevard	<ul style="list-style-type: none"> • Would provide improvements to the existing road • Access to existing parcels should be considered • Would enhance Everglades Boulevard Interchange Justification Report network • From those comments received or heard to date, this alternative is less intrusive with minimal impacts to neighborhoods, but has the highest environmental concerns
#3 Wilson-Benfield	<ul style="list-style-type: none"> • Would provide access to planned developments • Consistent with 2030 Long Range Transportation Plan • North of I-75, would have fewer impacts to residences and environment than other alternatives considered

The alternatives described above meet the needs of the project and will be carried forward for more detailed analysis and consideration.

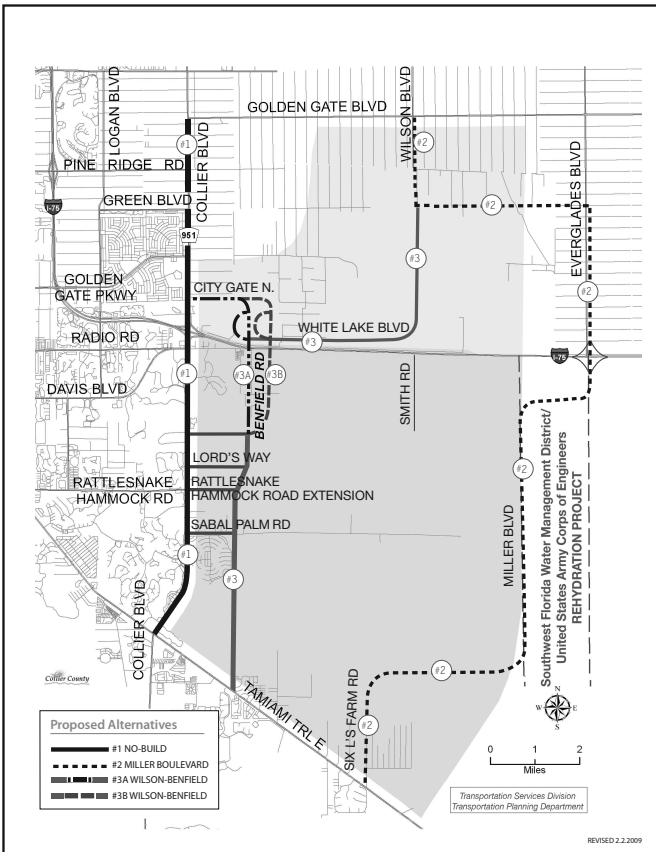

PUBLIC WORKSHOP

WILSON BOULEVARD EXTENSION / BENFIELD ROAD CORRIDOR STUDY

FEB. 12, 2009 5 - 7 P.M.

**Shepherd of the Glades Lutheran Church
6020 Rattlesnake Hammock Road, Naples**

- The Collier County Transportation Services Division is presenting an informational workshop in an open house format for the Wilson Boulevard Extension/Benfield Road Corridor Study. During this meeting, Collier County will present three proposed alternatives for your review and comments.
- The approximate 20-mile corridor study limits are US 41 to the south, Collier Boulevard to the west, 18th Street S.E./Miller Boulevard to the east, and Golden Gate Boulevard to the north.
- Although several alternatives were developed, only three are being advanced through the project (as shown on the map below). Alternatives were developed based on comments received, consistency with the 2030 Long Range Transportation Plan (LRTP), traffic, engineering and environmental analysis and subsequent discussions with Collier County staff and area stakeholders.
- Residents, business owners and other interested persons are welcome to stop in any time between 5-7 p.m. to review the proposed alternatives and ask questions of the study representatives. Members of the Board of County Commissioners may be in attendance at this public information meeting.
- If you are a person with a disability who needs any accommodation to participate in this workshop, you are entitled, at no cost to you, to the provision of certain assistance. Please contact the Collier County Facilities Management Department located at 3301 East Tamiami Trail, Naples, FL 34112, (239) 252-8380 at least two (2) days prior to the meeting. Assisted listening devices for the hearing impaired are available in the Collier County Commissioners' Office.

FOR IMMEDIATE RELEASE

Wilson Boulevard Extension/Benfield Road Corridor Study Second Public Workshop Planned To Present Three Alternatives

The Collier County Transportation Planning Department will hold a public workshop to discuss the three proposed alternatives for the Wilson Boulevard Extension/Benfield Road Corridor Study.

Date: Feb. 12, 2009
Time: 5 - 7 p.m.
Place: Shepherd of the Glades Lutheran Church
6020 Rattlesnake Hammock Road
Naples

This study is looking at potential ways to improve north-south travel within the study area. The 20-mile wide study area limits include US 41 to the south, CR 951 to the west, 18th Street S.E./Miller Boulevard to the east and Golden Gate Boulevard to the north. The goal of this corridor study is to identify a new north-south road to help improve traffic congestion on Collier Boulevard (CR 951), while being sensitive to environmental issues and public concerns.

