## Staff Report

**Presentation to the Collier County Planning Commission of the 2016 combined Annual Update and Inventory Report on Public Facilities and Schedule of Capital Improvements as provided for in Chapter 6.02.02 of the Collier County Land Development Code and Section 163.3177(3)(b), Florida Statutes.**

---

**OBJECTIVE:** Request that the Collier County Planning Commission (CCPC) review the combined 2016 Annual Update and Inventory Report (AUIR)/Capital Improvement Element (CIE) on public facilities and provide recommendations to the Collier County Board of County Commissioners (Board) on specific projects and associated funding sources for inclusion in the Schedule of Capital Improvements within the CIE during the FY16/17 annual update (only Category "A" public facilities are included in the CIE). The AUIR identifies capital needs for new facilities to serve projected population growth in the five-year AUIR time period. Also like past AUIRs, this year's AUIR presents additional information related to individual division/department operational data. This additional data is provided to evaluate the year-to-year change in demand experienced by each AUIR component and to assist the CCPC in making recommendations upon the appropriateness of the County's current levels of service and timing/necessity of proposed projects. The AUIR constitutes the process of evaluating budgetary priorities, as well as determining appropriateness of the County's currently adopted levels of service.

**BACKGROUND:** Chapter 163, Part II, Florida Statutes, requires the County to adopt certain Land Development Regulations (LDR) to implement its Growth Management Plan adopted on January 10, 1989. Land Development Code (LDC) Section 6.02.00 requires the County to, "*Provide that public facilities and services meet or exceed the standards established in the CIE required by Section 163.3177 and are available when needed for the development...*" This Section of Chapter 163, Part II, Florida Statutes is commonly known as the concurrency requirement. Accordingly, on March 21, 1990, the Board adopted the Collier County Adequate Public Facilities Ordinance No. 90-24. This Ordinance was subsequently codified in LDC Section 6.02.02. It should be noted that changes initiated by HB7207 in 2011 [which is now Chapter 2011-139, Laws of Florida] only requires from each local government that they maintain concurrency management for its Stormwater Management System, Potable Water System, Wastewater Collection and Treatment System, and Solid Waste Disposal services and facilities. During the 2011 AUIR/CIE process, the County decided to maintain concurrency for the optional facilities of Schools, Arterial and Collector Roads and Bridges, and Parks and Recreation, based upon the perspective that maintaining concurrency management for the optional facilities is necessary to sustain the current identified levels of service for the respective facilities and to ensure that the demands of new development are provided for by system expansion corresponding to those demands.

As noted, LDC Section 6.02.02 establishes the management and monitoring program for public facilities, which provides for an annual determination of level of service concurrency for Category "A" facilities and identification of additional facilities' needs. Category "A" facilities are arterial and collector roads, drainage system and stormwater management, potable water supply and distribution, wastewater collection and treatment, solid waste disposal, public schools, and parks. The AUIR also provides analysis and recommendations on Category "B" facilities for which the County has adopted levels of service standards and collects impact fees. The Category "B" facilities are jail and correctional facilities, law enforcement, library buildings and collections, emergency medical services, government buildings, and a dependent fire district – Ochopee Fire Control and Rescue. Adoption of Category "B" facilities levels of service standards are necessary

in order to legally validate impact fees for these facilities, related to the levels of service provided within each impact fee. LDC Section 6.02.02 requires the preparation of an AUIR on Public Facilities for presentation to the Board of County Commissioners.

At the direction of the County Manager, Coastal Zone beach re-nourishment and inlet management projects were added to the AUIR in 2013, within a new Category "C". This inclusion allows for a formal and predictable Board evaluation of the condition for each respective capital programming. Category "C" areas (coastal zone beaches and inlets) are not subject to concurrency management or coupled to impact fee funding. The quality and usability of these features are sustained through periodic surveys, and maintenance and management programs, funded with tourist development taxes and other revenue sources.

Under the provisions of LDC Section 6.02.02, the Board's options in response to the needs identified in the AUIR include, but are not limited to, the following:

1. Establishment of Areas of Significant Influence (ASI) surrounding deficient road segments which are not in a Traffic Congestion Management Area (TCMA) or Traffic Congestion Exception Area (TCEA).
2. In response to the needs identified in the AUIR, Public Facility projects can be added to the financially feasible Schedule of Capital Improvements in the Capital Improvements Element. Road projects must be in the first or second year of the next adopted Schedule of Capital Improvements in order to be factored as available capacity in the real-time Transportation Concurrency Management System database.
3. Deferral of development order issuance will occur for development not vested by statute in areas affected by deficient Category "A" public facilities. This applies to necessary improvements both pending and not financially feasible, or not in the five-year CIE Schedule of Capital Improvements. Both circumstances could result in the following remedial action:
  - a. Modification of levels of service via Growth Management Plan Amendments;
  - b. Subsequent direction to staff to include the necessary Category "A" public facility projects in a future Annual CIE Update and Amendment to be adopted by the Board;
  - c. Future approval of new or increased revenue sources for needed Public Facility projects, by the Board of County Commissioners, the State Legislature, or the County voters; or
  - d. Developer constructed improvements guaranteed by an enforceable development agreement.

It should be noted that the options identified above are crafted under the design of attaining a fiscally feasible CIE based on the concurrency management system. The Board, through Objective 2 of the CIE, provides direction to maintain an annual financially feasible Schedule of Capital Improvements. The requirement for financial feasibility is a local requirement, no longer a statutory requirement.

#### **CIE ~ OBJECTIVE 2: (FINANCIAL FEASIBILITY)**

*Provide public facilities, as described in Policy 1.1 above, in order to maintain adopted level of service standards that are within the ability of the County to fund.....*

It should be noted that CIE Policies 1.1 through 1.5 establish the standards for levels of service for Category "A" public facilities.

**GROWTH MANAGEMENT IMPACT:** The preparation and presentation of the AUIR to the CCPC and Board meets the requirements of LDC Section 6.02.02 for an annual determination of the status of public facilities. Board direction to include the projects identified in the AUIR in a financially feasible FY16 Annual CIE Update and Amendment will establish and maintain concurrency for Category "A" public facilities, except roads, for the next twelve (12) months. Road projects needed to remedy level of service deficiencies must be in the first or second year of the Schedule of Capital Improvements.

Based upon statutory changes initiated in 2011, the CIE Schedule of Capital Improvements is no longer required to be sent to the State Land Planning agency and requires only a single public hearing before the Collier County Planning Commission (sitting in its official role as the County's land planning agency) and one single public hearing before the governing board (Board) as an adoption hearing. This single hearing process allows for the concurrent hearing of the AUIR and CIE.

**Dependent Fire Protection Districts:** Prior to 2016 the County supported two dependent fire protection districts – Ochopee Fire Control and Isle of Capri Fire Rescue Services. The Isle of Capri service area has been merged into the reconfigured, independent "Greater Naples Fire Rescue District" [as of October 1, 2015 by HB 1265] and their update and inventory are no longer components of the AUIR.

**Schools:** The Schools section of the 2016 AUIR/CIE stands as a unique component. A summary of the School District Five-Year Capital Improvement Plan is being provided for review by the CCPC. But when the special meeting is held to discuss the AUIR, the School District's Capital Improvement Program (CIP) will already have been approved by the School Board, as required by the Florida Department of Education. The proposed School CIP has been reviewed by County staff in conjunction with School District staff to ensure no inconsistencies exist with the timing of new facilities and required infrastructure. The District's five-year CIP includes the construction of an addition to the existing Immokalee High School and the planning and engineering phases for a new high school. It should be noted that while the Schools component is included as part of the Category "A" facilities which dictate the concurrency management system for the County, concurrency management for schools is administered by the School District. **The recommendation sought from the CCPC related to the School District's proposed CIP is for a recommendation to include the District's CIP by reference within the CIE and that no inconsistencies are contained within the District's CIP compared against the other planned capital improvements within the AUIR or corresponding CIE.**

**Levels of Service Appropriateness:** As indicated within the Objective portion of this staff report, the AUIR provides the platform for the County to make evaluations and recommendations regarding the appropriateness of the County's current levels of service and levels of service standards. The process of capital improvement programming for the County is a linear equation for most components of the AUIR, (new population x level of service standard = Capital Improvement). **This equation is the only justification required of the proposed capital improvement.** It should be noted that Public Utilities, Stormwater Management, and Transportation have developed a more complex formula and system for maintaining levels of service which dictates capital expansion, but the basic premise of additional demand requiring new improvements is the underlying fundamentals of the equation.

The AUIR provides an opportunity on an annual basis for the CCPC to evaluate and provide recommendations on the appropriateness of the currently adopted levels of service and levels of service standards. Within each individual section, the year-to-year demand for service or

demands upon the system have been included to assist the advisory boards and the Board in this determination.

**Levels of Service Standards and Impact Fees:** It should be noted that impact fee studies and methodologies do not establish levels of service, but at a minimum, they set a base line where levels of service cannot fall below without invalidating the impact fee. A level of service standard that is established by an impact fee study represents the standard that has been achieved for a particular facility, but does not dictate that a local government cannot adopt a level of service that is higher than the achieved level of service. However, the difference between the achieved level of service and the adopted level of service will require supplemental funding from a source other than impact fees to fund the cost of the improvement. Government Buildings and EMS are two AUIR components in which the Impact Fee levels of service are below the AUIR adopted levels of service standards. As indicated, this discrepancy is resulting in a higher level of necessary supplemental general governmental funding.

It should be noted that the current level of service standards for most AUIR components are currently satisfied based upon the levels of service standards and current population levels, but the population growth over the past four years has begun to deplete the available capacity of the respective infrastructure and service providers. Based upon this diminishing capacity, the due diligence process to bring about the next iteration of system expansion has begun and will result in a continued growth in the revenues needed to maintain the levels of service standards for the system providers.

**Population:** The population projections utilized with the 2016 AUIR are based upon prior Board policy direction and acceptance from the State of Florida Department of Economic Opportunity (DEO). The population method utilizes the Bureau of Economic and Business Research (BEBR) Medium Range projections for the entire projection period with a 20 percent seasonal adjustment factor applied to permanent population projections. The chart below is a comparison of the past six years of projected permanent population growth.

AUIR Year	BEBR Estimate	Permanent Population Following 5-Year BEBR Growth Projections					5-Year Growth Percent	Growth Percent Annualized
2011	327,062	332,699	338,433	344,267	350,200	356,788	9.09%	1.82%
2012	328,339	332,893	337,446	342,000	348,720	355,440	8.25%	1.65%
2013	335,405	341,055	346,800	353,792	360,925	368,202	9.78%	1.96%
2014	338,728	345,100	351,647	358,318	365,116	372,042	9.84%	1.97%
2015	346,371	352,771	359,289	365,927	372,688	379,084	9.44%	1.89%
2016	353,936	360,846	367,892	375,074	381,722	387,814	9.57%	1.91%

The above table illustrates how 2016 provides a sixth year in which the annualized growth rate is projected at under two percent of the total population. This continued outlook reinforces the new growth reality for the County. The recalibration of Collier County's population through the 2010 Census had provided additional capacity to each of the AUIR/CIE population based systems, but as noted, the population added since 2010 continues to erode this capacity. As such, each of the AUIR providers continue the due diligence process for their next system expansion. It should be noted that the population increase for the five year population projection period totals 33,878 or

6,776 per year. The 6,776 of annual new population, utilizing the County's average 2.38 person per household rate, translates to **2,847** new dwelling units (assuming the new population were housed only by new units and not existing inventory). Based upon the CO data compiled by Growth Management for the 2015-16 fiscal year, **3,325** units were completed. These facts are provided to better evaluate the market's response to the demand for new housing units.

**FISCAL IMPACT:** Revenues are required to fund the CIE projects proposed in the 2016 AUIR/CIE for the FY16-17 thru FY20-21 planning period to maintain financial feasibility of scheduled Category "A" facility improvements. These funds must be made available by the Board of County Commissioners or fall within the Board's statutory general governmental taxing authority. Current and Proposed revenues needed to fund public facility construction/expansion for the FY16-17 thru FY20-21 CIE planning period are set forth in each respective capital facilities section of the 2016 AUIR/CIE update. Project expenditures in excess of estimated impact fee, gas tax, and user fee revenues receipts and funded bonds are reflected as being augmented by general governmental sources in the body of this document. General governmental sources are those existing sales tax revenues and other state shared revenues, or ad valorem allocations at the Board's discretion. Note that all projects identified within the Category "A" facilities have identified funding for the improvement. When funding sources are not identified, the Board is provided five options to address the situation by Policy 2.9 of the Capital Improvement Element.

