Re: Collier County CAT Transfer Facility Contamination Evaluation Review

Based on a review of the proposed site location for the Collier County CAT Transfer Facility, the impact evaluation for Contamination is discussed below.

Methodology

To obtain up-to-date site information, PBS&J reviewed a regulatory research database report (EDM - attached) for the proposed transfer facility location and researched on-line information regarding the sites listed in the database. On-line resources utilized included the FDEP Oculus (Storage Tanks and Hazardous Waste) databases and the Storage Tank/Contaminated Facility database. PBS&J also reviewed on-line sources for aerial photographs dating from 1962, 1999, 2002, and 2008 to search for any nearby sites of potential contamination concern (such as gas stations, landfills, industrial facilities, etc.) PBS&J also reviewed a USGS topographic map for the proposed facility location, which sometimes contains indications of historical land uses. A summary of our findings is as follows:

The EDM report identified seven sites (MAP ID #1 through MAP ID #6, and MAP ID #9) located within approximately 600 feet of the proposed CAT Transfer Facility. The remaining sites listed in the EDM report (MAP IDs #7, 8, and 10) were located more than 650 feet from the proposed station site, and are not expected to have any involvement with the project. In addition, MAP ID #9 is the Publix Super Market # 1314. This site has a 1,000-gallon above-ground storage tank (AST) that is used solely for storage of emergency-generator diesel fuel. The AST was installed in October 2009, and there is no record of a petroleum discharge from this facility. Therefore, the Publix site is not considered a concern to the proposed CAT Transfer Facility. The following six sites were evaluated further to determine their potential for involvement with the proposed CAT Transfer facility:

MAP ID #1 is a Leaking Underground Storage Tank (UST) facility known as the Courthouse Shadows Consolidated Site (at 3375 Tamiami Trail East). This site was previously a gas station known as Texaco Ted's Courthouse or Texaco

#240210765. This facility is immediately west and northwest of the proposed CAT Transfer site. The Texaco formerly had six 4,000-gallon USTs and one 550-gallon UST for fuel. The USTs were installed in January 1965 and were removed in November and December 1997. This site was also a registered Small-Quantity Generator (SQG) of hazardous waste, but no hazardous waste violations were noted for the facility.

A petroleum discharge was reported for this site on December 4, 1997, as a result of removal/closure of the USTs. The USTs were located in the southern portion of the site. Prior to the closure, all four compliance monitoring wells did not have petroleum detections. However, during the closure of the USTs, a sample from a temporary monitoring well in the UST pit had elevated petroleum constituents (279 ug/l benzene, 2,030 ug/l MTBE, and 618 ug/l toluene). This facility was found to be eligible for participation in the State's petroleum cleanup program on February 18, 1998. In 1998, the initial facility cleanup score for this site was 30, but the score was later changed to 6. There does not appear to have been any further investigation of this site after 1998, and the low facility cleanup score (6) suggests that the FDEP will not initiate cleanup activities in the near future. The area of groundwater impacts was not delineated, and the groundwater flow direction at the site was not determined. Petroleum-contaminated groundwater from this facility (MAP ID #1) **has the potential to impact the proposed CAT Transfer facility.**

MAP ID #2 is a Leaking UST site known as Chevron-Shadow Court (at 3396 Tamiami Trail East). This site is located southwest of the proposed CAT Transfer facility, across US Highway 41 (Tamiami Trail). This site is an active gas station and convenience store. The site has two 10,000-gallon USTs for unleaded gasoline, which were installed in June 1996. The site previously had four 10,000-gallon USTs for unleaded gasoline, which were installed in December 1987 and January 1988 and were removed in October 1991. The site has two reported petroleum discharges, dated November 30, 1988 and April 23, 2001. The discharge from 1988 was investigated from 1988 through 1992. The 1988 discharge received approval for No Further Action from FDEP on January 21, 1993.

Site investigations were initiated after the 2001 discharge and continued through June 2004. During this period, groundwater flow direction was noted as being to the northeast or undetermined. As of 2004, there were low concentration detections of MTBE and TRPH in several of the monitoring wells, but no concentrations greater than State criteria had been detected in the most recent results. The June 2004 Site Assessment Report Addendum recommended a Monitoring Only Plan (MOP) for the site. In May 2005, the Collier County Pollution Control & Prevention Department agreed with the MOP, but recommended two additional downgradient monitoring wells to the southeast, to aid in groundwater flow determination. The most recent correspondence regarding this site indicated that groundwater sampling was scheduled in November 2005, but no data were provided. Review authority for the site was transferred to the FDEP Southwest District, but no further information was available in the files. Due to the low levels

of contaminants detected in 2004, and the distance (across US Highway 41) between this facility and the proposed CAT Transfer Facility, **impacts from this site at the proposed CAT Transfer facility should be minimal or negligible.**

