

## **LASIP Monitoring**

|                               |                              |
|-------------------------------|------------------------------|
| Dissolved Oxygen              | Total phosphorus             |
| Temperature                   | Total suspended solids (TSS) |
| pH                            | Turbidity                    |
| Specific Conductance          | Arsenic                      |
| Salinity                      | Cadmium                      |
| Secchi depth                  | Calcium                      |
| Ammonia                       | Chloride                     |
| Biochemical Oxygen Demand     | Chromium                     |
| Chlorophyll-a                 | Copper                       |
| Color                         | Hardness                     |
| E. Coli                       | Iron                         |
| Nitrate (NO <sub>3</sub> )    | Lead                         |
| Nitrite (NO <sub>2</sub> )    | Magnesium                    |
| Orthophosphate (P)            | Sulfate                      |
| Phaeophytin                   | Zinc                         |
| Total Kjeldahl Nitrogen (TKN) |                              |
| Total Organic Carbon          |                              |