1. Remove through a plan amendment facility improvements or new facilities from the adopted Schedule of Capital Improvements that exceed the adopted levels of service for the growth during the next five (5) fiscal years;
2. Remove from the adopted Schedule of Capital Improvements through a plan amendment facility improvements or new facilities that reduce the operating cost of providing a service or facility but do not provide additional facility capacity;
3. Where feasible, transfer funds from a funded non-Capital Improvement Element capital project in order to fund an identified deficient Capital Improvement Element public facility. The resulting revisions shall be reflected in the required annual update;
4. Lower the adopted level of service standard through a plan amendment for the facility for which funding cannot be obtained; and/or
5. Do not issue development orders that would continue to cause a deficiency based on the facility's adopted level of service standard (LOSS).

It should be pointed out that all of Category "B" facility improvements, with the exception of the dependent fire district, required loans from general governmental sources to meet the necessary revenue (option 3 above). Additionally, it should be noted that to fund the proposed five-year improvements contained within this year's CIE will require the Board to utilize Debt Service, or to initiate options four and/or five, identified above. The spreadsheets detailing the revenue and debt service for the AUIR divisions/departments for the five-year CIE period, as well as the long term debt financing schedules, have been provided within the AUIR/CIE book appendix.

**RECOMMENDATION:** That the Collier County Planning Commission in the form of recommendations to the Board of County Commissioners:

1. Accept and approve the attached document as the 2016 Annual Update and Inventory Report on Public Facilities.

2. Give the Board direction by separate motion and vote on Category "A", "B" and "C" facilities relative to projects and revenue sources, with Category "A" facilities set forth for inclusion in the FY16-17 Schedule of Capital Improvements of the Annual CIE Update and Amendment.
3. Provide a recommendation for the School District's CIP to be included in the FY16-17 Schedule of Capital Improvements of the Annual CIE Update and Amendment by reference.
4. Consider a recommendation to the Board upon an alternative LOSS for individual components of the AUIR where deemed appropriate.
5. Forward the GMP CIE Schedule of Capital Improvements update to the Board with a recommendation to adopt.

## **CONTENTS**

- **COUNTY ARTERIAL AND COLLECTOR ROADS & BRIDGES – SUMMARY**
- **ATTACHMENT A: FIVE YEAR REVENUES – PREVIOUS VS. CURRENT AUIR**
- **ATTACHMENT B: TRANSPORTATION SYSTEM EXISTING CONDITIONS REPORT**
- **ATTACHMENT C: PERCENTAGE CHANGE IN PEAK HOUR DIRECTIONAL VOLUME FROM PREVIOUS YEAR – MAP**
- **ATTACHMENT D: PROPOSED TRANSPORTATION 5-YEAR WORK PROGRAM**
- **ATTACHMENT E: ROAD FINANCING PLAN UPDATE**
- **ATTACHMENT F: TRANSPORTATION PLANNING DATABASE TABLE**
- **ATTACHMENT G: DEFICIENT ROADS REPORT UPDATE**
- **ATTACHMENT H: PROJECTED DEFICIENT ROADS – MAP**
- **ATTACHMENT I: TRANSPORTATION CONCURRENCY MANAGEMENT AREA REPORT – EAST CENTRAL TCMA AND NORTHWEST TCMA**
- **ATTACHMENT J: ACTIVITY REPORT ON CONTINUING PROJECTS UNDER CONTRACT**

## 2016 AUIR FACILITY SUMMARY

**Facility Type:** County Arterial and Collector Roads (Category A)

**Level of Service Standard:** Variable - "D" or "E"

**Unit Cost:** Variable (Average = \$4,735,979/ lane mile) Per Current Approved Transportation Impact Fee

Recommended Work Program FY 17-21	\$365,370,000
Recommended Revenues FY17-21	\$365,370,000
Five-Year Surplus or (Deficit)	\$0

1. Existing Revenue Sources:

A. Current Revenues CIE FY 17-21

Impact Fees	\$48,900,000
Gas Taxes	\$96,735,000
General Fund 001/111	\$63,000,000
Grants/Reimbursements/DCAs/Interest	\$11,799,000
Unfunded needs	<u>\$129,353,000</u>
SUB TOTAL	\$349,787,000

Carry Forward	\$16,958,000 *
Less 5% Required by Law	<u>(\$1,375,000)</u>
TOTAL	\$365,370,000

2. Supplemental Revenue Sources:

A. Alternative I

None Required

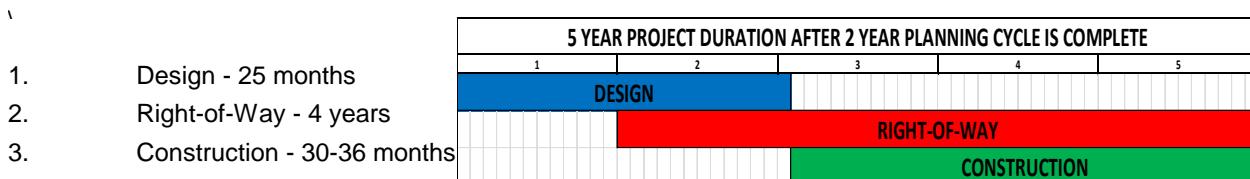

B. Alternative II

None Required

Recommended Action:

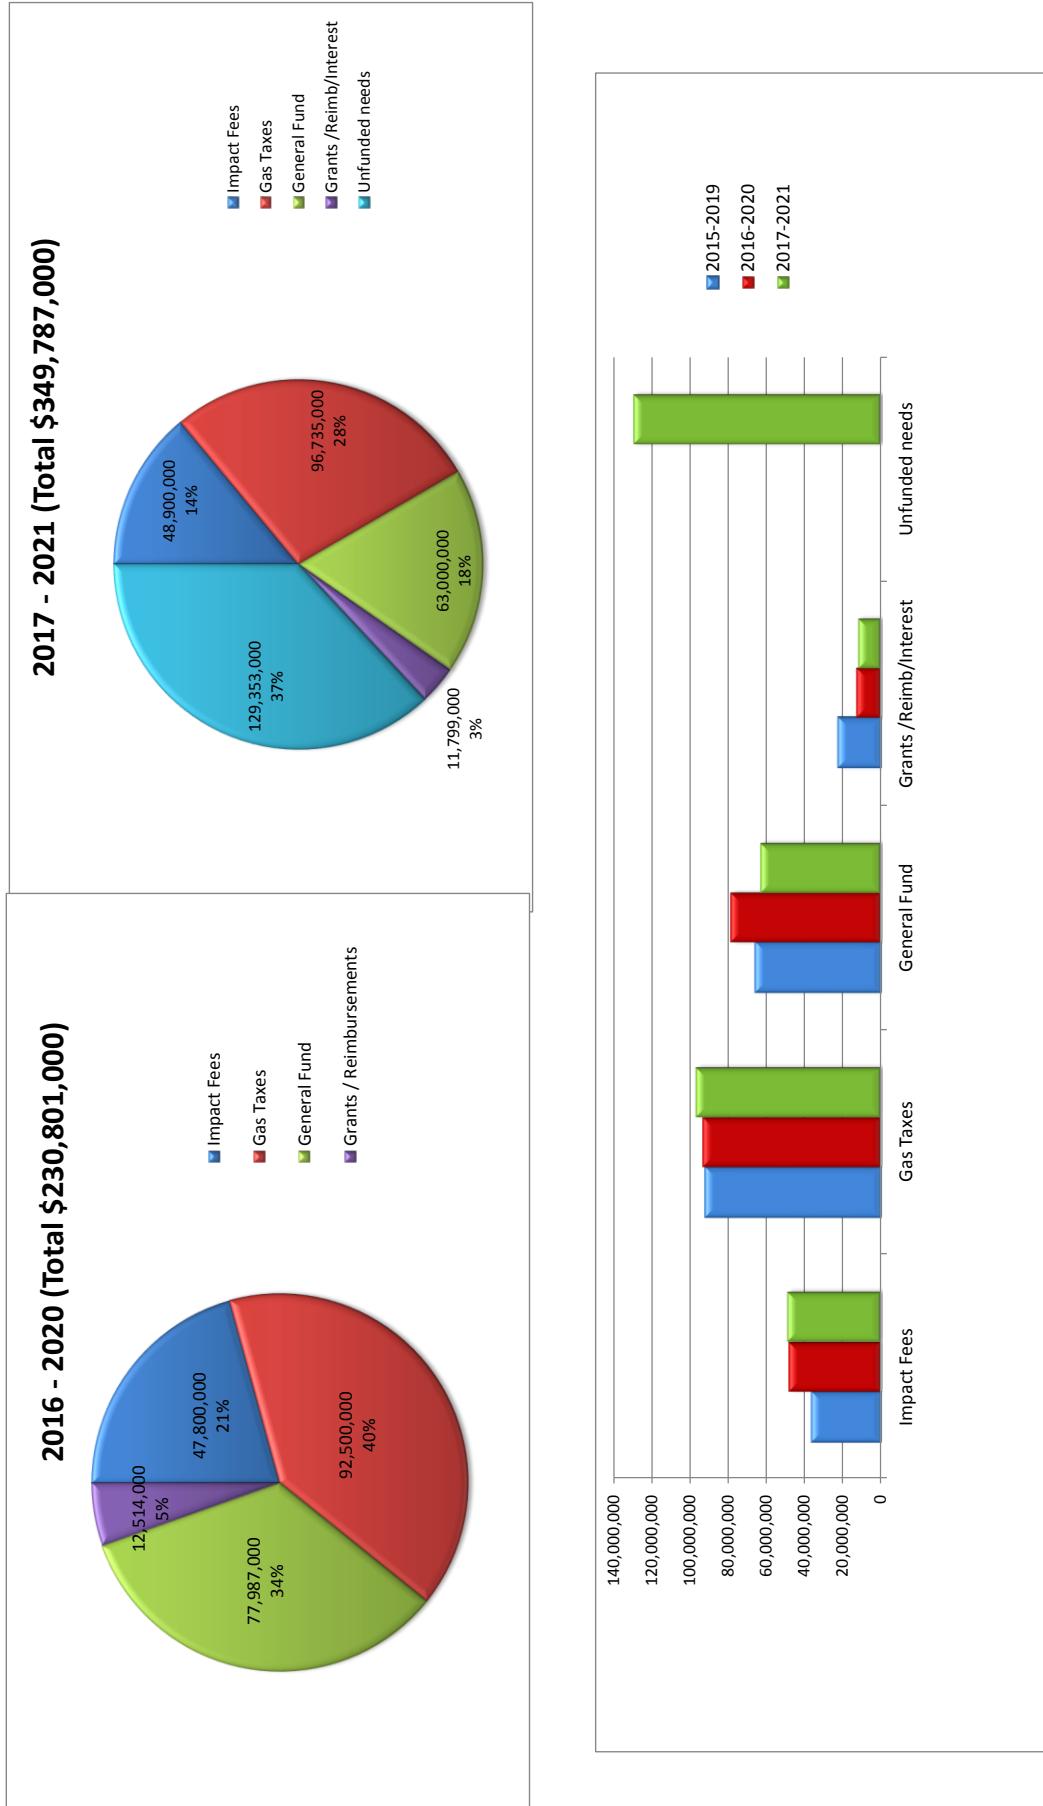

That the BCC direct the County Manager or his designee to (1) explore utilization of Collier County specific local data in lieu of FDOT data for the determination of peak hour, peak direction and seasonal factors (2) investigate possible debt service to be presented during the FY 17/18 budget process to provide revenue for unfunded needs and (3) include County road projects appearing on "Proposed Transportation Five-Year Work Program," (Attachment D), as detailed in the "Collier County Transportation Planning Database" (Attachment F), in the next Annual CIE Update and Amendment with the application of revenues outlined on the Road Financing Plan

\* Carry Forward includes the budgeted FY17 Carry forward and does not include project funding encumbered in prior fiscal years. The actual Carry Forward number that includes the roll of encumbrances is not available until after October 1, 2016. Attachment J provides a snapshot of prior year FY16 project activity as of June 30, 2016 for continuing projects. Project costs are generally paid out over the following schedule for phases (average time for payout):

**Note:** FY 2016 Revenues based on current adopted Impact Fee Schedule, projected gas tax revenues, budgeted general fund transfer, and approved grants and developer contribution agreements. Expenditures are based on current unit cost.