MAP ID #3 is a Dry Cleaner facility known as the Courthouse Shadows Cleaners (at 3388 Tamiami Trail East). This site is located southwest of the proposed CAT Transfer facility, across US Highway 41. The site is registered with the Florida Drycleaning Solvent Cleanup Program, with a site score of 29 (which ranks it as site # 823). This site score is relatively low, and currently there is funding to clean up sites ranked 113 and higher. The score suggests that the impacts from the dry cleaning solvents were not significant and that FDEP will not be cleaning up the site in the near future. This site was also a registered SQG of hazardous waste, but no hazardous waste violations were noted for the facility. In November 1987, the site was noted as a generator of hazardous waste codes associated with dry cleaning solvents. However, by April 1999, the facility status was changed to "Closed/Moved", and the facility no longer generated hazardous wastes from that location. Due to the low Drycleaning Program cleanup score (of 29), and the distance (across US Highway 41) between this facility and the proposed CAT Transfer facility, **impacts from this site at the proposed CAT Transfer facility should be minimal or negligible.**

MAP ID #4 is the Wal-Mart Store # 1119 (at 3541 Tamiami Trail East), which is adjacent to the southeast of the proposed CAT Transfer facility location. This facility has a 499-gallon Above-ground Storage Tank (AST) for waste oil in the automotive repair department, which was installed in May 2003. No reported petroleum discharges are associated with this AST. This site is also a registered Conditionally-Exempt SQG (CESQG) of hazardous waste, but no hazardous waste violations were noted for the facility. In November 1993, the site was noted as a CESQG of hazardous waste codes associated with paints. In May 2009, the facility submitted a Contingency Plan to FDEP, which was commented on, revised, and re-submitted. In August 2009, the facility was re-classified as a SQG of hazardous waste, with more than 25 hazardous waste code types being generated. In March 2010, the status was changed back to CESQG, with 27 waste code types being generated. Due to the lack of any evidence for impacted soil or groundwater at this facility, **no impacts from this site at the proposed CAT Transfer facility are expected.**

MAP ID #5 is a complex of several facilities, including two Leaking UST sites, known as the Collier County Government Complex (at 3301 Tamiami Trail East). This complex has five active ASTs and USTs for emergency-generator diesel fuel, ranging in size from 3,000 to 12,000 gallons (at Buildings F, H, J, K, and Parking Garage 1). These were installed between 1985 and 2009. The complex formerly had three fueling facilities at Buildings F, G, and W. The USTs at Building G included two 10,000-gallon fuel tanks, installed at an unknown date and removed in 1987, and one 3,000-gallon UST and two 10,000-gallon USTs, which were installed in July 1987 and removed in September 1993. The USTs at Building W included two 10,000-gallon USTs that were installed at an unknown date and were

removed in August 1987. The USTs at Building F included one 8,000-gallon UST and one 6,000-gallon UST. These were installed in 1984 and 1996 and removed in 1996 and 2009, respectively. The government complex was also a registered Generator and Storer of hazardous waste since 1988, but no hazardous waste violations were noted for the facility.

The fueling facility at Building G had a petroleum discharge reported on September 28, 1990. The site was investigated from 1991 through 1995. After tank closure activities were conducted in 1993, 103.2 tons of petroleum-impacted soil were removed and disposed. By April 1994, groundwater impacts were minimal, and No Further Action was requested. Groundwater flow direction at the Building G area was toward the northwest. The petroleum discharge received approval for No Further Action from FDEP on May 17, 1995.

A petroleum discharge was reported for the Building W fueling facility on November 14, 1991. Site investigations were conducted from 1992 through 1994. Groundwater and soil impacts were limited to the area immediately west of Building W. Groundwater flow direction was to the west. Due to the localized area of impacts, an Alternate Remedial Action Plan was recommended for the site. This facility was found to be eligible for participation in the State's petroleum cleanup program on January 22, 1992. The initial facility cleanup score for this site was 10, but the score was later changed to 6. There does not appear to have been any further investigation or cleanup of this site after 1995, and the low facility cleanup score (6) suggests that the FDEP will not initiate cleanup activities in the near future. Due to the location of the Collier County Government Complex with respect to the proposed CAT Transfer facility and the direction of groundwater flow at the on-site impacted areas, **impacts from this site at the proposed CAT transfer facility should be minimal or negligible.**