A new north-south roadway is needed to create a better traffic circulation, allow for an alternate connection to Collier Boulevard (CR 951) and I-75 from US 41, improve access to US 41 and I-75 and accommodate countywide population and employment growth. In addition, the potential new roadway will serve the evacuation needs of eastern Collier County residents, enhance overall safety, and allow for better emergency access.

During the development of alternatives, three alignments were identified (as shown on the map on the next page) to advance through the project. These alignments were developed based on comments received, consistency with the 2030 Long Range Transportation Plan (LRTP), traffic, engineering and environmental analysis as well as subsequent discussions between Collier County staff and area stakeholders. The three alternatives are:

- #1 - No-Build Alternative
- #2 - Miller Boulevard Alternative
- #3A - Wilson-Benfield Alternative/#3B - Wilson-Benfield Alternative

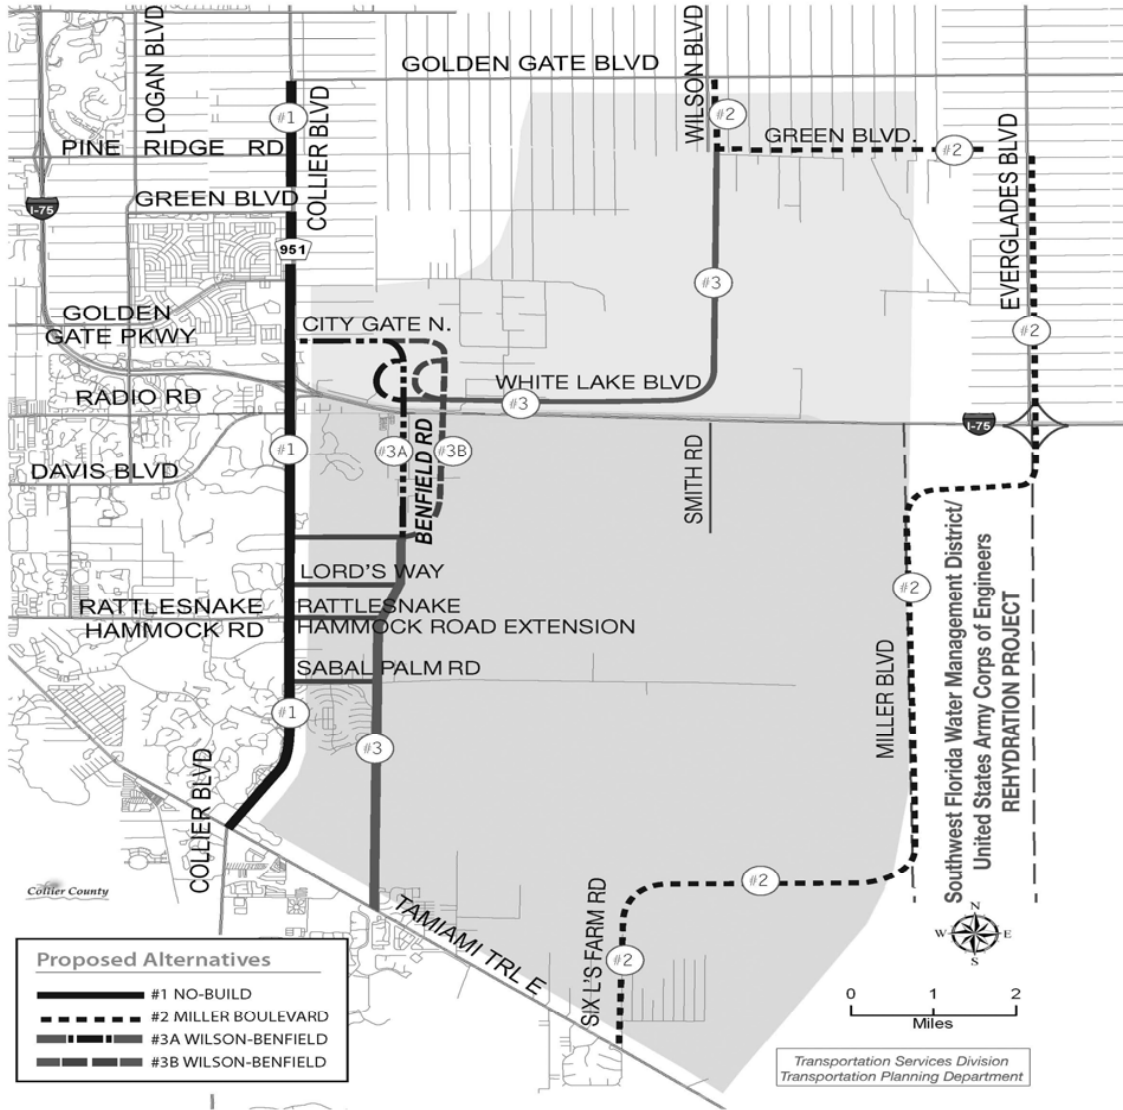

The purpose of the workshop is to present the three proposed alternatives for your review and comments, providing another opportunity for comments before the study is completed this spring. Maps and exhibit boards showing these proposed alternatives will be available at the workshop for your review.