## Five Year Revenues: 2015 AUIR vs. 2016 AUIR

\*Charts do not include Carry Forward of \$ 16,958,000 or a negative Revenue Reserve of \$ 1,375,000.

## Attachment “B”

### **TRANSPORTATION EXISTING CONDITIONS REPORT – 2016**

#### **Objective**

To provide the Board of County Commissioners with an “existing conditions” analysis of the transportation system in Collier County.

#### **Purpose**

This analysis is provided to assist in the preparation of the Annual Update and Inventory Report (AUIR), and more specifically to assist in the determination of adequate (transportation) public facilities and to guide budgeting and project programming in the CIE.

#### **Considerations:**

- The traffic counts are collected on an annual, seasonal or quarterly basis, and are factored as needed to determine a peak hour peak directional volume. The factors used include a directional factor and a seasonal factor that varies depending on the week that the traffic count was conducted. These factors are provided by the Florida Department of Transportation (FDOT). Now that Collier County has a robust traffic collection system, staff would like to review to determine if development of Collier County specific factors is appropriate.
- The Level of Service (LOS) threshold volumes are calculated using ARTPLAN and HIGHPLAN software. Measured volume is based on the 250<sup>th</sup> highest hour, which essentially equates to the 100<sup>th</sup> highest hour after omitting February and March data, consistent with the Growth Management Plan and Land Development Code provisions. The remaining capacity is based on the difference between the LOS threshold volume and the calculated existing plus trip bank volume.
- The AUIR deals with system capacity and maintaining the established LOS through our Concurrency Management System. As the system expands, there is a growing need to focus our attention on the condition of existing facilities and the demand for Operations and Maintenance (O&M) funding. Our bridges and culverts are approaching, or are at their 50 year life-cycle. Over 250 additional lane miles of urban and rural, arterial and local roads have been added to the county system for maintenance since 2000. Historical funding for O&M has not addressed industry standards for anticipated life-cycles which are 6 to 8 years for urban roadways and 12 to 15 years for rural roadways. Gas taxes are already at the maximum allowed by statute. Complicating this issue is the reliance on impact fees as directed by our “growth pays for growth” policy which can only be used to add additional capacity or new lane miles to the system. The prior aggressive program to add capacity allowed existing system mileage to be rebuilt and the mileage to be maintained throughout the construction cycle by the contractor. Volatile impact fee rates and revenues alone cannot sustain a multi-year capital program that provides improvements concurrent with the impacts of development. Capacity expansion projects require a multi-year funding plan in order to meet the 7 year construction cycle that includes: planning, design, ROW acquisition, permitting and construction. LOS standards already set at the lowest acceptable levels of “D” or “E”.
- Unfunded needs have been shown in this document. Per prior budget discussions it has been noted that it may become necessary to take on debt to provide for a source of funding for unfunded needs. If debt service is not pursued, projects such as Vanderbilt Beach Road Extension and Veterans Memorial Parkway (necessary relievers to Immokalee Road) and new bridges critical for the mobility of residents and reduction in emergency service response times on 16<sup>th</sup> Street and 47<sup>th</sup> Street Bridges would be further delayed.

## **Attachments**

Attached is the 2016 Collier County Transportation Planning Database table, which incorporates the proposed FY 17 to FY 21 Capital Improvement Program (CIP).

## **Observations**

Of the 129 stations (covering 141 unique Segment ID's and excluding those in the City of Naples) collecting traffic counts in the 2015/2016 program, the average increase in measured overall volume between 2015 and 2016 was 2.54%, system-wide. By comparison, the average increase between 2014 and 2015 reported in last year's AUIR was 4.85%.

When reviewing only higher capacity roadway segments in the County's network (only those with capacity over 1,000 vehicles per hour in the peak direction during the peak period) an average increase of 1.94% was experienced over 2015.

For the 2015/2016 traffic counts, 38 segments reflected a decrease, and 82 segments reflected an increase over the previous year (21 remained unchanged). Listed below are the numbers and corresponding percentages for the count stations, including the percentage changes between 2015/2016:

- 6.4% (9 segments) show an increase greater than 20% compared to 2015
- 10.6% (15 segments) show an increase of 10-20% compared to 2015
- 9.9% (14 segments) show an increase of up to 5-10% compared to 2015
- 65.2% (92 segments) show an insignificant change of -5% to 5% compared to 2015
- 2.1% (3 segments) show a decrease of 5-10% compared to 2015
- 0.7% (1 segment) show a decrease of 10-20% compared to 2015
- 5.0% (7 segments) show a decrease of greater than 20% compared to 2015

Florida Department of Transportation counts traffic on the segments of I-75 between each interchange each year. A review of the most recent average annual growth rates for the last 2 and 5 year timeframes depicts an increase in traffic along all segments of I-75 in the urban area as shown in **Table 1**.

**TABLE 1: I-75 Historical Annual Average Daily (AADT) Traffic Volumes (2-Way)**

	North of Immokalee Road	North of Pine Ridge Road	North of Golden Gate Pkwy	West of Collier Blvd
2015	92,399	76,809	70,000	40,500
2014	85,506	70,332	64,000	36,500
2013	79,834	65,423	58,000	34,500
2012	75,022	62,897	55,000	31,000
2011	74,500	61,224	55,000	31,500
2010	75,500	59,784	55,000	32,500
2009	77,000	58,578	32,500	34,000
Total % Increase 5-Year 2010-2015	17.5%	28.5%	27.3%	24.6%
Avg Annual % Increase 5-Year 2010-2015	4.1%	5.1%	4.9%	4.5%
Avg Annual % Increase 2-Year 2013-2015	7.6%	8.4%	9.9%	8.3%

Source: Florida Department of Transportation

Note:

1. Some count stations experienced significant year-to-year fluctuations due to construction avoidance.
2. Stations and segment ID's may not correspond as some count stations serve multiple segments.

**GRANT FUNDING SUMMARY**

	FY17	FY18	FY19	FY20	FY21
8th Street Bridge	9,549				
Total Grants	9,549	0	0	0	0

**Notes:**

- 1) Expenditures: Based on current cost estimates.
  - 2) Revenues: Based on current adopted Impact Fee Schedule, projected gas tax revenues, budgeted general fund transfer, and approved grants and developer contribution agreements.
  - 3) Project Costs may be offset based on future development agreements, grants or other funding sources.
- \*\*Debt Service and Gas Tax revenue are not tied to budget.  
\*\*\*General Fund Dollars have been increased in FY 18 for Big Corkscrew Access Rd.  
"Highlighted projects are subject to debt scenarios to be discussed during upcoming budget workshops".

**Key:**

- |                  |                                  |
|------------------|----------------------------------|
| S = Study        | A = Advanced Construction        |
| D = Design       | I = Inspection                   |
| M = Mitigation   | AM = Access Management           |
| C = Construction | LP = SIB Loan Repayment to State |
| R = ROW          | CBO = Constructed By Others      |
| L = Litigation   | DBO = Designed By Others         |

**2015 AUR Update Deficiencies Report**

Listed below are the roadway links that are currently deficient or are projected to be deficient under the concurrency system within the next five years and the programmed and proposed solutions to solve these deficiencies

2016 Existing Deficiencies Based on Traffic Counts									
ID#	Map	Roadway	From	To	Trip Bank (117th)	Remaining Capacity	V/C	TCMA/TCEA	Solutions
123.1	Golden Gate Boulevard	18th Street NE/SE	Everglades Boulevard		0	-70	106.9%	No	Programmed for CST in the CIE
2016 Existing Deficiencies Based on Traffic Counts + Trip Bank & 177th Vested Trips									
ID#	Map	Roadway	From	To	Trip Bank (117th)	Remaining Capacity	V/C	TCMA/TCEA	Solutions
67.2	Pine Ridge Road	Livingston Road	I-75		220	-170	105.7%	Yes	Part of East Central TCMA - Pursue Detailed Capacity/Operational Analysis of Intersections and Interchange
132.0	Randall Boulevard	Immokalee Road	Everglades Boulevard		81	-31	103.4%	No	Immokalee Rd @ Randall Blvd Intersection Improvement PD&E Underway;
Projected Deficiencies 2017-2021 (Traffic Counts + Trip Bank & 177th Vested Trips)									
ID#	Map	Roadway	From	To	Trip Bank (117th)	Remaining Capacity	V/C	TCMA/TCEA	Solutions
23.0	Goodlette-Frank Road	Immokalee Road	Vanderbilt Beach Road		58	82	91.8%	Yes	Projected failure 2020; Northwest TCMA - Continue to Monitor; Evaluate for CIE Funding in 2021-2025
36.2	Collier Boulevard	Wal-Mart Driveway	Manatee Road		122	144	92.8%	No	Projected failure 2021; Widening to 6-Ln; PD&E funded (15/16); State Funded Improvement Proposed in MPO Cost Feasible Plan 2026-2030
41.2	Immokalee Road	Goodlette-Frank Road	Airport Road		76	504	83.7%	Yes	Projected failure 2021; Northwest TCMA - Pursue Detailed Capacity/Operational Analysis
42.1	Immokalee Rd	Airport Road	Livingston Rd.		24	216	90.4%	Yes	Projected failure 2021; Northwest TCMA - Pursue Detailed Capacity/Operational Analysis
62.0	Old US 41	US 41	Lee County Line		11	29	97.1%	Yes	Projected failure 2018; Widening to 4-Lanes; PD&E Study Programmed by FDOT; Pursue State Funding
67.1	Pine Ridge Road	Airport Road	Livingston Rd.		149	191	93.6%	Yes	Projected failure 2020; East Central TCMA - Pursue Detailed Capacity/Operational Analysis and Alternative Corridors
Projected Deficiencies 2022-2026 (Traffic Counts + Trip Bank & 177th Vested Trips)									
ID#	Map	Roadway	From	To	Trip Bank (117th)	Remaining Capacity	V/C	TCMA/TCEA	Solutions
19.0	Golden Gate Parkway	Goodlette-Frank Road	Airport Road		9	511	84.5%	No	Projected failure 2025 - Continue to Monitor;
20.2	Golden Gate Pkwy	Livingston Road	I-75		2	408	87.6%	Yes	Projected failure 2023; East Central TCMA - Continue to Monitor; Interchange Improvements Proposed in MPO Cost Feasible Plan 2021-2025
22.0	Golden Gate Parkway	Santa Barbara Boulevard	Collier Boulevard		53	297	83.5%	Yes	Projected failure 2026; East Central TCMA - Continue to Monitor and Review with Future I-75 Interchange Operation Analysis Report
26.0	Goodlette-Frank Road	Golden Gate Parkway	US 41 (Tamiami Trail)		0	450	83.3%	Yes	Projected failure 2026; Within the City of Naples; Pursue Detailed Capacity/Operational Analysis
33	Collier Boulevard	I-75	Davis Boulevard		359	431	83.0%	Yes	Projected failure 2024; Continue to Monitor; Interchange Improvements Scheduled by FDOT 2020/21
43.1	Immokalee Road	I-75	Logan Boulevard		474	616	82.4%	No	Projected failure 2024 - Continue to Monitor; Interchange Improvements Proposed in MPO Cost Feasible Plan 2021-2025; Anticipate Future VBR Extension to Reduce Volumes
43.2	Immokalee Road	Logan Boulevard	Collier Boulevard		603	637	80.1%	No	Projected failure 2026; Continue to Monitor; Anticipate Future VBR Extension to Reduce Volumes
66.0	Pine Ridge Road	Shirley Street	Airport Road		220	330	88.2%	Yes	Projected failure 2023; Northwest TCMA; Continue to Monitor; Pursue Detailed Operational Analysis if Warranted
88.0	SR 82	Lee County Line	SP 29		0	90	88.8%	No	Projected failure 2023; Widening to 4-Ln; MPO Priority for State SIS Funding; Pursue State Funding
92.0	Tamiami Trail East	Airport Road	Rattlesnake Hammock Road		269	391	86.5%	Yes	Projected failure 2025; Included in South US 41 TCEA; Continue to Monitor; Pursue Detailed Operational Analysis if Warranted
99.0	Tamiami Trail North	Wiggins Pass Road	Immokalee Road		55	485	84.4%	Yes	Projected failure 2025; Northwest TCMA; Continue to Monitor