MAP ID #6 is a former gas station and Leaking UST site known as ECOL #819 (at 3280 Tamiami Trail East). The gas station was formerly 500 feet northwest of the proposed CAT Transfer facility, but the gas station has been removed and a road (a portion of Peters Street) now crosses the site. The site is currently owned by Collier County. The prior gas station facility had four 5,000-gallon fuel USTs and two 4,000-gallon fuel USTs. Four of the USTs were installed in 1966, while the remaining two were installed in 1981. All of the USTs were removed in 1988. A petroleum discharge was reported at this site on March 17, 1987 due to fuel detections in groundwater wells. Site assessment and remediation were conducted at this facility from 1989 through 1996. However, cleanup was never completed, and the site soil and groundwater remain impacted by petroleum. A Supplemental Site Assessment Report, completed in January 2010, identified a petroleum groundwater plume in the central portion of the site. Groundwater flow was toward the east. Additional investigations were required to delineate the lateral and vertical extent of the plume, prior to preparation of a Remedial Action Plan. Due to the distance between the former gas station site and the proposed CAT Transfer facility,

impacts from the former gas station site (MAP ID #6) at the proposed CAT Transfer facility should be minimal or negligible.

Conclusions and Recommendations

The EDM report identified 10 potential contamination sites in the immediate vicinity of the location of the proposed CAT Transfer facility. Of those 10 sites, four sites appeared to be too distant from the proposed CAT Transfer facility or had no expectation of contamination. Those sites were excluded from further evaluation. Of the six sites that were evaluated further, one site had no expectation of soil or groundwater impacts and four of the other sites had only a minimal or negligible potential for impacts at the CAT Transfer facility location. However, one site, MAP ID #1, known as the Courthouse Shadows Consolidated Site, has the potential to impact the proposed CAT Transfer facility location. According to the information evaluated, petroleum-impacted groundwater was identified at the Courthouse Shadows Consolidated Site, which is immediately west and northwest of the proposed CAT Transfer facility. There is no indication that the Courthouse Shadows Consolidated Site was adequately cleaned up or fully assessed. Groundwater flow direction at the Courthouse Shadows Consolidated Site is not known, but at least two nearby sites have groundwater flow toward the east or southeast, which is the direction of the proposed CAT Transfer facility.

PBS&J assumes that dewatering will be needed during construction of the proposed CAT Transfer facility, since the depth to groundwater typically ranges from 2 to 5 feet in the area. There is the potential that the groundwater being generated during dewatering may be impacted by petroleum constituents associated with the Courthouse Shadows Consolidated Site. To determine if such impacts can be expected, PBS&J recommends sampling the groundwater in the northwestern and western portions of the proposed CAT Transfer facility location. PBS&J recommends that at least two permanent monitoring wells be installed in the proposed areas of dewatering located in the western portion of the CAT Transfer facility footprint. The wells should be installed to a depth of 12 feet and screened between two to 12 feet. The monitoring wells should be constructed with traffic bearing manholes, locking caps, and concrete pads. The permanent monitoring wells should be sampled for petroleum constituents (Volatile Organic Aromatics – VOAs, Polynuclear Aromatic Hydrocarbons – PAHs, and Total Recoverable Petroleum Hydrocarbons – TRPH). If no impacted groundwater is detected in these monitoring wells, then it can be assumed that the impacted groundwater from the Courthouse Shadows Consolidated Site has not migrated into the proposed CAT Transfer Facility location. If groundwater impacts (due to petroleum constituents) are detected, then measures can be taken to treat the dewatering effluent generated during construction of the CAT Transfer facility prior to its discharge.

ENVIRONMENTAL DATA REPORT

Comprehensive 1/4 Mile Research

Northeast Corner of Tamiami Trail
and Courthouse Shadows Road
Naples, Florida

Subject: **Comprehensive 1/4 Mile Research - EDM Project #20524**

Dear Mr. Bayne

Thank you for using Environmental Data Management, Inc. The following report provides the results of our environmental data research that you requested for the following location:

**Northeast Corner of Tamiami Trail
and Courthouse Shadows Road
Naples, Florida**

The following is a summary of the components contained within this report:

- **Executive Summary** –lists the databases that were searched for this report, the search distance criteria and the number of sites identified for each database.
- **Map of Study Area**– street map showing the location of the Subject Property and any regulatory listed sites identified within the search criteria (*a non-mapped option is available*).
- **Site Summary Table** –displays corresponding sites' Map ID numbers, Permit or Registration numbers, Name/Address and the Government Database(s) on which the site was listed.
- **Detail Reports** – data detail for each record identified.
- **Proximal Records Table** – a listing of potentially relevant sites identified just beyond the search criteria.
- **Non-Mapped Records Table** - lists those government records that do not contain sufficient address information to plot within our GIS system, but may still exist within your study area.
- **Agency List Descriptions** – defines the regulatory databases included in this report along with the dates that each database was last updated by the respective agency and EDM.
- **Physical Setting** – includes USGS Contour or Topographic map and a map of statewide American Indian Lands. Recent Aerial Photo, FEMA Flood Map and NWI Wetland Map included with Comprehensive Report. Water Well locations and detail well reports are included where this information is available.

At EDM we take great pride in our work, and continually strive to provide you with the most accurate and thorough research service available. We accomplish this by manually screening and researching your study area to identify and accurately locate any sites of environmental concern. This manual effort may add more time and effort to your report preparation, but we think a more thorough and accurate result is worth it.

Thank you again for selecting EDM as your data research provider. Should you have any questions regarding this report or our service, please feel free to contact us. We appreciate the opportunity to be of service to you and look forward to working with you in the future.

ENVIRONMENTAL DATA MANAGEMENT, INC.

Executive Summary

Report Date: 4/30/2010

PROXIMAL RECORDS TABLE

Report Date: 4/30/2010

The Proximal Records Table includes mapped facilities that appear outside of the study area, but in the proximity of the research boundary. They are provided in a summary fashion to allow one to determine potential interest.

Generally, these sites may be of potential interest for three reasons:

- 1.) The location occurs so close to the research boundary that it merits inclusion in the evaluation.
- 2.) The site may be expansive with regard to the property boundary. The physical address of a landfill for example may occur outside of the research boundary, but the landfill boundary may extend into the research area. Large industrial complexes may also fall into this category.
- 3.) The U.S. Census Bureau data, from which our maps are created, is not always precise with regard to address information. A facility may therefore appear on the map outside of the research area, but actually fall within the research area. These inaccuracies are typically less than 500 feet. If you observe any such inaccuracies, we ask that you please notify us of the more precise location and we will use this information to improve our product.

If more specific information relative to one or more locations included in the Proximal Records Table is desired, please feel free to contact us and we will send you this information as an addendum to this report.

NONMAPPED RECORDS TABLE

Report Date: 4/30/2010

The Non-Mapped Records Table is a listing of database records that lack sufficient address information to be placed within our mapping system, but may exist within your study area. These records have been manually screened to determine whether they could likely fall within the study area or can be conclusively identified as existing outside of the study area. Those records that could be located within the study area, but cannot be plotted within our GIS, are displayed in the Non-Mapped Records Table within this report.

If more specific information relative to one or more locations included in the Non-Mapped Records Table is desired, please feel free to contact us and we will send you this information as an addendum to this report.

Agency List Descriptions

USEPA and State Databases are updated on a quarterly basis. Supplemental Databases are updated on an annual basis.

US Environmental Protection Agency (USEPA)

Comprehensive Env Response, Compensation & Liability Information System List(CERCLIS)

The US EPA Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) is the Superfund database used to track facilities and/or locations that the USEPA is investigating to determine if an existing or threatened release of hazardous substances is present.

Agency File Date: 2/28/2010

Received by EDM: 3/11/2010

EDM Database Updated: 3/12/2010

RCRIS Handlers with Corrective Action(CORRACTS)

The US EPA Corrective Action Sites (CORRACTS) database is a listing of hazardous waste handlers that have undergone RCRA corrective action activity. This information is compiled by the EPA Regional and State RCRA program personnel, as well as the RCRA facilities themselves.

Agency File Date: 2/16/2010

Received by EDM: 4/9/2010

EDM Database Updated: 4/9/2010

Emergency Response Notification System List(ERNS)

The Emergency Response Notification System (ERNS) database stores information on oil discharges and hazardous substance releases. The ERNS program is a cooperative data sharing effort among the EPA, DOT and the National Response Center (NRC), which currently provides access to this data.

Agency File Date: 1/21/2010

Received by EDM: 4/29/2010

EDM Database Updated: 4/29/2010

Archived Cerclis Sites(NFRAP)

The US EPA NFRAP list contains archived data of CERCLIS records where the EPA has completed assessment activities and determined that no further steps to list the site on the NPL will be taken. NFRAP sites may be reviewed in the future to determine if they should be returned to CERCLIS based upon newly identified contamination problems at the site.