-more-

County staff and the consultant team members will be at the workshop to discuss the proposed alternatives and answer any questions. We encourage you to attend and welcome you to invite your neighbors. As always, your input is valuable and a critical component to the success of this project.

Members of the Board of County Commissioners may be in attendance at this informational workshop.

If you are a person with a disability who needs any accommodation to participate in this proceeding, you are entitled, at no cost to you, to the provision of certain assistance. Please contact the Collier County Facilities Management Department located at 3301 East Tamiami Trail, Naples, Florida, 34112, 239-252-8380 at least two days prior to the meeting.

[News Media: If you have any questions, please contact Community Liaison Connie Deane at 239-252-8365 or Public Information Specialist Eileen O’Grady at 239-252-5801.]

FOR IMMEDIATE RELEASE

Wilson Boulevard Extension/Benfield Road Corridor Study Second Public Workshop Planned To Present Three Alternatives Reminder

The Collier County Transportation Planning Department will hold a public workshop to discuss the three proposed alternatives for the Wilson Boulevard Extension/Benfield Road Corridor Study.

Date: Feb. 12, 2009
Time: 5 - 7 p.m.
Place: Shepherd of the Glades Lutheran Church
6020 Rattlesnake Hammock Road
Naples

This study is looking at potential ways to improve north-south travel within the study area. The 20-mile wide study area limits include US 41 to the south, CR 951 to the west, 18th Street S.E./Miller Boulevard to the east and Golden Gate Boulevard to the north. The goal of this corridor study is to identify a new north-south road to help improve traffic congestion on Collier Boulevard (CR 951), while being sensitive to environmental issues and public concerns.

A new north-south roadway is needed to create a better traffic circulation, allow for an alternate connection to Collier Boulevard (CR 951) and I-75 from US 41, improve access to US 41 and I-75 and accommodate countywide population and employment growth. In addition, the potential new roadway will serve the evacuation needs of eastern Collier County residents, enhance overall safety, and allow for better emergency access.

During the development of alternatives, three alignments were identified (as shown on the map on the next page) to advance through the project. These alignments were developed based on comments received, consistency with the 2030 Long Range Transportation Plan (LRTP), traffic, engineering and environmental analysis as well as subsequent discussions between Collier County staff and area stakeholders. The three alternatives are:

- #1 - No-Build Alternative
- #2 - Miller Boulevard Alternative
- #3A - Wilson-Benfield Alternative/#3B - Wilson-Benfield Alternative