## **2016 AUIR STORMWATER MANAGEMENT SYSTEM FACILITIES SUMMARY**

**Facility Type:** County Maintained System of Stormwater Management Canals & Structures  
(Category A)

**Level of Service (LOS) Standard:** Varies by individual watershed

### **Existing System within Collier County:**

Based on current Collier County GIS Database

Existing Major Canals	465 Miles
-----------------------	-----------

### **System Maintained By Collier County:**

Based on current Collier County GIS Database

Existing Major Canals	110 Miles
Proposed Reconstruction/Additions within 5-Year Planning Period	2.8 Miles
Existing Water Control Structures	63
Proposed Replacement/Additional Structures within 5-Year Planning Period	6

### **Stormwater Program Summary FY 2017 thru FY 2021**

Recommended Work Program	\$ 33,135,000
Recommended Operating Costs	\$ 5,402,000
Interest/Misc	\$ 142,000
Recommended Revenues	\$ 38,679,000
Five-Year Surplus or (Deficit)	\$ 0
<b>1. Existing Revenue Sources FY 17-21</b>	
General Fund (001)	\$ 13,406,000
General Fund (111)	\$ 22,150,000
Big Cypress Basin (BCB) Grant	\$ 800,000
Dep. of Environmental Protection (DEP) Grant	\$ 375,000
BP/RESTORE Act	\$ 1,500,000
Interest/Misc	\$ 250,000
Carry forward	\$ 208,000
Less 5% required by law	\$ (10,000)
Total	\$ 38,679,000

### **2. Supplemental Revenue Sources**

None Required

### **Recommended Action**

That the BCC direct the County Manager or his designee to include County stormwater projects appearing on the proposed "Stormwater Five - Year Work Program," (Table 1) as detailed in the attached Project Descriptions and prioritized by the Stormwater Project Prioritization Process in the next Annual CIE Update and Amendment with the application of revenues as outlined in the Program Revenue section of Table 1; and that it approves the proposed 2016 Stormwater Management System AUIR and adopt the CIE Update for FY2016/17 – FY2020/21.

### **EXISTING MAJOR CANAL SYSTEMS AND CONTROL STRUCTURES**

Currently, the County maintains 110 miles of canal (including ditches) and 63 stormwater control structures. Figures 1 and 2 show the locations for all major canals (including ditches) and stormwater control structures maintained by the County, respectively. Table 2 shown in Attachment C, identifies all canals and ditches within Collier County.

The County, working collaboratively with South Florida Water Management District, provides easements over the primary and secondary watercourses, in accordance with the Cooperative Agreement between Collier County and South Florida Water Management District, dated October 13, 2000, as amended. Table 3 identifies control structures maintained by Collier County.

Each control structure (Table 3) has an overall condition rating based on a 2012 evaluation. The condition of the structure is based on two types of inspections: Structural and Civil. The overall condition rating ranks from C-1 (no action needed) to C-5 (critical repair or replacement needed immediately). The ratings are based on identified deficiencies and the potential resulting impact. Table 4 explains each rating. Design of three (3) structure replacements has been completed and construction planning is currently underway.

## **FY 17 – 21 PROJECT DESCRIPTIONS**

### **Countywide Programs, Planning & Maintenance**

#### **1. Stormwater Feasibility and Preliminary Design (P/N 51144)**

Long range strategic planning for future program progression, capital improvement project identification and prioritization, specific basin issue evaluation and funding appropriation analysis. Individual Project Feasibility Studies will be funded from this Project and guided by the project ranking criteria established in the Planning process identified in Attachment A.

#### **2. NPDES MS4 Program (P/N 60121)**

Continued development of and compliance with the federally mandated National Pollutant Discharge Elimination System (NPDES) permitting program for the County operated Municipal Separate Storm Sewer System (MS4).

#### **3. Secondary System Repair (P/N 60094)**

Planning and execution on an as-needed or contingency basis of unexpected necessary system infrastructure repairs or replacements. These efforts are characteristically slightly more complex than typical operation and maintenance repairs, requiring some basic planning, permitting, design, and construction oversight

#### **4. Stormwater Maintenance (P/N 60194)**

Project includes funding of various maintenance activities associated with certain existing stormwater assets.

### **Infrastructure & Capacity Projects**

#### **5. LASIP (P/N 51101)**

Major improvements to the Lely Canal, Lely Branch Canal, and Lely-Manor Canal Systems in the East Naples area. Construction of the last three (3) segments, of the original 27 component project which began in 2006, is underway and will be complete in 2017. Subsequent to the project's overall completion, funding will continue to provide for recurrent maintenance and monitoring, assuring total system effectiveness.

#### **6. Golden Gate City Outfall Replacements (P/N 51029)**

Project is to improve collection, treatment and conveyance of urban stormwater runoff by restoring and upgrading an antiquated system installed in early 1960s within the four-square-mile area known as Golden Gate City (GGC). The GGC canal system flows into Naples Bay via the Main Golden Gate Canal. The project includes the replacement and improvements to existing aging infrastructure such as the removal of old catch basins replaced with ditch bottom inlets with grates to catch debris, the addition of sumps at catch basins, re-grading and sodding of swales to prevent erosion, and providing water quality improvement.

#### **7. Gateway Triangle Improvements (P/N 51803)**

Construction of the pond and pump station has been completed. The pumping station is designed to discharge treated stormwater runoff to two different locations: one south of US 41, and one into a new stormwater system along the west side of Brookside Drive north of Davis Blvd (north outfall). Currently, the north outfall is closed (Brookside). A study has

been completed demonstrating that utilization of the Brookside outfall will have no adverse impacts to the adjacent homes or streets in the neighborhood. Next steps are thorough vetting with homeowners.

**8. Pine Ridge Stormwater Management Improvements (FKA Mockingbird Lake) (P/N 60126)**

This project includes replacement and improvements to existing aging infrastructure in Pine Ridge Estates such as catch basins, culverts and re-grading and sodding of swales.

**9. Haldeman Creek Weir Replacement (P/N 60103)**

This project includes the design and replacement of an existing surface water management control structure located at the freshwater/saltwater interface of Haldeman Creek just north of US 41 in East Naples. The structure has reached the end of its useable life cycle and is in need of full replacement; it has structural and mechanical deficiencies, as well as operational and maintenance issues and thus cannot meet stormwater management goals. Haldeman Creek flows into Naples Bay just south of the Royal Harbor neighborhood.

**10. Pine Ridge Canal Weir Replacement (P/N 60119)**

The weir has current documented structural and mechanical deficiencies as well as operational and maintenance issues (2012 CH2MHill Report). This project has been initiated to first evaluate the existing conditions of the basin, verifying peak discharge rates and stages, and based on findings, recommend the degree of necessary remediation. Subsequent efforts will include design, permitting and construction activities necessary for weir replacement.

**11. Vanderbilt Drive Area Stormwater Improvements (P/N 60122)**

This project will include reconstruction of the roadside swale along the east side of Vanderbilt Drive adjacent to Naples Park, and in the Conner's Sub-division (west of Vanderbilt Drive). Design has been completed. Construction expected to begin in FY17.

**12. Immokalee Stormwater Improvements (P/N 60143)**

This project includes an update to the Immokalee Stormwater Master Plan, future stormwater treatment pond site feasibility analysis, coordination with the Lake Trafford Management Group, and the Immokalee Water and Sewer District. Future stormwater management improvement projects, as prioritized by the master plan update, will be fully coordinated and vetted with the Immokalee Community Redevelopment Agency.

**13. Naples Park Stormwater Improvements (P/N 60139)**

In coordination with the Public Utilities Division, this project will include water main and possibly sanitary sewer collection system replacements, this project is consideration of roadside swale stormwater management system reconstruction in conjunction with utility replacement work; includes all east-west streets in the Naples Park Subdivision.

**14. W. Goodlette-Frank Rd Area Stormwater Improvements (FKA Ridge St.) (P/N 60142)**

Project planning has begun in coordination with the City of Naples Wastewater Collection System improvements to address stormwater (flooding) problems and existing septic system failures during periods of high rainfall on several streets between Goodlette-Frank Road and US-41. Stormwater runoff from the area flows east into the upper Gordon River then to Naples Bay. Work will include water quality improvements designed to decrease nutrient concentrations in sensitive impaired receiving waters.

**15. Lely Branch Canal Weir (P/N TBD)**

Project will include the construction of a new weir just north of Rattlesnake Hammock Road to maintain historic dry season water levels in the area without reducing the conveyance capacity of the newly improved system –Lely Branch Canal. A feasibility analysis has been completed.

**16. Harbor Lane Brookside (P/N 60195)**

Funds are available to begin a survey of the existing street and stormwater management system.