Agency File Date: 1/12/2010

Received by EDM: 1/12/2010

EDM Database Updated: 1/12/2010

RCRA-LQG,SQG,CESQG and Transporters(NONTSD)

The EDM NONTSD list is a subset of the US EPA RCRAInfo System and identifies facilities that generate and transport hazardous wastes. These facilities may be Large Quantity Generators (LQG), Small Quantity Generators (SQG), Conditionally Exempt SQG's (CESQG) as well as "Non-Notifiers" and "Non-Handlers".

Agency File Date: 2/16/2010

Received by EDM: 3/10/2010

EDM Database Updated: 3/11/2010

National Priorities List(NPL)

The US EPA National Priorities List (NPL) contains facilities and/or locations where environmental contamination has been confirmed and prioritized for cleanup activities. In addition to sites that are currently on the EPA NPL, the EDM database contains sites that have been Proposed for and Deleted from the list.

Agency File Date: 4/7/2010

Received by EDM: 4/8/2010

EDM Database Updated: 4/8/2010

Tribal Lust List(TRIBLLUST)

The USEPA Region IV Tribal Tanks database lists Active and Closed storage tank facilities on Native American lands with indicators for past and current releases.

Agency File Date: 2/24/2010

Received by EDM: 3/7/2010

EDM Database Updated: 3/9/2010

Tribal Tanks List(TRIBLTANKS)

The USEPA Region IV Tribal Tanks database lists Active and Closed storage tank facilities on Native American lands.

Agency File Date: 2/24/2010

Received by EDM: 3/7/2010

EDM Database Updated: 3/9/2010

RCRA-Treatment, Storage and/or Disposal Sites(TSD)

The EDM TSD list is a subset of the US EPA RCRAInfo system and identifies facilities that Treat, Store and/or Dispose of hazardous waste.

Agency File Date: 2/16/2010

Received by EDM: 3/10/2010

EDM Database Updated: 3/11/2010

Brownfields Management System(USBRWNFLDS)

The US EPA Brownfields program provides information on environmentally distressed properties that have received Grants or Targeted funding for cleanup and redevelopment. Tribal Brownfield sites are included in the USBRWNFLDS database.

Agency File Date: 1/11/2010

Received by EDM: 1/11/2010

EDM Database Updated: 1/13/2010

US Institutional and/or Engineering Controls(USINSTENG)

The USINSTENG list is compiled from data elements contained in the NPL, CORRACTS and USBRWNFLDS lists.

Agency File Date: 1/11/2010

Received by EDM: 1/11/2010

EDM Database Updated: 1/25/2010

Florida Department of Environmental Protection (FDEP)

State Designated Brownfields(BRWNFLDS)

The FDEP Brownfields database contains a listing of State Designated Brownfield Areas. Brownfields areas are typically abandoned, idled or underused industrial and commercial facilities where expansion or redevelopment is complicated by real or perceived environmental contamination.

Agency File Date: 3/11/2010

Received by EDM: 3/11/2010

EDM Database Updated: 3/11/2010

State Dry Cleaners List(DRY)

The Florida Dry Cleaners List is comprised of data from the FDEP Storage Tank and Contamination Monitoring (STCM) database and the Drycleaning Solvent Cleanup Program- Priority Ranking List. It contains a listing of those Dry Cleaner sites (and suspected historical Dry Cleaning sites) who have registered with the FDEP and/or for the Dry Cleaning Solvent Cleanup Program.

Agency File Date: 1/11/2010

Received by EDM: 1/26/2010

EDM Database Updated: 1/26/2010

State Institutional and/or Engineering Controls(INSTENG)

The FDEP INSTENG list contains sites that have had Institutional and/or Engineering Controls implemented to regulate exposure to environmental hazards

Agency File Date: 1/11/2010

Received by EDM: 3/9/2010

EDM Database Updated: 3/10/2010

Leaking Underground Storage Tanks List(LUST)

The FDEP LUST list identifies facilities and/or locations that have notified the FDEP of a possible release of contaminants from petroleum storage systems. This Report is generated from the FDEP Storage Tank and Contamination Monitoring Database (STCM).

Agency File Date: 3/5/2010

Received by EDM: 4/2/2010

EDM Database Updated: 4/2/2010

Solid Waste Facilities List(SLDWST)

The FDEP SLDWST identifies locations that have been permitted to conduct solid waste handling activities including Landfills, Transfer Stations and sites handling Bio-Hazardous wastes. Sites listed with "##" after the Facility ID Number are historical locations, obtained from documents on record at local agencies.