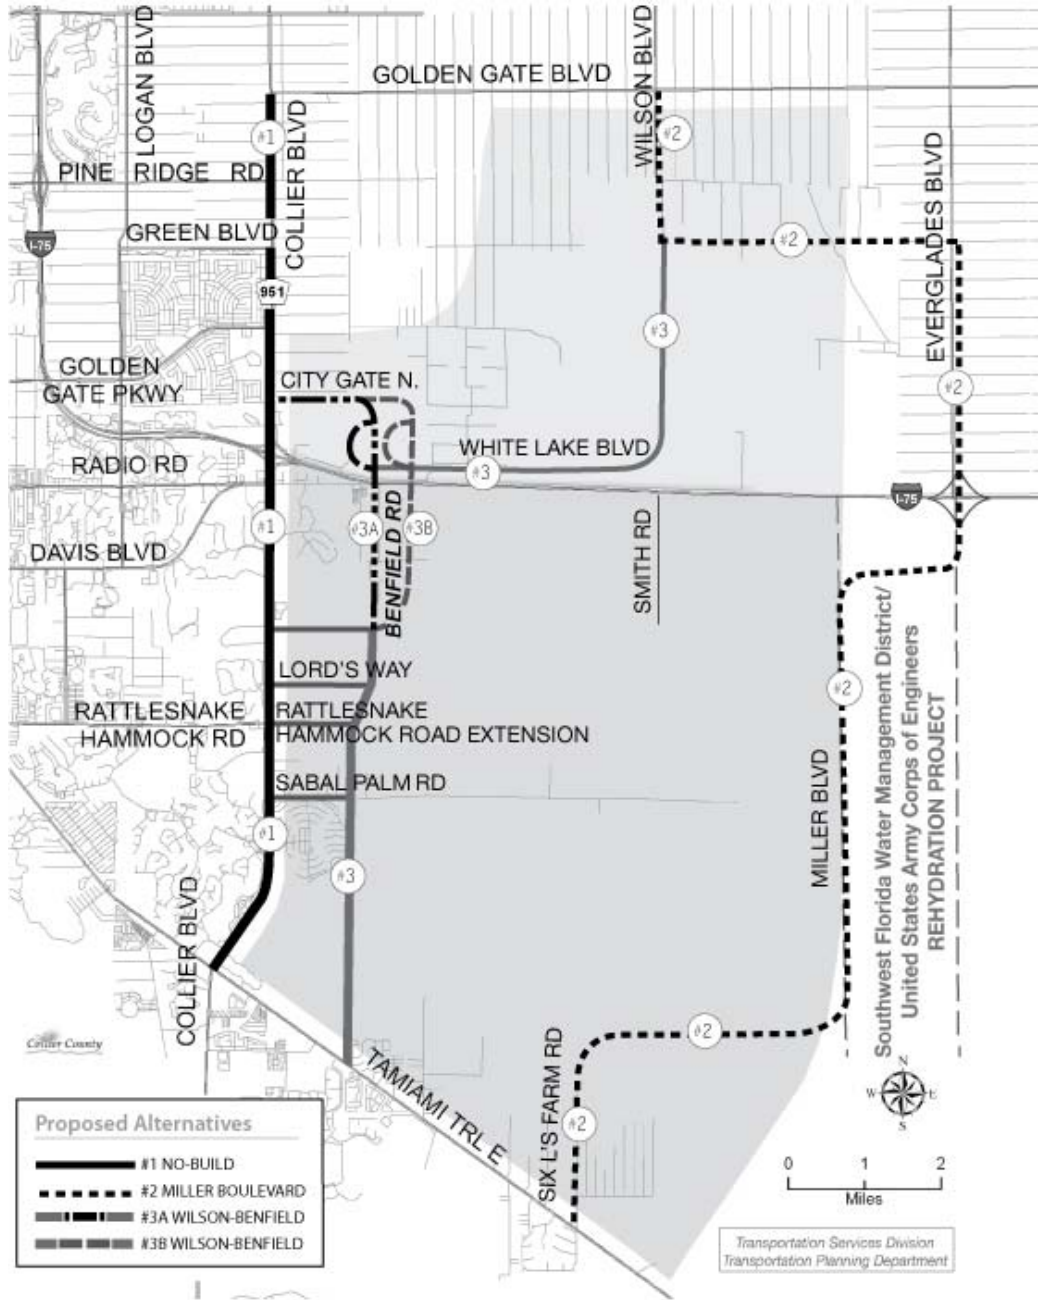

The purpose of the workshop is to present the three proposed alternatives for your review and comments, providing another opportunity for comments before the study is completed this spring. Maps and exhibit boards showing these proposed alternatives will be available at the workshop for your review.

Public Workshop Notice

**Wilson Boulevard Extension/Benfield Road Corridor Study
Shepherd of the Glades Lutheran Church
6020 Rattlesnake Hammock Road (at Polly Ave.), Naples
Feb. 12, 2009 5 - 7 p.m.**

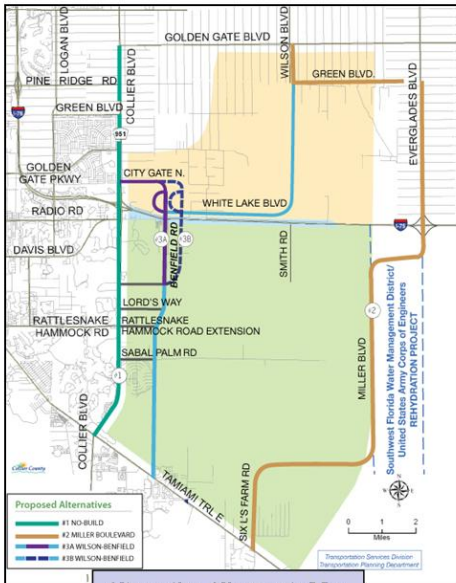

Please join us on February 12 to review the three proposed alternative alignments for this Corridor Study.

County staff will be available to assist participants and answer questions.

This will be the final public workshop for the project, so we encourage your attendance. The alternative alignments that were developed and advanced through the project will be presented. You will also have the opportunity to make comments. The final recommended alignment will be presented to the Board of County Commissioners this spring (*see map of alignments on back*).