**17. Gordon River Stormwater Improvements (P/N 60102)**

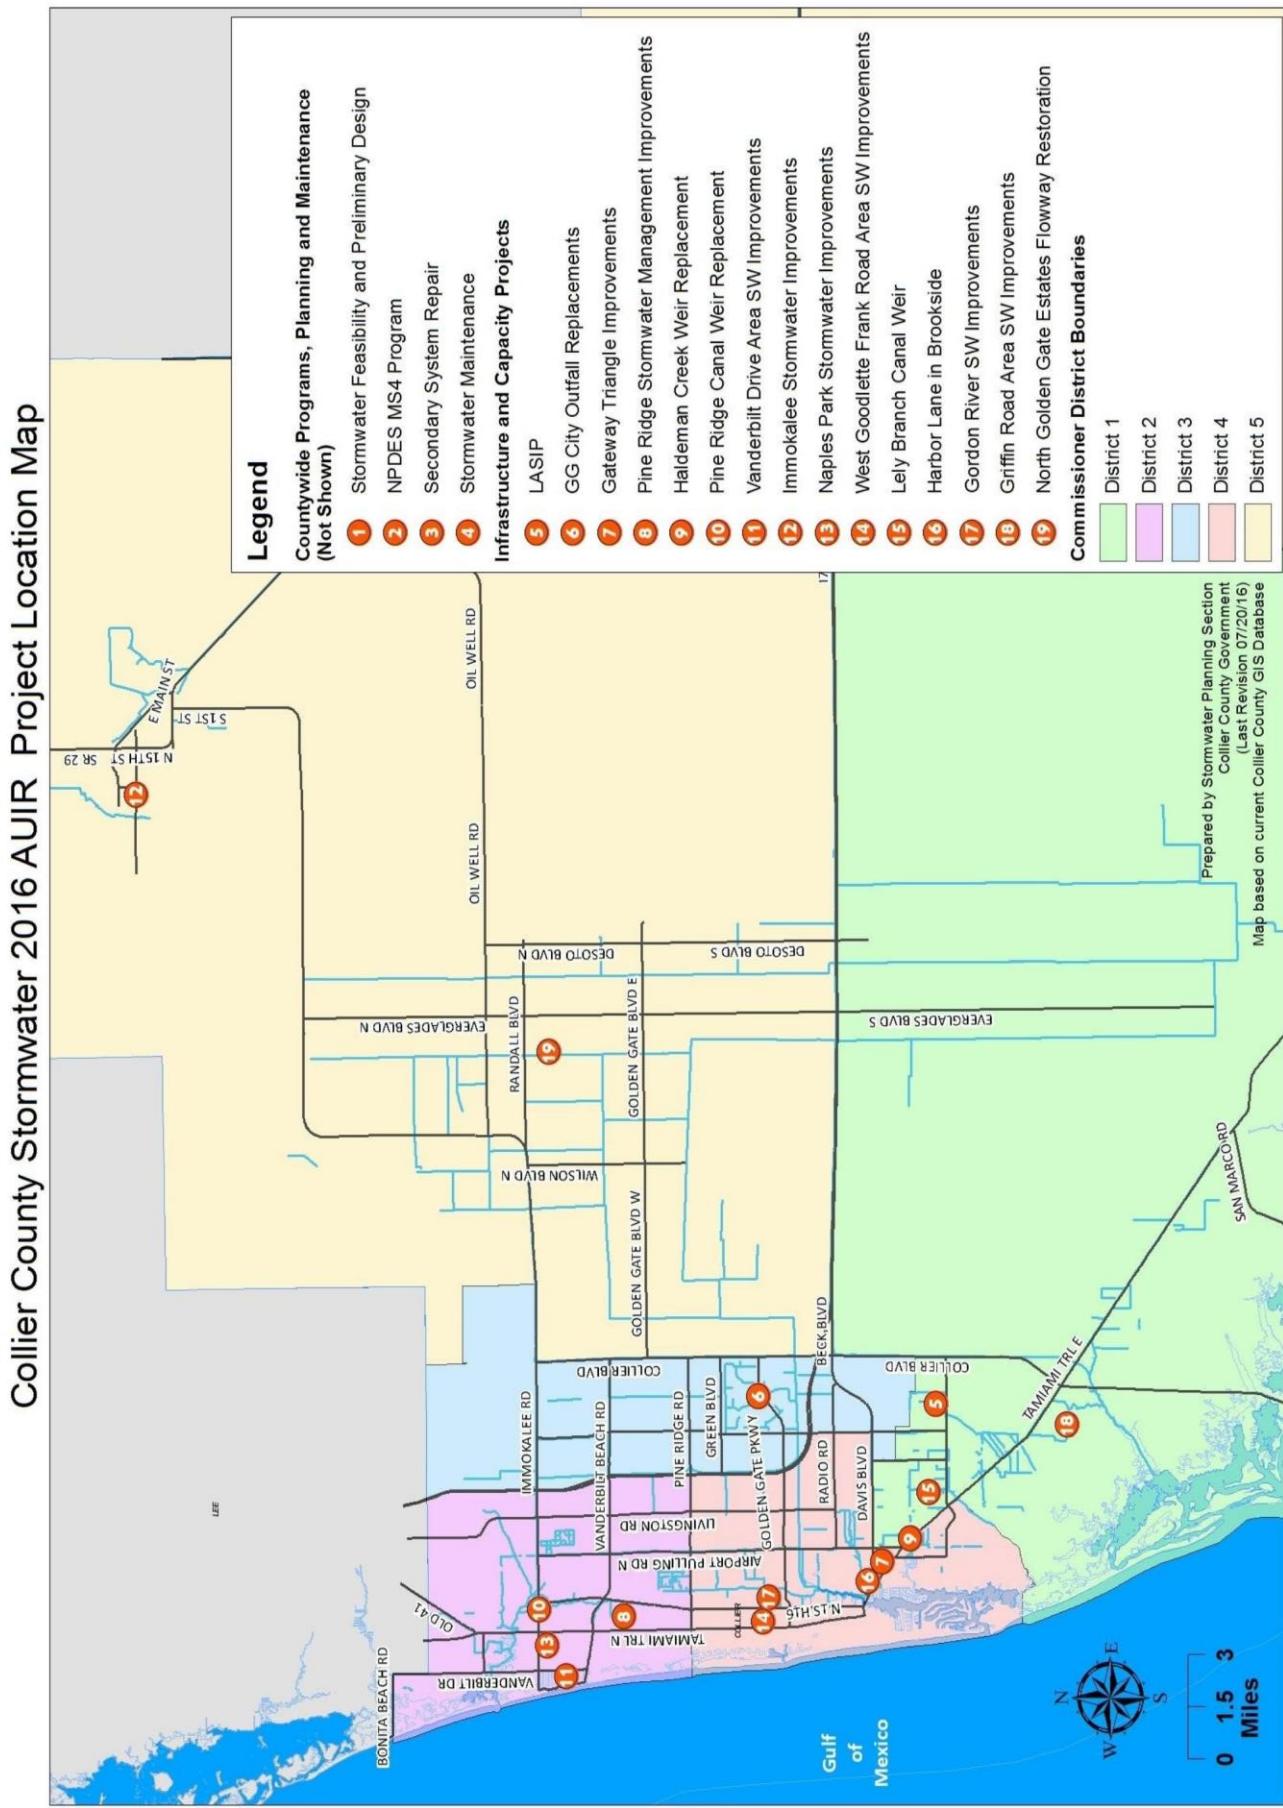

The project focus is on the northern-most portion of the Gordon River north of Golden Gate Parkway, upstream of the natural section of the Gordon River and Naples Bay. Work may include partnership with several surrounding golf courses, one or two water control structure replacements, exotic vegetation removal, and supplemental native vegetation plantings to improve water quality, flow conveyance and aquifer recharge.

**18. Griffin Road Area Stormwater Improvements (P/N 60196)**

The Griffin Road Area Stormwater Improvement Project is located near the southwestern terminus of Griffin Road in the East Naples area of Collier County off of US41 (Tamiami Trail) and Barefoot Williams Road. The project includes construction of a water quality treatment area on Rookery Bay National Estuarine Research Reserve property. The focus of the project is to provide water quality treatment facilities and an adequate stormwater outfall for the area to reduce frequency of flooding.

**19. North Golden Gate Estates Flowway (AKA GGWIP) (P/N 60127)**

Effort includes developing strategies to redirect stormwater runoff in the North Golden Gate Estates (NGGE) area currently conveyed to the canal system into surrounding low-lying wetland areas. The work includes analysis of potential linking of areas by multiple culvert installations under estates roads. Project benefits include City and County potable water well field recharge, reduction of fresh water flows into Naples Bay via the Golden Gate Main Canal, and hydrologic restoration of the existing wetlands in Golden Gate Estates.

**Figure 3: 2016 AUIR Project Location Map**

## Attachment "A"

### **COLLIER COUNTY STORMWATER MANAGEMENT PROJECT PLANNING PROCESS**

**Objective:** To adequately identify and prioritize stormwater management projects to include in the County's AUIR/5-year Plan and Budgeting process.

**Purpose:** To provide the Board County Commissioners with a general outline of the ongoing Project Planning and Prioritization Process.

**Considerations:** The Stormwater Management Project Planning Process identifies and prioritizes potential projects for advancement into the AUIR/5-year Plan and annual Stormwater Management budget process. Typically project feasibility studies are completed first. Studies are then used to rank the projects for eventual funding and construction within the County's AUIR/5-year Plan and annual budget process. The feasibility studies will also provide staff with better project cost estimates for preparing budget requests. Input from external stakeholders will also be used to recommend projects for the AUIR/5-year Plan.

#### **Plan Elements:**

➤ **Potential Project Database**

Staff has developed a Comprehensive Stormwater Needs database that contains all potential future stormwater improvement projects. Projects are provided from three main sources: customer complaint database, staff knowledge and Planning Studies. This database is periodically updated to reflect new information as projects are implemented and sources provide new potential projects.

➤ **Project Profiles**

Staff selects potential projects from the database to gather detailed information to develop Project Profiles. Project Profiles are based by first determining the Objective of the Project, Benefit Area and Preliminary Conceptual Cost. Once those three basic components are defined, staff can provide information regarding affected acreage and population, per parcel cost, per acre cost, per capita cost, and per \$1,000 of assessed value cost. A narrative explaining the objective, purpose and needs of the project is also provided in the Project Profile.

➤ **Scoring Committee and Project Ranking Criteria**

A Stormwater Planning Process Committee has been established to review and score the Project Profiles. The seven (7) committee members, all county staff, come from different departments such as Stormwater, Comprehensive and Floodplain Management Planning, Engineering, Road Maintenance, and Pollution Control. Scoring is based on four major aspects: Health and Safety, Project Feasibility, Project Support, and Environmental Benefits.

➤ **Feasibility Studies**

Top ranked Project Profiles are selected for Feasibility Studies which provide more detailed and secured information regarding the project's cost, life, and stages. Project Profiles are updated with information from the feasibility studies.

The Scoring Committee has ranked ten (10) projects; some current and ongoing, and some conceptual projects. The ranking and evaluation process and input from the committee has been deemed extremely useful and valid. As such, ranking information is considered and utilized in this current AUIR/5-year Plan.

**Attachment “B”**

**SYSTEM INVENTORY AND GIS DATABASE REPORT**

**Objective:** To maintain a complete and current inventory of all existing county maintained stormwater and surface water management system assets.

**Purpose:** To provide the Board of County Commissioners with an update on progress made to date with establishment of the Stormwater Management System Inventory GIS Database

**Considerations:** For the past four years staff has been identifying existing stormwater management assets and sequentially building the stormwater management system geodatabase. The database currently includes 100% of the main canals and ditches, water level, and flow control structures and 90% of the arterial roadway drainage infrastructure. Several hundred miles of collector and minor roadway swales, culverts and inlets are yet to be added to the dataset. They represent the majority of stormwater assets maintained on a day to day basis. All of the water control structures are field verified and have conditional ratings. Field verification is ongoing for the arterial roadway stormwater management infrastructure.

Current data collection is being coordinated with Operation and Maintenance staff (O&M) activities to the greatest extent possible. When data collection technicians log entries associated with geodatabase objects in advance of a scheduled O&M activity, subsequent O&M activity entries can then be connected to geodatabase objects. In this way, a work history for each asset is created that is now associated to geodatabase objects. Creating a work history for each asset can result in high level reporting such as required by the state for the County National Pollutant Discharge Elimination System Municipal Separate Storm Sewer System (NPDES MS4) Permit, Permit # FLR04E037. Some examples are pesticide sprayers accounting for chemical usage including location and acreage and sediment removal tied to asset type (inlet, culvert, and swale).

Other information being collected and added to the database includes information collected during the right-of-way permitting process, roadside assets in neighborhoods, roadside improvements completed as part of neighborhood stormwater improvements, remedial work or existing condition assessments (surveys), roadway outfalls to canals or tidal waters, secondary county roadway swales, culverts, inlets and manholes including all Golden Gate Estates roads and the urban county roads, and outfalls from private developments discharging into the County maintained system.

The existing Stormwater Management System Inventory GIS Database is substantial, functioning, and has become an important tool used daily by O&M staff as well as Stormwater Planning staff. All the data, maps and asset tables produced for this AUIR were generated using the database. The database is being used to capture information that is essential for mandated reporting to the state as part of the County's NPDES MS4 Permit requirements, as well as reporting for the County's participation in the National Flood Insurance Program Community Rating System (NFIP CRS). The effort to complete the database is ongoing and will continue for several more years. Updates will continue perpetually.

Table based on current Collier County GIS Database

**Table 4: Control Structure Inspection Rating System**

<b>Overall Rating</b>	<b>Description for the Overall Structure</b>	<b>Application</b>
C1	All old deficiencies noted from the previous inspection have been corrected.	Applied when no further action is recommended for the structure.
C2	Most old deficiencies noted from the previous inspection have been corrected.	Applied when the overall recommendation is to monitor minor deficiencies. Deficiencies will generally be re-evaluated at the next five-year inspection of the structure. Provide overall recommendation on when (timeframe) to monitor deficiencies previous to the next structure inspection cycle.
C3	Deficiencies and/or several old deficiencies noted in the last inspection have not been corrected.	Applied when the overall recommendation is to repair the structure during the next maintenance cycle or within 5 to 10 year capital repair schedule. Maintenance repairs are generally estimated to cost less than \$50,000; will not require engineering design.
C4	Serious deficiencies exist that if not immediately corrected may lead to or cause deterioration of the structure.	Applied when the overall recommendation is to elevate repairs to the County's five-year capital repair program. Includes repairs that are generally estimated to cost \$50,000 or more, will require engineering design, or should be repaired within a five-year period.
C5	Major deficiencies exist such that the structural integrity of the structure will probably not withstand a major flood event.	Applied when the overall recommendation is to elevate repairs to the County's capital repair program, but repairs should be conducted in the next cycle of repairs. Generally the next cycle of repairs would include repair design in the fiscal year following inspection with repair in the fiscal year following design (two-year process).
C5 Critical	Emergency deficiencies exist that must be addressed immediately. Deficiencies include those that impede operation of the structure or jeopardize public safety.	Applied when immediate repairs are recommended. Generally the County would respond by dispatching its Field Station personnel to triage the deficiency (e.g., block access to the structure, reduced structure operating capacity) until repairs could be affected. Responding County design engineers would be altered to fast track repairs if triage does not ameliorate the deficiencies.