Agency File Date: 4/29/2010

Received by EDM: 4/29/2010

EDM Database Updated: 4/29/2010

State CERCLIS Equivalent(STCERC)

The STCERC is a historical listing of sites that the Florida Department of Environmental Regulation (FDER) compiled to track suspect contamination sites. This list was known as the Florida SITES list and was last updated by the FDER in 1989.

Agency File Date: 12/1/1989

Received by EDM: 4/1/1995

EDM Database Updated: 4/25/1995

State NPL Equivalent(STNPL)

The FDEP State Funded Action Sites (SFAS) list contains facilities and/or locations that have been identified by the FDEP as having known environmental contamination and are currently being addressed through State funded cleanup action.

Agency File Date: 12/3/2009

Received by EDM: 1/25/2010

EDM Database Updated: 1/26/2010

State Hazardous Waste Notifiers(STRCRA)

The STRCRA list is derived from the FDEP Hazardous Waste Compliance & Enforcement Tracking database and identifies facilities that Generate, Transport, Treat, Store and Dispose of hazardous waste.

Agency File Date: 11/4/2009

Received by EDM: 11/4/2009

EDM Database Updated: 11/4/2009

Underground/Aboveground Storage Tanks(TANKS)

The FDEP TANKS list contains sites with registered aboveground and/or underground storage tanks containing regulated petroleum products. Please refer to the "Explanation of Florida Tank Codes" insert to interpret tank construction, monitoring and piping codes.

Agency File Date: 1/13/2010

Received by EDM: 1/26/2010

EDM Database Updated: 1/26/2010

State Voluntary Cleanup List(VOLCLNUP)

The FDEP VOLCLNUP List is derived from the FDEP Brownfields Site Rehabilitation Agreement (BSRA) database. This database identifies those sites that have signed an agreement to Voluntarily cleanup a Brownfields site in accordance with FDEP requirements.

Agency File Date: 3/11/2010

Received by EDM: 3/11/2010

EDM Database Updated: 3/11/2010

Supplemental Databases

Biennial Reporting System(BRS)

The US EPA Biennial Reporting System(BRS) collects data on the generation and management of hazardous waste from Large Quantity Generators and Treatment, Storage and Disposal facilities (TSD's). The data is reported, on even years, by the facilities to state environmental agencies which provide the information to regional and national EPA offices.

Agency File Date: 1/19/2007

Received by EDM: 6/24/2008

EDM Database Updated: 6/25/2008

Facility Registry System(FRS)

The US EPA Facility Registry System (FRS) is a centrally managed database of sites that are regulated by Program Offices of the EPA; such as Air, Water and Waste. The FRS has replaced the Facility Index System (FINDS) list.

Agency File Date: 3/11/2009

Received by EDM: 3/11/2009

EDM Database Updated: 3/12/2009

Hazardous Waste Data Management System(HWDMS)

The US EPA Hazardous Waste Data Management System (HWDMS) list is a historical database replaced by RCRIS. The HWDMS list was used to track sites involved in the Generation, Transportation, Treatment, Storage and/or Disposal of hazardous waste.

Agency File Date: 12/1/1991

Received by EDM: 2/1/1992

EDM Database Updated: 2/1/1992

Industrial Wastewater Facilities Report(INDWST)

The EDM INDWST report contains information from the FDEP Wastewater Facility Regulation (WAFR) database which tracks sites that discharge Industrial Wastewaters to surface and groundwaters of the State.

Agency File Date: 3/8/2010

Received by EDM: 3/11/2010

EDM Database Updated: 3/11/2010

PCB Activity Data System(PADS)

The USEPA tracks sites that conduct activities relative to the generation, transportation, permitted storage and permitted disposal of PCB's. This information was previously contained in the PCB Activities Database (PADS) and is currently reported using the Notification of PCB Activity Quarterly Reports.

Agency File Date: 8/24/2009

Received by EDM: 9/10/2009

EDM Database Updated: 9/11/2009

Permit Compliance System(PCS)

The US EPA Permit Compliance System (PCS) is a data system to track permit compliance and enforcement at facilities holding National Pollutant Discharge Elimination System (NPDES) permits.

Agency File Date: 4/27/2009

Received by EDM: 11/5/2009

EDM Database Updated: 12/3/2009

RCRA Administrative Action Tracking System(RAATS)

The US EPA RAATS list is a historical RCRA enforcement database that tracked facilities found to be major violators under RCRA. Data entry in this database was discontinued in 1995.