For more information, please contact Ms. Claudine Auclair, principal planner, at 239.252.8192 or claudineauclair@colliergov.net

SCHEDULE Of Events

A simple project schedule of the major milestones is provided below:

Task	Date
Identify Preferred Alternatives	December 2008
Newsletter #2	January 2009
Public Workshop #2: Church information : Shepherd of the Glades Lutheran Church 6020 Rattlesnake Hammock Road, Naples	February 12, 2009 5 – 7 p.m.
Additional Evaluation of Alternatives	February/March 2009
Public Hearing: Present study findings and selection of the Preferred Alternative to Board of County Commissioners.	April 28, 2009 (tentative)

WILSON BOULEVARD extension BENFIELD ROAD corridor *Study*

Issue No. 2

January 2009

Here's What You Told Us

Since the project's inception in 2007, the Collier County staff and Project Team have talked to a number of people, agencies, neighborhood groups and environmental organizations about the project to obtain comments and get an idea about some of the major areas of interest. As a result of this outreach, we received over 100 written comments, e-mails, telephone calls, and many verbal comments about the project.

The comments received varied, with some providing suggestions or ideas for improving other roads in the area, rather than building a new north-south road. While many of you see a need for a new roadway to relieve congestion in the area and provide a connection with Collier Boulevard (CR 951), US 41 and I-75, there is a mix of opinions from residents regarding "how" the county should make these improvements/connections. Several comments we heard included concerns about:

- **Impacts to wildlife habitat** and other environmental effects;
- **Costs to taxpayers;**
- **Impacts to homes and property;**
- **Impacts to horse stables** and the enjoyment of riding horses located in areas along/near Benfield Road; and
- **Concerns about building new roads** versus improving existing roads and providing better connections, both north-south and east-west.

All of the comments we heard to date have been documented and are available for your review.*

PROJECT Description

Collier County is undergoing a study of a new north-south roadway located east of Collier Boulevard (CR 951). The area being studied is approximately 20 miles in length, bordered by Collier Boulevard to the west, Everglades Boulevard to the east, Golden Gate Boulevard to the north and US 41 to the south (see map inside).

Here's Who We've Talked To

- Participants at the public workshop on March 26 at St. Agnes Church
- Participants at the Benfield Road Community Meeting on September 20
- Participants at the VeronaWalk Community Meeting on December 3
- Conservancy of Southwest Florida
- Florida Wildlife Federation
- Florida Fish and Wildlife Conservation Commission
- U.S. Fish and Wildlife Service
- Several individual homeowners
- Defenders of Wildlife
- Audubon Society

Here's What We've Been Doing Since We Last Met

Collier County and the Project Team have been very busy working on the project since the last issue of the newsletter dated March 2008. Take a look at what we've been up to:

- **Conducted "grass roots" outreach**, as discussed in this newsletter;
- **Met with local area stakeholders** to talk about specific alignments and/or locations of the proposed road;
- **Continued to evaluate alternatives** (see page 2 for more details);
- **Conducted traffic model runs** for potential alignments;
- **Based on the alignments** and after reviewing comments from the workshop, continued reviewing alternatives, which are a combination of alignments;
- **Held several meetings** to review and discuss the alternatives;
- **Conducted additional technical analysis** to determine which alignments met the needs for the project (those that did not were NOT carried forward); and
- **Summarized all comments to date**, which were submitted to and reviewed by the county and the county's consultants during their evaluations and technical analysis.

ALTERNATIVES Proposed For Further Analysis

The Project Team began developing alternative alignments after the first public workshop in March 2008. "Alignments" are actually segments of an alternative, and are broken down this way so that detailed evaluations can be conducted. The alignments are then combined to create an alternative.

The alignments were developed based on comments received, consistency with the 2030 Long Range Transportation Plan (LRTP), traffic, engineering and environmental analysis and subsequent discussions with Collier County staff and area stakeholders. The effects that the alignments had on the local road system, residents, environment and other elements were evaluated to identify those that best met the purpose and need of the project, while minimizing negative impacts. Consideration of input provided by the public was also included in the evaluation.

At this time, three alternatives are being carried forward for additional comment and additional analyses, including the No-Build Alternative, Miller Boulevard Alternative, and the Wilson-Benfield Alternative (this alternative also includes a variation). These three alternatives are shown and described on the map to the right.

ALTERNATIVES

#1 No-Build Alternative - this alternative does not include any improvements within the study area other than those addressed in the Long Range Transportation Plan. If a no-build option is chosen, it would require additional improvements to CR 951.

#2 Miller Boulevard Alternative - this alternative includes improvements to Wilson Boulevard and the extension of Green Boulevard between Wilson Boulevard and Everglades Boulevard. Everglades Boulevard would be improved to four lanes to the Interstate 75 interchange (I-75). The Miller Boulevard alternative would shift westward from the Everglades Boulevard alignment to the existing

Miller Boulevard alignment and proceed south to approximately 102nd Avenue then turn westward toward Six L's Farm Road and then proceed south to intersect with US 41/Tamiami Trail.