\*\*TBD: Current condition not known at this time. Update upon next inspection.

**Attachment “D”**

**BASINS AND SUB-BASIN REPORT**

**Objective:** To guide the County’s Stormwater Management Program by utilizing a watershed management approach.

**Purpose:** To provide a general update on the basins/watersheds used for water resource management and planning within the County.

**Considerations:** The Stormwater Management Program began a new approach to water resource management with the BCC’s acceptance of the County Watershed Management Plan on December 13, 2011. The Plan provides assessment and management information for geographically defined watersheds including: analysis, actions, participants, and resources related to developing and implementing the Plan. Understanding issues on a basin by basin level allows for better quantitative analysis and program planning. The Board directed staff to implement the Plan as funding and resources became available. Staff continues to follow that directive when initiating Plan recommendations.

There are currently 51 basins in the Stormwater Management GIS database. Since 1990 (Ord. 90-10), the County has had a maximum allowable post-development stormwater runoff discharge rate of 0.15 cubic feet per second (cfs) per acre for all basins, with six (6) exception areas (basins) ranging from 0.04 to 0.13 cfs per acre. These more restrictive rates were established through modeling efforts that demonstrated the need to restrict flows from adjacent lands to the receiving canals. Stormwater discharge rates are limited so the rate at which runoff leaves a developed site will not cause adverse off-site (typically downstream) impacts.

In the development of the Watershed Management Plan (WMP), computer modeling was used to determine the maximum flow that can be conveyed by the various water management canal segments. Results from that effort indicated that various segments of the primary and secondary water management systems do not have the capacity to handle large storm events. Expansion or enlargement of this system to create additional system capacity is not a viable strategy for managing stormwater flows. One means of addressing this limited capacity is to restrict the maximum flow in the associated basins that feed into the canals. The WMP included recommendations to reduce the maximum allowable post-development discharge rates in several basins.

In addition to these recommendations in the WMP, two additional detailed stormwater management master plans, developed jointly by the South Florida Water Management District and the County for the Belle Meade and Immokalee areas, recommended further limiting the discharge rates for four (4) basins/sub-basins. Conditions may worsen in the future unless management actions are implemented to control the impact of subsequent changes to land use. In total, reducing maximum allowable post-development discharge rates in sixteen (16) basins/sub-basins will ensure adequate flood protection levels of service.

This report includes a listing of all basins with their respective acreage (Table 5); a map depicting all basins within the County (Figure 4); and, a map depicting six (6) of the basins that have restricted stormwater discharge rates per Ordinance 2001-27, and sixteen (16) additional basins with proposed restricted discharge rates (Figure 5).

A feasibility study and impact analysis is currently underway to examine the effects of the implementation of the discharge rate restrictions. Staff will meet with the Development Services Advisory Committee to discuss issues such as, but not limited to, redevelopment thresholds, vested future development rights, and incentives. Subsequent actions will include the review and recommendation of Growth Management Plan amendments and Land Development Code amendments (and/or amendments to the Code of Laws and Ordinances) by the Collier County Planning Commission and, the review and final action by the Board of County Commissioners.

### **Basins and Discharge Rates**

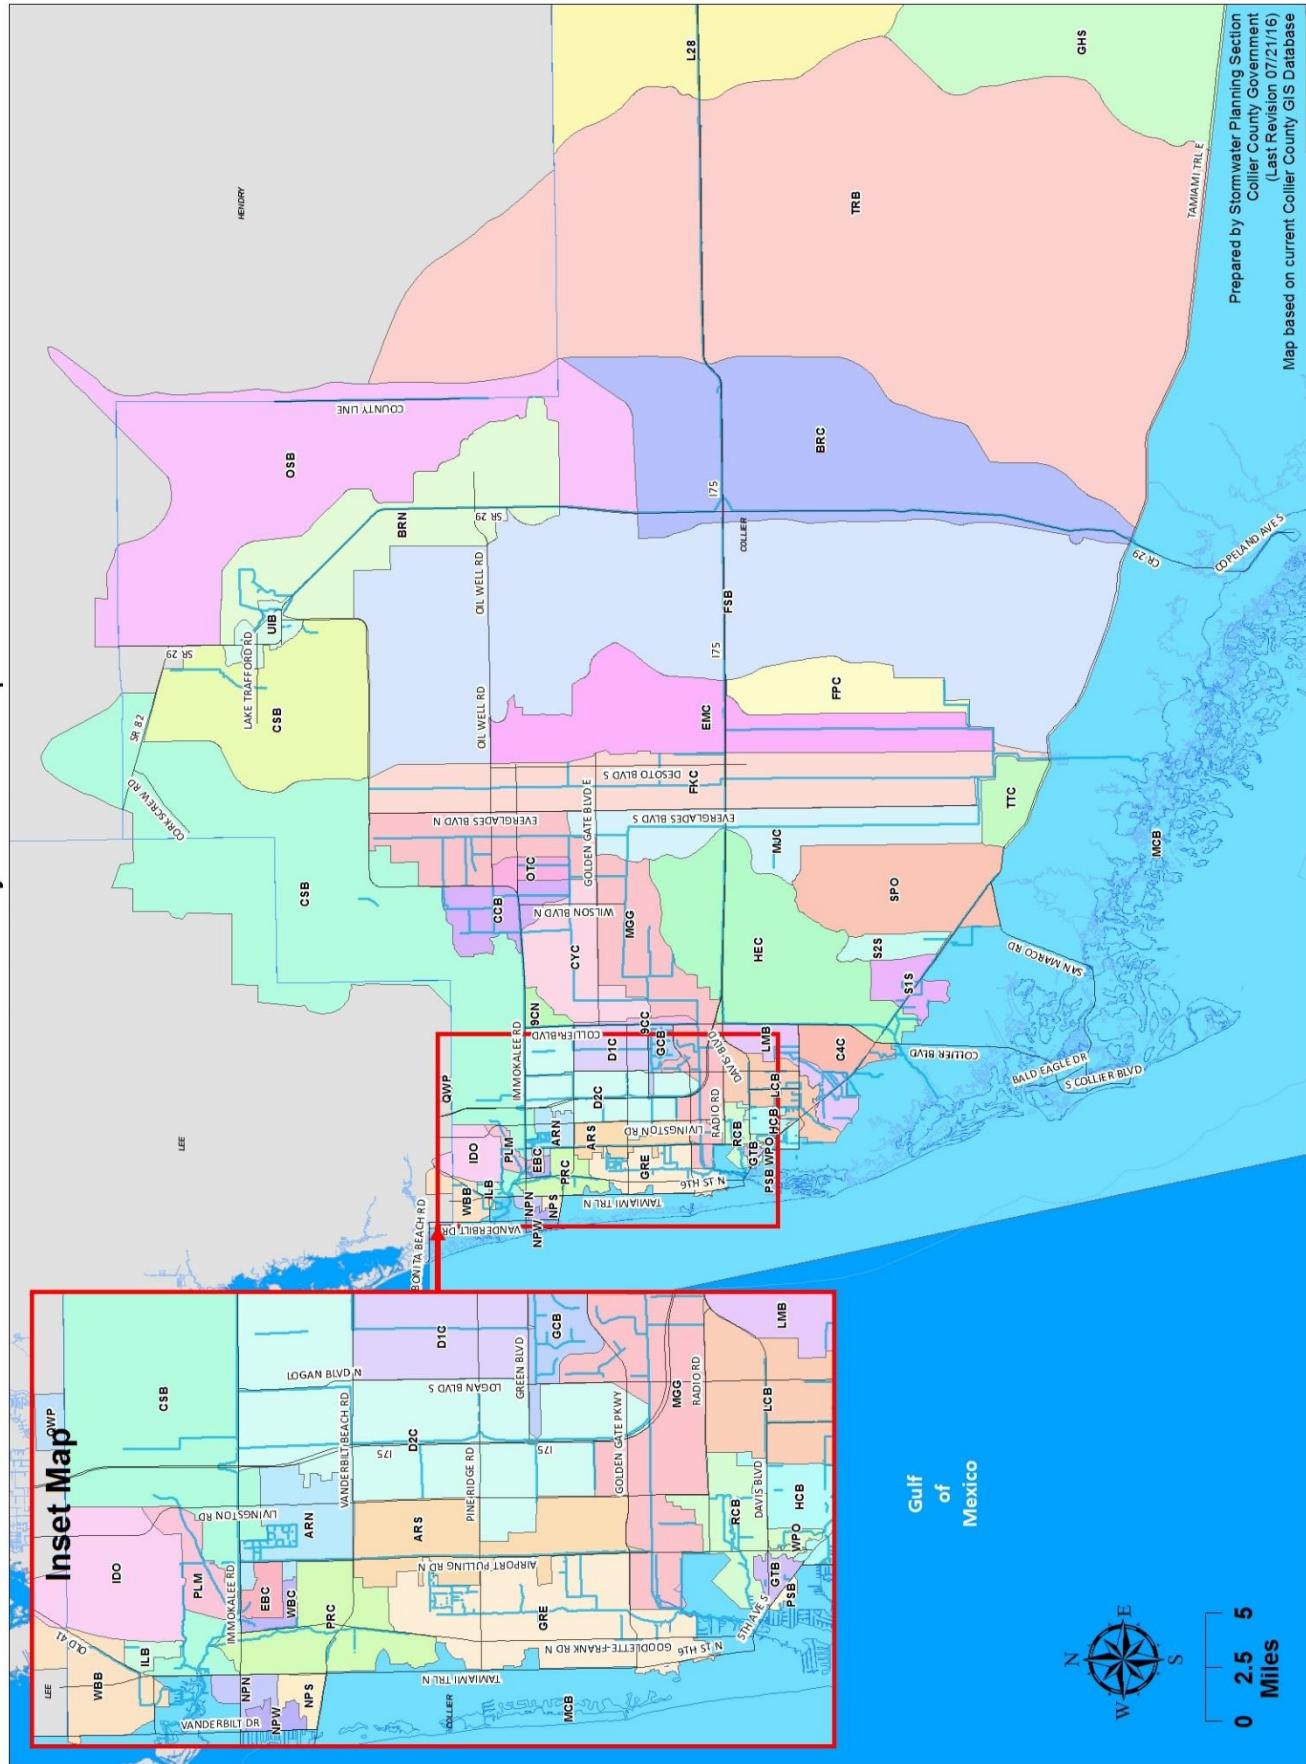

<b><u>Current Six Specific Discharge Limitation Basins</u></b>	<b><u>Rate</u></b>
1. Airport Road North Sub-Basin (North of Vanderbilt Beach Road)	0.04 cfs/acre
2. Airport Road South Sub-basin (South of Vanderbilt Beach Road)	0.06 cfs/acre
3. Cocohatchee Canal Basin	0.04 cfs/acre
4. Lely Canal Basin	0.06 cfs/acre
5. Harvey Basin	0.055 cfs/acre
6. Wiggins Bay Outlet Basin	0.13 cfs/acre