Agency File Date: 8/1/1995

Received by EDM: 8/30/1995

EDM Database Updated: 9/17/1995

Record Of Decisions System(RODS)

The US EPA RODS system documents information relative to site history, community participation, enforcement activities, site characteristics, scope and role of response action, and remedies applied at Superfund (NPL) sites

Agency File Date: 12/28/2009

Received by EDM: 12/30/2009

EDM Database Updated: 1/5/2010

Toxic Release Inventory System(TRIS)

The US EPA TRIS list identifies those facilities that are required to submit annual reports relative to the estimated routine and accidental release of toxic chemicals to the environment, as stipulated under current federal laws.

Agency File Date: 12/11/2009

Received by EDM: 2/11/2010

EDM Database Updated: 2/18/2010

EXPLANATION OF FLORIDA TANK CODES

CONSTRUCTION TYPE CODES

A = BALL CHECK VALVE
B = INTERNAL LINING
C = STEEL
D = UNKNOWN
E = FIBERGLASS
F = FIBERGLASS-CLAD STEEL
G = CATHODIC PROTECTION-SACRIFICIAL ANODE
H = CATHODIC PROTECTION -IMPRESSED CURRENT
I = DBL WALL/SINGLE MATERIAL
J = SYNTHETIC LINER IN TANK EXCAVATION
K = AST CONTAINMENT: CONCRETE /SYNTHETIC MATERIAL AREA
L = COMPARTMENTED
M = SPILL CONTAINMENT BUCKET
N = FLOW SHUT OFF
O = TIGHT FILL
P = LEVEL GAUGES, HI LEVEL ALARMS
Q = OTHER DER APPROVED PROTECTION METHOD
R = DBL WALL/DUAL MATERIAL/ (TANK "JACKET")
S = OTHER DEP APPROVED SECONDARY CONTAINMENT SYSTEM
T = SMALL USE TANK
U = FIELD ERECTED TANK
V = PIPELESS UST W/SECONDARY CONTAINMENT
W = BUILT ON SUPPORTS
X = CONCRETE
Y = POLYETHYLENE
Z = OTHER DEP APPROVED TANK MATERIAL

PIPING TYPE CODES

A = ABOVE GROUND-NO CONTACT W/SOIL
B = STEEL OR GALVANIZED METAL
C = FIBERGLASS
D = EXTERNAL PROTECTIVE COATING
E = CATHODIC PROTECTION (SACRIFICIAL ANODE/IMPRESSED CURRENT)
F = DBLWALL/SINGLE MATERIAL
G = SYNTHETIC OR BOX/TRENCH LINER
H = AIRPORT/SEAPORT HYDRANT SYSTEM
I = SUCTION PIPING SYSTEM
J = PRESSURIZED PIPING SYSTEM
K = DISPENSER LINERS
L = BULK PRODUCT SYSTEM
M = DOUBLE WALL / DUAL MATERIAL (PIPE "JACKET")
N = APPROVED SYNTHETIC MATERIAL
O = SEVERE VIOLATION
P = INTERNAL PIPING WITHIN INTERNAL SUMP RISER
V = VIOLATION
X = NO PIPING ASSOCIATED WITH TANK
Y = UNKNOWN
Z = OTHER DEP APPROVED PIPING MATERIAL

LEAK MONITORING CODES

1 = CONTINUOUS ELECTRONIC SENSING EQUIPMENT
2 = VISUAL INSPECTIONS OF PIPING SUMPS
3 = ELECTRONIC MONITORING OF PIPING SUMPS
4 = VISUAL INSPECTIONS OF DISPENSING LINERS
5 = ELECTRONIC MONITORING OF DISPENSER LINERS
6 = EXTERNAL PIPING MONITORING
7 = AUTOMATICALLY SAMPLED WELLS
8 = MANUALLY SAMPLED WELLS
A = SITE SUITABILITY PLAN
B = SITE SUITABILITY PLAN EXEMPTION
C = GROUNDWATER MONITOR PLAN
D = SPCC PLAN
E = INTERSTITIAL MONITORING UST LINERS
F = INTERSTITIAL SPACE-DOUBLE WALL TANK
G = ELECTRONIC LINE LEAK DETECTOR W/FLOW SHUTOFF
H = MECHANICAL LINE LEAK DETECTOR
I = NOT REQUIRED-SEE RULE FOR EXEMPTIONS
J = INTERSTITIAL MONITORING-PIPING LINER
K = INTERSTITIAL MONITORING- DOUBLE WALL PIPING
L = AUTOMATIC TANK GAUGING SYSTEM (USTS)
M = MANUAL TANK GAUGING SYSTEM (USTS)
N = GROUNDWATER MONITORING SYSTEM
O = VAPOR MONITORING SYSTEM
P = VAPOR MONITORING W/DILUTION PROCEDURES
Q = VISUAL INSPECTION OF AST SYSTEMS
R = INTERSTITIAL MONITORING OF TANK BOTTOM
S = STATISTICAL INVENTORY RECONCILIATION (SIR/USTS)
T = ANNUAL TIGHTNESS TEST WITH INVENTORY (UST)
U = BULK PIPING PRESSURE TEST
V = SUCTION PUMP CHECK VALVE
W = FIBER-OPTIC TECHNOLOGIES
X = NONE
Y = UNKNOWN
Z = OTHER DEP APPROVED MONITORING METHOD