#3A Wilson-Benfield Alternative - this alternative extends to Smith Road then turns westward along White Lake Boulevard to a position west of Benfield Road. A cross over I-75 and a northern link to Collier Boulevard (CR 951) is proposed. Upon crossing over I-75, this alignment proceeds southward connecting to several minor roadways (Lord's Way, Rattlesnake Hammock Road Extension, Sabal Palm Road). This alignment will then intersect US 41/Tamiami Trail south of Manatee Road.

#3B Wilson-Benfield Alternative - this alternative extends to Smith Road then turns westward along White Lake Boulevard to a position east of Benfield Road. A cross over I-75 and a northern link to Collier Boulevard (CR 951) is proposed. Upon crossing over I-75, this alignment proceeds southward connecting to several minor roadways (Lord's Way, Rattlesnake Hammock Road Extension, Sabal Palm Road). This alignment will then intersect US 41/Tamiami Trail south of Manatee Road.

Note: Once a corridor has been selected, the final location will not be determined until the design phase.

EVALUATION Of Alternatives Process

During the development of alternative alignments, criteria was developed to evaluate each alignment and either advance or dismiss it from further consideration. These criteria were based on our Project Team's experience, Project Development and Environment Study (PD&E), and general acceptance guidelines and familiarity with the area. Below is the list of criteria that were used to evaluate each alignment:

- Environmental Factors
 - Wetlands
 - Floodplains
 - Threatened and Endangered Species (red cockaded woodpecker, panthers, bears)
 - Contaminated Sites
- Right-of-Way (R-O-W) Effects and Costs
- Residential and Commercial Impacts
- Traffic Analysis
- Construction Costs
- Public Comments

The evaluation helped to advance specific alternative alignments as well as "screen out" those that did not meet the established need for the proposed north-south road or are not viable due to other factors.

For those alternative alignments that are being carried forward for additional comment and detailed analysis, a description of "why" is provided to the right. A detailed memorandum of all alternative alignments and the decision/reasons to either advance or omit them from consideration will be available for your review, as well as the evaluation matrix for each alternative alignment, including the No-Build Alternative.*

* The detailed information referenced in this newsletter is available for review by either contacting Collier County Principal Planner, Ms. Claudine Auclair, (see back page for contact information) or on the project Web site at www.colliergov.net.

Alternative Alignments Carried Forward After Initial Analysis/Screening

#1 No-Build	<ul style="list-style-type: none"> • Must be carried forward throughout the project
#2 Miller Boulevard	<ul style="list-style-type: none"> • Would provide improvements to the existing road • Access to existing parcels should be considered • Would enhance Everglades Boulevard Interchange Justification Report network • From those comments received or heard to date, this alternative is less intrusive with minimal impacts to neighborhoods, but has the highest environmental concerns
#3 Wilson-Benfield	<ul style="list-style-type: none"> • Would provide access to planned developments • Consistent with 2030 Long Range Transportation Plan • North of I-75, would have fewer impacts to residences and environment than other alternatives considered

The alternatives described above meet the needs of the project and will be carried forward for more detailed analysis and consideration.

COMMENT SHEET
(front and back)

Name: _____

Address: _____
(Street)

(City) (State) (Zip Code)

E-mail: _____

Would you like to be placed on the study's mailing list? Yes No

Please provide your comments below. We are especially interested in the alternative alignments and other areas listed below that are important to this project. Thank you in advance for your comments, as they are valuable to our study process.

**** PLEASE RETURN NO LATER THAN MARCH 4 ****

What are your comments/concerns with the proposed alternatives or other issues?

#1 NO-BUILD: _____

#2 MILLER BOULEVARD: _____

What are your comments/concerns with the proposed alternatives or other issues? (continued)

#3A WILSON-BENFIELD: _____

#3B WILSON-BENFIELD: _____

Do you have a preference as to the “preferred alternative”?

Yes No

If yes, which alternative would you prefer? _____

General comments/concerns: _____

Please place this comment sheet in the tray at the Sign-In Table or give to a Project Team member. You may also:

- Fax to (239) 252.2726.
- Email to claudineauclair@colliergov.net
- Mail to:

Naples, FL 34104**

WILSON BOULEVARD/BENFIELD ROAD CORRIDOR STUDY

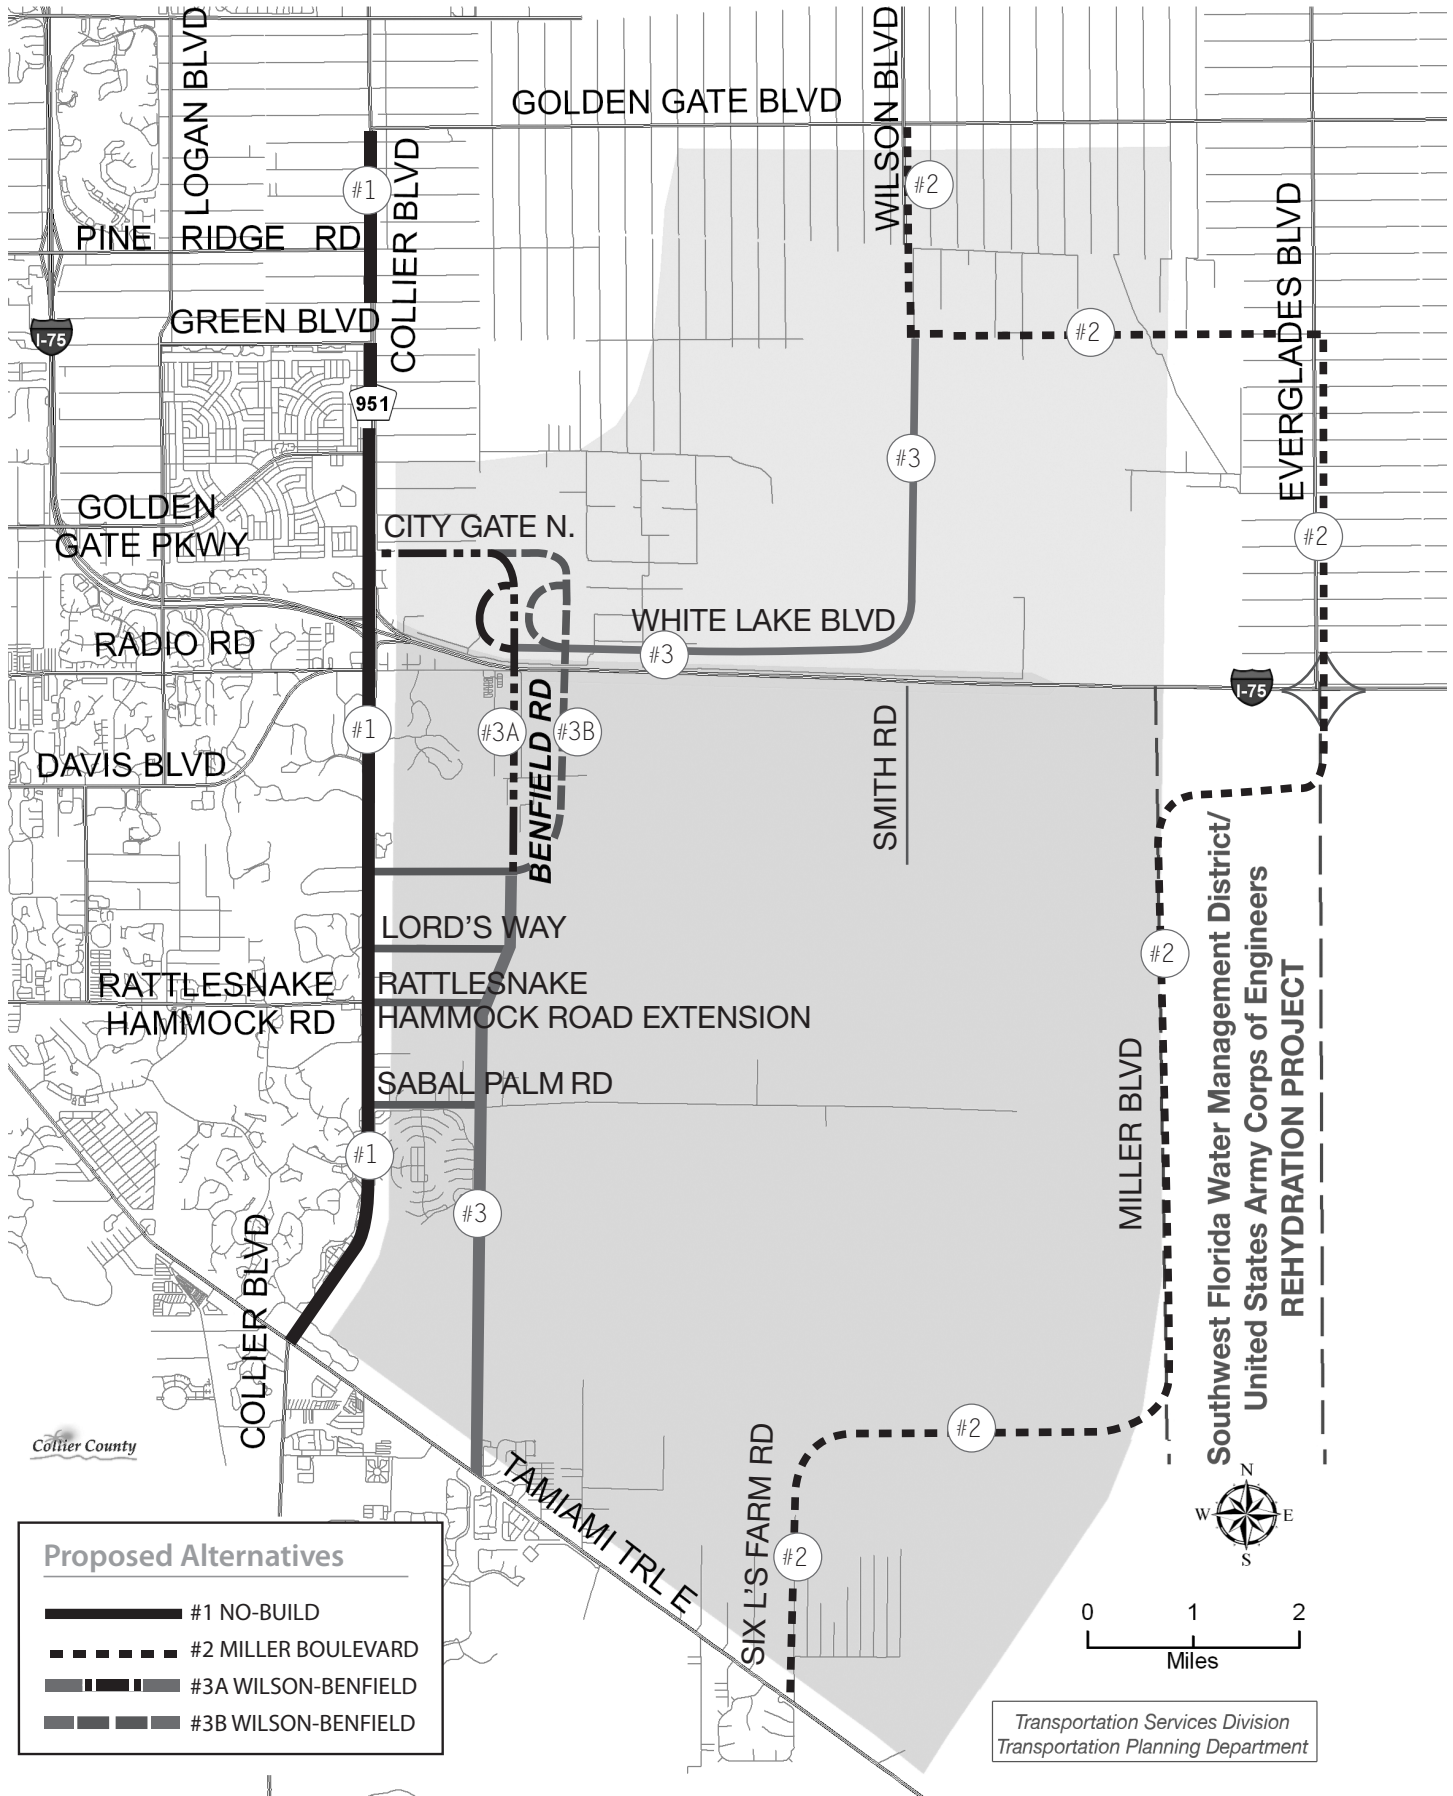

STUDY PURPOSE

The purpose of the corridor study is to determine how the County can improve traffic congestion in the study area by developing a series of alternative routes that will accommodate our transportation needs. Over the past several years, the increase in traffic, development and population has made getting around in Collier County more challenging. This trend is expected to continue, particularly in eastern Collier County. This growth has put a strain on the overall transportation network and prompted a study of potential ways to improve north-south travel.

STUDY GOALS AND OBJECTIVES

- A. To determine the Corridor's existing and future transportation demands, including traffic volumes, travel characteristics, and historical trends; facility operation (level of service), conditions of existing facilities and plans for improvements; describe what the existing or expected concerns are for the corridor and how the management plan expects to address these concerns.
- B. To determine the existing and projected traffic circulation needs for the Corridor, including traffic volumes, travel characteristics, future conditions and mobility requirements.
- C. To generally describe natural, physical, environmental, social, political, operational, and economic constraints within the Corridor that could have a negative social and economic effect upon any proposed alignments. The proposed alignments should minimize the displacement of residences and businesses as well as damage to ecosystems, wetlands or water quality.
- D. To develop and recommend alternative alignments that are consistent with the Collier County Growth Management Plan and Long Range Transportation Plan.
- E. To coordinate review with existing and proposed development/land use.
- F. To provide sufficient preliminary engineering and environmental information for future County production activities.
- G. To maximize public outreach efforts to ensure that communications efforts and public's participation in all phases of the Study process will be maintained and expanded by identifying and involving stakeholders.

Collier County

REVISED 2.2.2009