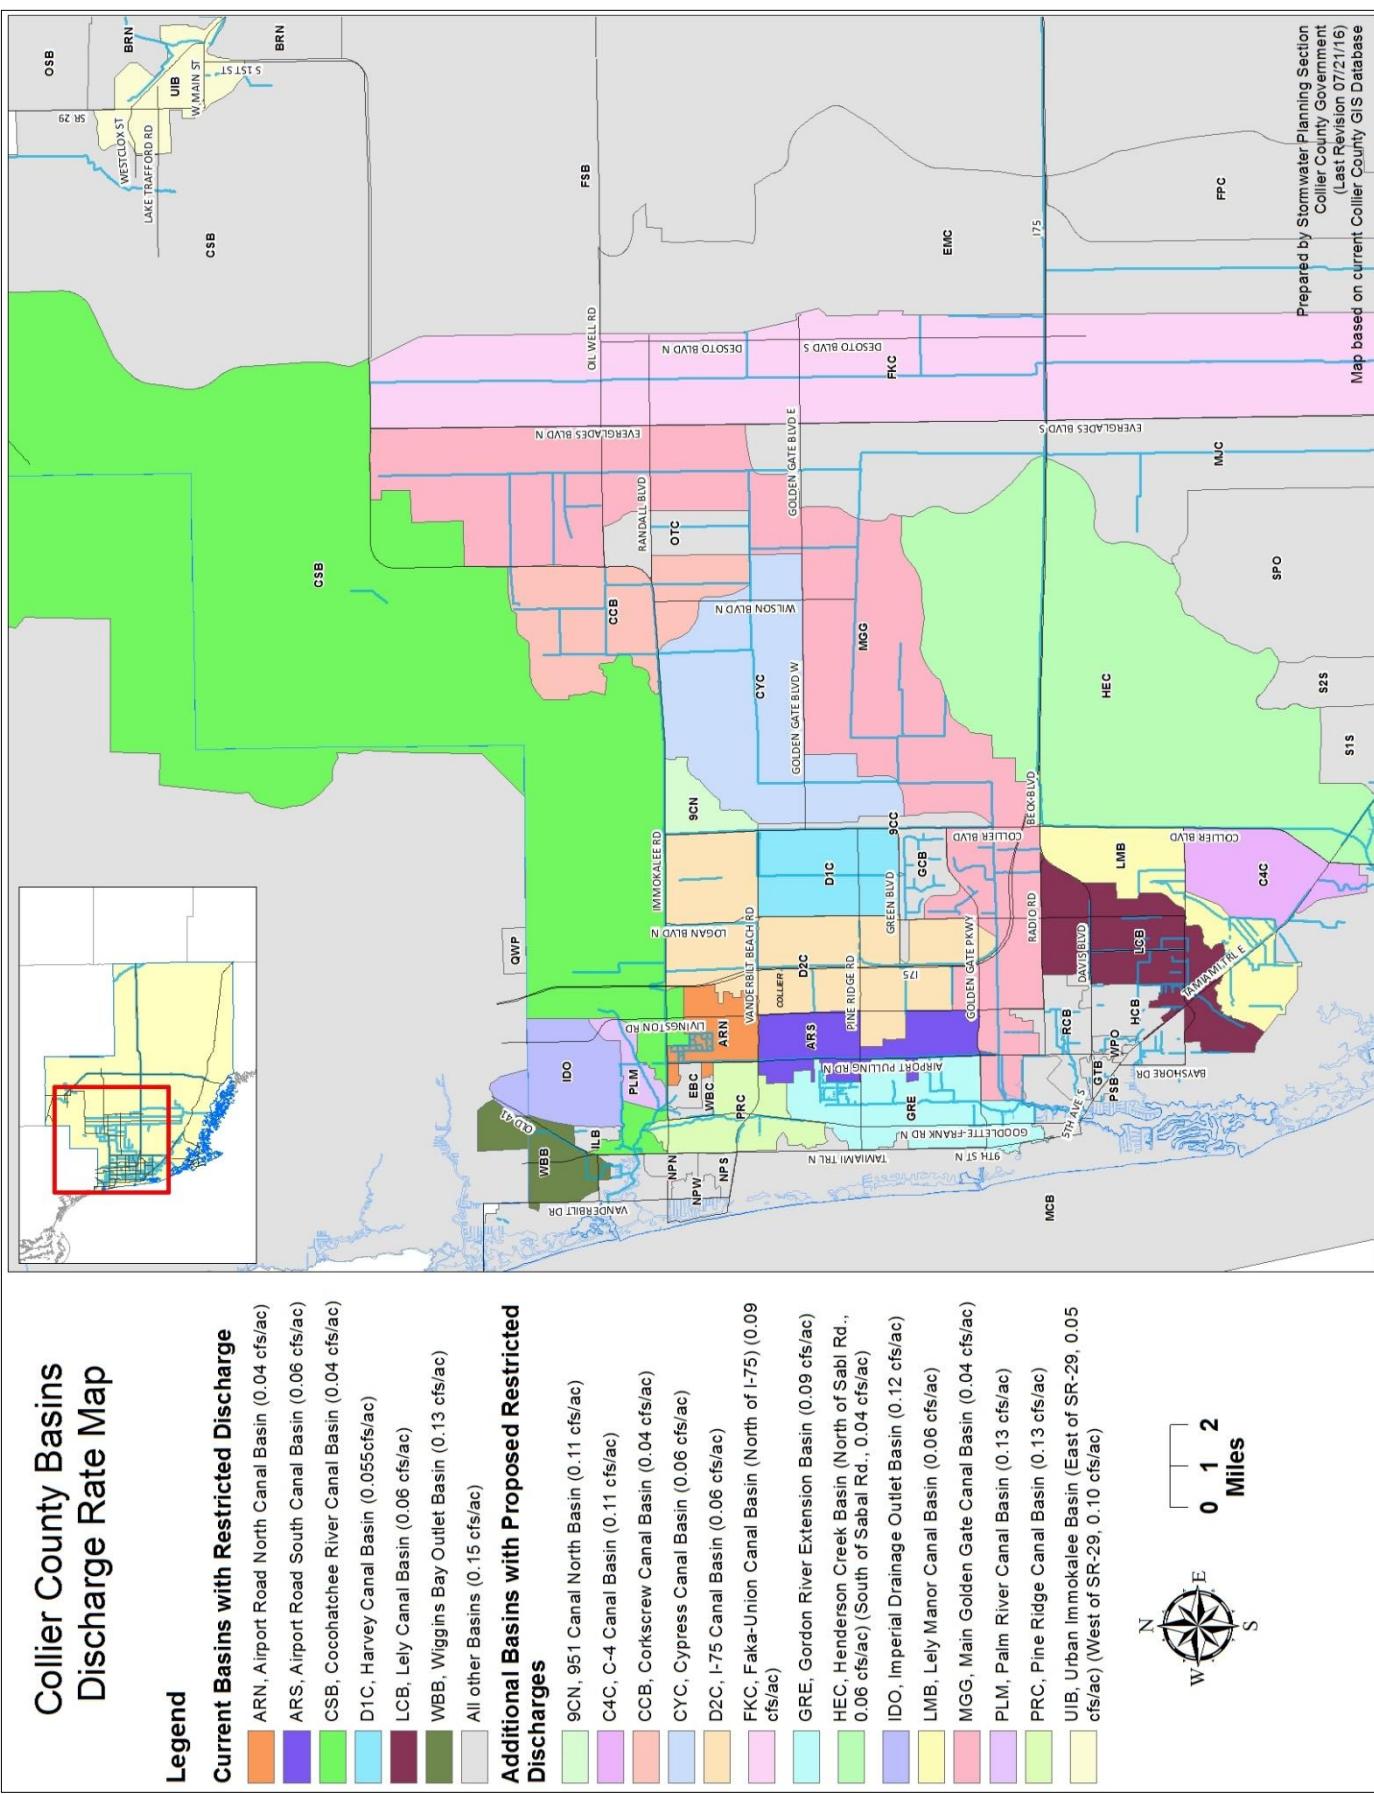

<b><u>Proposed Additional Basins**</u></b>	
1. Henderson Creek Belle Meade Basin (North of Sabal Palm Rd.)	0.06 cfs/acre
2. Henderson Creek Belle Meade Basin (South of Sabal Palm Rd.)	0.04 cfs/acre
3. Immokalee Master Plan Area (East of SR 29)	0.05 cfs/acre
4. Immokalee Master Plan Area (West of SR 29)	0.10 cfs/acre
5. CR 951 North Canal Basin	0.11 cfs/acre
6. C4 Basin	0.11 cfs/acre
7. Corkscrew Canal Basin	0.04 cfs/acre
8. Cypress Canal Basin	0.06 cfs/acre
9. Faka Union Canal Basin (North of I-75)	0.09 cfs/acre
10. Gordon River Extension Basin	0.09 cfs/acre
11. I-75 Canal Basin	0.06 cfs/acre
12. Imperial Drainage Outlet Basin	0.12 cfs/acre
13. Lely Manor Canal Basin	0.06 cfs/acre
14. Main Golden Gate Canal Basin	0.04 cfs/acre
15. Palm River Canal Basin	0.13 cfs/acre
16. Pine Ridge Canal Basin	0.13 cfs/acre

\*\*A feasibility study and impact analysis is underway to determine the effects from the implementation of discharge rate restrictions in the 16 additional recommended basins.

# **COUNTY WATER - SEWER DISTRICT – POTABLE WATER SYSTEM**

## **CONTENTS**

- **DISTRICT POTABLE WATER SYSTEM FACILITIES – SUMMARY**
- **INTRODUCTION**
- **TREATMENT FACILITIES LEVEL OF SERVICE STANDARD (LOSS) ASSESSMENT FOR SERVICE AREA**
- **TREATMENT FACILITIES LEVEL OF SERVICE STANDARD (LOSS) FOR SERVICE AREA – CHART**
- **EXISTING AND FUTURE WATER SERVICE AREAS – MAP**
- **POTABLE WATER SYSTEM SCHEDULES OF CAPITAL IMPROVEMENTS**

**2016 AUIR FACILITY SUMMARY**  
**POTABLE WATER SYSTEM - TREATMENT FACILITIES**

**Facility Type:** Collier County Water-Sewer District (CCWSD) – Potable Water System – Treatment Facilities

**Level of Service Standard:** 150 gallons per capita day (gpcd)<sup>(1)</sup>

**Capacity:**

Constructed On-line Plant Capacity, FY 17	52.75 MGD
Required Plant Capacity, FY 17	34.70 MGD
Constructed On-line Plant Capacity, FY 26	52.75 MGD
Required Plant Capacity, FY 26	41.90 MGD

**Expenditures FY17-FY21<sup>(2)</sup>**

Expansion Related Projects	\$50,000
Replacement & Rehabilitation (R&R) Projects	\$102,702,000
Departmental Capital	\$2,707,000
Debt Service	\$44,922,000
Reserve for Contingencies - R&R Projects <sup>(3)</sup>	\$10,270,000
TOTAL	\$160,651,000

**Existing Revenue Sources FY17-FY21**

Water System Development Fees / Impact Fees	\$34,000,000
Water Capital Account	\$2,707,000
Rate Revenue	\$123,944,000
State Revolving Fund Loan	\$0
TOTAL	\$160,651,000

**Surplus or (Deficit) for Five Year Program** \$0

**Recommended Action:**

That the BCC find the Collier County Water-Sewer District Potable Water System Treatment Facilities in compliance with concurrency requirements found in FS Section 163, the Collier County Comprehensive Plan and the Land Development Code; and that it approve the proposed 2016 CCWSD Potable Water System Treatment Facilities AUIR and adopt the CIE update for FY 2016/17 - FY 2020/21.

**Conclusion:** No new treatment plant capacity is planned in the ten-year timeframe based on the Level of Service Standard, population projections and capacity as shown in the AUIR.

<sup>(1)</sup> Per the 2014 Water, Wastewater, Irrigation Quality Water and Bulk Potable Water Master/CIP Plan (reference 2015 AUIR, Appendix III).

<sup>(2)</sup> CIE consistent with Board approved: FY17 budget

<sup>(3)</sup> As per Florida Statutes Section 129.01(c), contingency reserves are up to 10% of expenses

Collier County Government  
Public Utilities Department  
2016 ANNUAL UPDATE AND INVENTORY REPORT (AUIR)

**POTABLE WATER SYSTEM - TREATMENT FACILITIES**

Introduction:

The Public Utilities Department's proposed 2016 CCWSD Potable Water System Treatment Facilities AUIR is based on peak season population estimates and projections for the CCWSD's potable water service area prepared by the Collier County Comprehensive Planning Section on May 26, 2016. Populations are based on using the Bureau of Economic and Business Research (BEBR) Medium Range growth rate through 2026. Below are two notes and one long-range planning comment:

- A. Concurrency is shown for 10 years. This format is consistent with the State mandated CIE, concurrency regulations, and other Collier County Departments' AUIR submittals.
- B. The Orange Tree Service Area is anticipated to be integrated into the CCWSD in FY 2017.
- C. New plant capacity of 5.4 MGD (per the 2014 Water, Wastewater, Irrigation Quality Water and Bulk Potable Water Master/CIP Plan) will be needed by 2028; siting should be established by 2020.