Map Descriptions

Brownfields and Contaminated Areas Map

EDM's Brownfields and Contaminated Areas map displays the areal extent and location of State Designated Brownfields, USEPA National Priorities List (Superfund) sites, State Funded Action Sites (State NPL equivalent) and FDEP Contaminated Groundwater Delineation areas.

The FDEP Groundwater Delineation Program was developed after studies conducted in 1983, showed the presence of ethylene dibromide (EDB) in drinking water wells at various locations throughout the state. From 1962 to mid 1983 the Florida Department of Agriculture and Consumer Services conducted widespread field application of this soil fumigant (EDB) to control nematodes in citrus groves. EDB was also used by private citizens on golf courses and on crops such as peanuts and soybeans. Because of the EDB in drinking water wells, the 1988 Legislature directed the Department of Environmental Protection to implement water well construction and water testing standards within areas of known ground water contamination.

Well Location Map

EDM's Well Location Map displays the location of Public Water Supply and consumptive use water wells in the area surrounding the subject property. Data details regarding these water wells is provided for those wells that fall within a 1/2 Mile radius of the subject property.

This information is derived from integrating map data from the US Census Bureau and the USGS along with well location data from the FEDP and various water management districts throughout the State of Florida. In addition to the well location information displayed, this map also includes Section, Township and Range info, USGS Quad Names and the Latitude and Longitude of the subject property (Deg-Min-Sec).

American Indian Lands

EDM has obtained American Indian Reservation boundary files from the US Census Bureau and has presented them in a statewide reference map. General location and contact information is also presented in the Table accompanying this map.

Topographic Map

EDM's Topographic Map is derived from Digital Raster Graphic (DRG) data obtained from the US Geological Survey (USGS). A DRG is a raster image created by scanning published paper maps on high-resolution scanners. To display these DRGs within our Geographic Information System (GIS), EDM strips the collar information from each image and assigns control points for matching the image to ground control coordinate values associated with our vector based Street Map data.

FEMA Flood Map

EDM's FEMA Flood Map is a representation of 100-Year and 500-Year floodplain areas as derived from Digital Q3 Flood Data obtained from the Federal Emergency Management Agency (FEMA). The Q3 Flood Data are developed by scanning and vectorizing existing hardcopy Flood Insurance Rate Maps (FIRMs) to create 1) a raster product suitable for viewing or printing and 2) a thematic vector overlay of flood risk areas. The Q3 Flood Data are intended to capture all FIRM data in the raster file, but only certain features in the vector file. EDM uses the vector file to provide a graphic display of the 100-year and 500-year floodplain areas.

Definitions: SFHA-Special Flood Hazard Area COBRA-Coastal Barrier Resources Act

NWI Wetlands Map

EDM's NWI Wetlands Map is a representation of wetland areas as derived from Digital Line Graph (DLG) data obtained from the US Fish and Wildlife Service (FWS) National Wetlands Inventory (NWI) program. The FWS/NWI has the primary responsibility for the mapping and inventory of wetlands within the United States. The NWI produces wetland maps by initially employing photo-interpretation of color-infrared photographs. These photographs often provide distinctive color, texture and pattern features that are characteristic of wetland vegetation and background soils. The mapping process may be further checked and validated through analysis of US Geological Survey (USGS) Topographic maps and Natural Resources Conservation Service (NRCS) Soil Survey maps. In some instances, field reconnaissance may also be an option during the validation process.

Table 1. COWARDIN CLASSIFICATION OF WETLANDS AND DEEPWATER HABITATS

| SYSTEM | SUBSYSTEM | CLASS | SUBCLASS |
|-------------|--------------|---|--|
| M=MARINE | 1=SUBTIDAL | - RB=Rock Bottom | 1=Bedrock 2=Rubble |
| | | - UB=Unconsolidated Bottom | 1=Cobble-Gravel 2=Sand 3=Mud 4=Organic |
