

GAS PLAN REVIEW

Residential Gas Piping

This information is intended only as guideline for the construction drawings submitted to the Building Division and may or may not be all inclusive.

- Gas Plan and Isometric Drawings
 - With design pressures, regulators, pipe sizes, lengths of pipe, type of pipe, note underground piping and btu load at each termination
 - Copy of Charts used to size piping
 - No “optional” outlets: Must be labelled “future”
 - If propane, provide tie down detail and location of tank with required setbacks or clearances and tank size & type