The 2016 Potable Water System AUIR is presented as a snapshot of concurrency conditions. The CCWSD is in compliance with concurrency requirements for FY 2017 and FY 2018, as required by FS Section 163, the Collier County Comprehensive Plan and the Land Development Code.

Recommendation:

The Public Utilities Department's staff recommends that the Collier County Board of County Commissioners approve the 2016 CCWSD Potable Water System Treatment Facilities AUIR.

Public Utilities Department  
2016 ANNUAL UPDATE AND INVENTORY REPORT (AUIR)

**POTABLE WATER SYSTEM - TREATMENT FACILITIES  
LEVEL OF SERVICE STANDARDS (LOSS) ASSESSMENT FOR SERVICE AREA**

7/20/2016

**Notes: (References are to the column numbers on previous page)**

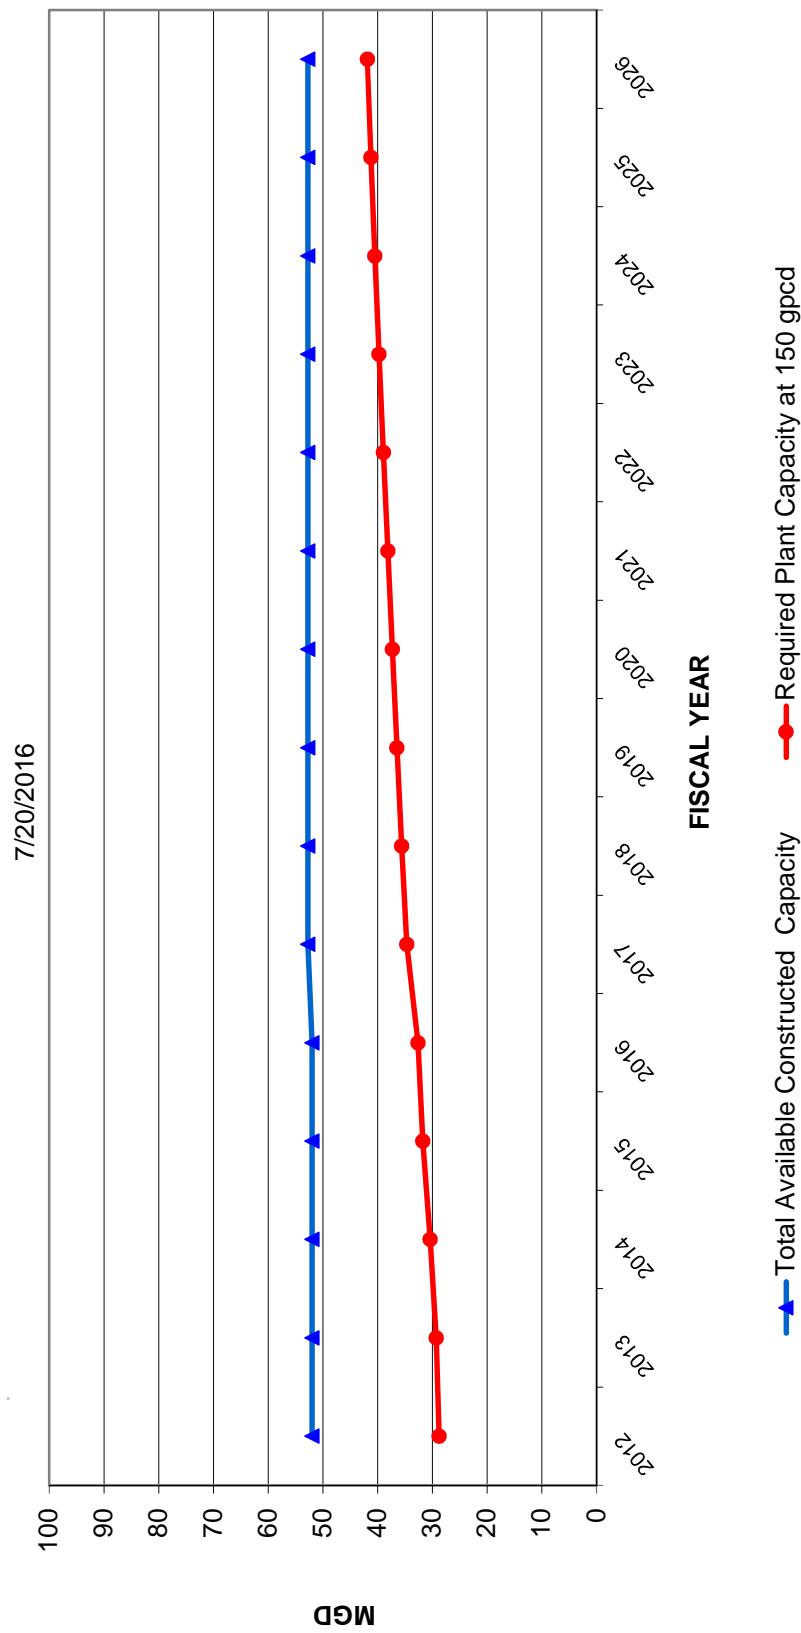

1. Fiscal Year starts October 1 and ends September 30.
2. Population Served. Estimates and projections for the served area were prepared by the Collier County Comprehensive Planning Section on May 26, 2016. Populations are based on using the Bureau of Economic and Business Research (BEBR) Medium Range growth rate through 2026. The population projections include the Orange Tree service area beginning in FY 2017.
3. Required Plant Capacity at 150 gpcd is obtained by multiplying the Population Served (Column 2) times 150 gallons per capita per day (gpcd) and is expressed in million gallons per day (MGD). 150 gpcd is the established Level of Service Standard (LOSS) as adopted in the 2014 CCWSD Potable Water System AUIR approved by the Board of County Commissioners on November 18, 2014, based on the 2014 Water, Wastewater, Irrigation Quality Water and Bulk Potable Water Master/CIP Plan.
4. Required Plant Capacity Increase from Previous Year is the increase in the Required Plant Capacity at 150 gpcd (Column 3) for the year listed compared to the previous year.
5. Constructed Plant Capacity On-line is the total finished water treatment capacity at the beginning of the fiscal year in million gallons per day (MGD). Capacity in FY 2017 is increased by 0.75 MGD (as currently sited) when Orange Tree Utilities is anticipated to be integrated into the CCWSD.
6. New Plant Capacity:

Fiscal Year	New Plant Capacity	Source of Information
NA	0	No new plant capacity is planned through 2026 based on concurrency analysis.

7. Total Available Constructed Capacity is the total of Constructed Plant Capacity On-line (Column 5) plus New Plant Capacity (Column 6).
8. Retained/(Deficit) Constructed Capacity is the difference between Total Available Constructed Capacity (Column 7) and Required Plant Capacity at 150 gpcd (Column 3).
9. Retained/(Deficit) Constructed Capacity Target Values for planning purposes are 0.9 MGD minimum and 7.8 MGD maximum through FY 2026. The target minimum capacity represents the average projected increase in the next year's demand and the target maximum capacity represents the average projected increase in demand for the next eight years.

Figures provided for years three, four and five of this Schedule of Capital Improvements are not part of the Concurrency Management System but must be financially feasible with a dedicated revenue source or an alternative revenue source if the dedicated revenue source is not realized. Figures provided for years six through ten of the Schedule of Capital Improvements are estimates of revenues versus project costs but do not constitute a long term concurrency system.

**DATA SOURCES:**

- Expansion Related and Replacement & Rehabilitation Projects:  
FY 2017 is obtained from the 2017 Proposed Budget.

**• Department Capital:**

- FY 2018 to FY 2019 are obtained from the 2014 User Rate Study and FY 2020 and FY 2021 is 2% increase over FY 2019 and FY 2020 (pursuant to CPI adjustments per Board policy).

**• Debt Service:**

- FY 2017 - FY 2021 are obtained from the Collier County Water and Sewer District Financial Statements and Other Reports, Summary of Debt Service requirements to maturity. Total Debt Service amount is split 50/50 between Water and Wastewater.
- Reserve for Contingencies - Replacement and Rehabilitation Projects:  
As per Florida Statues, reserve for contingencies are up to 10% of expenses.

State Revolving Fund Loans	\$0
<b>TOTAL</b>	<b>\$246,558,000</b>

**Surplus or (Deficit) for Five Year Program** \$0

**Recommended Action:**

That the BCC find the Collier County Water-Sewer District Wastewater System Treatment Facilities in compliance with concurrency requirements found in FS Section 163, the Collier County Comprehensive Plan and the Land Development Code; and that it approve the proposed 2016 CCWSW Wastewater System Treatment Facilities AUIR and adopt the CIE update for FY 2016/17 - FY 2020/21.

**Conclusion:** No new treatment plant capacity is planned in the ten-year timeframe based on the Level of Service Standard, population projections and capacity as shown in the AUIR.

<sup>(1)</sup> Per the 2014 Water, Wastewater, Irrigation Quality Water and Bulk Potable Water Master/CIP Plan (reference 2015 AUIR, Appendix III).

<sup>(2)</sup> CIE consistent with Board approved: FY17 budget

<sup>(3)</sup> As per Florida Statutes Section 129.01(c), contingency reserves are up to 10% of expenses

Collier County Government  
Public Utilities Department  
2016 ANNUAL UPDATE AND INVENTORY REPORT (AUIR)

**WASTEWATER SYSTEM - TREATMENT FACILITIES**

Introduction:

The Public Utilities Department's proposed 2016 CCWSD Wastewater System Treatment Facilities AUIR is based on peak season population estimates and projections for the CCWSD's wastewater service areas prepared by the Collier County Comprehensive Planning Section on May 26, 2016. Populations are based on using the Bureau of Economic and Business Research (BEBR) Medium Range growth rate through 2026. Below are two notes and one long-range planning comment:

- A. Concurrency is shown for 10 years. This format is consistent with the State mandated CIE, concurrency regulations, and other Collier County Departments' AUIR submittals.
- B. The Orange Tree Service Area is anticipated to be integrated into the CCWSD in FY 2017.
- C. New plant capacity of 4.9 MGD (per the 2014 Water, Wastewater, Irrigation Quality Water and Bulk Potable Water Master/CIP Plan) will be needed by 2030; siting should be established by 2022.

The 2016 Wastewater System AUIR is presented as a snapshot of concurrency conditions. The CCWSD is in compliance with concurrency requirements for FY 2017 and FY 2018, as required by FS Section 163, the Collier County Comprehensive Plan, and the Land Development Code.

Recommendation:

The Public Utilities Department's staff recommends that the Collier County Board of County Commissioners approve the 2016 CCWSD Wastewater System Treatment Facilities AUIR.

**WASTEWATER SYSTEM - TREATMENT FACILITIES  
LEVEL OF SERVICE STANDARDS (LOSS) ASSESSMENT FOR  
SOUTH COUNTY WATER RECLAMATION FACILITY (SCWRF) SERVICE AREA**

7/20/2016

**Notes: (References are to the column numbers on previous page)**

1. Fiscal Year starts October 1 and ends September 30.
2. Population Served. Estimates and projections for the served area were prepared by the Collier County Comprehensive Planning Section on May 26, 2016. Populations are based on using the Bureau of Economic and Business Research (BEBR) Medium Range growth rate through 2026.
3. Required Plant Capacity at 100 gpcd is obtained by multiplying the Population Served (Column 2) times 100 gallons per capita per day (gpcd) and is expressed in million gallons per day (MGD). 100 gpcd is the established Level of Service Standard (LOSS) for the South Service Area as adopted in the 2014 CCWSD Wastewater System AUIR approved by the Board of County Commissioners on November 18, 2014, based on the 2014 Water, Wastewater, Irrigation Quality Water and Bulk Potable Water Master/CIP Plan.
4. Required Plant Capacity Increase from Previous Year is the increase in the Required Plant Capacity at 100 gpcd (Column 3) for the year listed compared to the previous year.
5. Constructed Plant Capacity On-line is the plant capacity at the beginning of the fiscal year in million gallons per day (MGD).

6. New Plant Capacity:

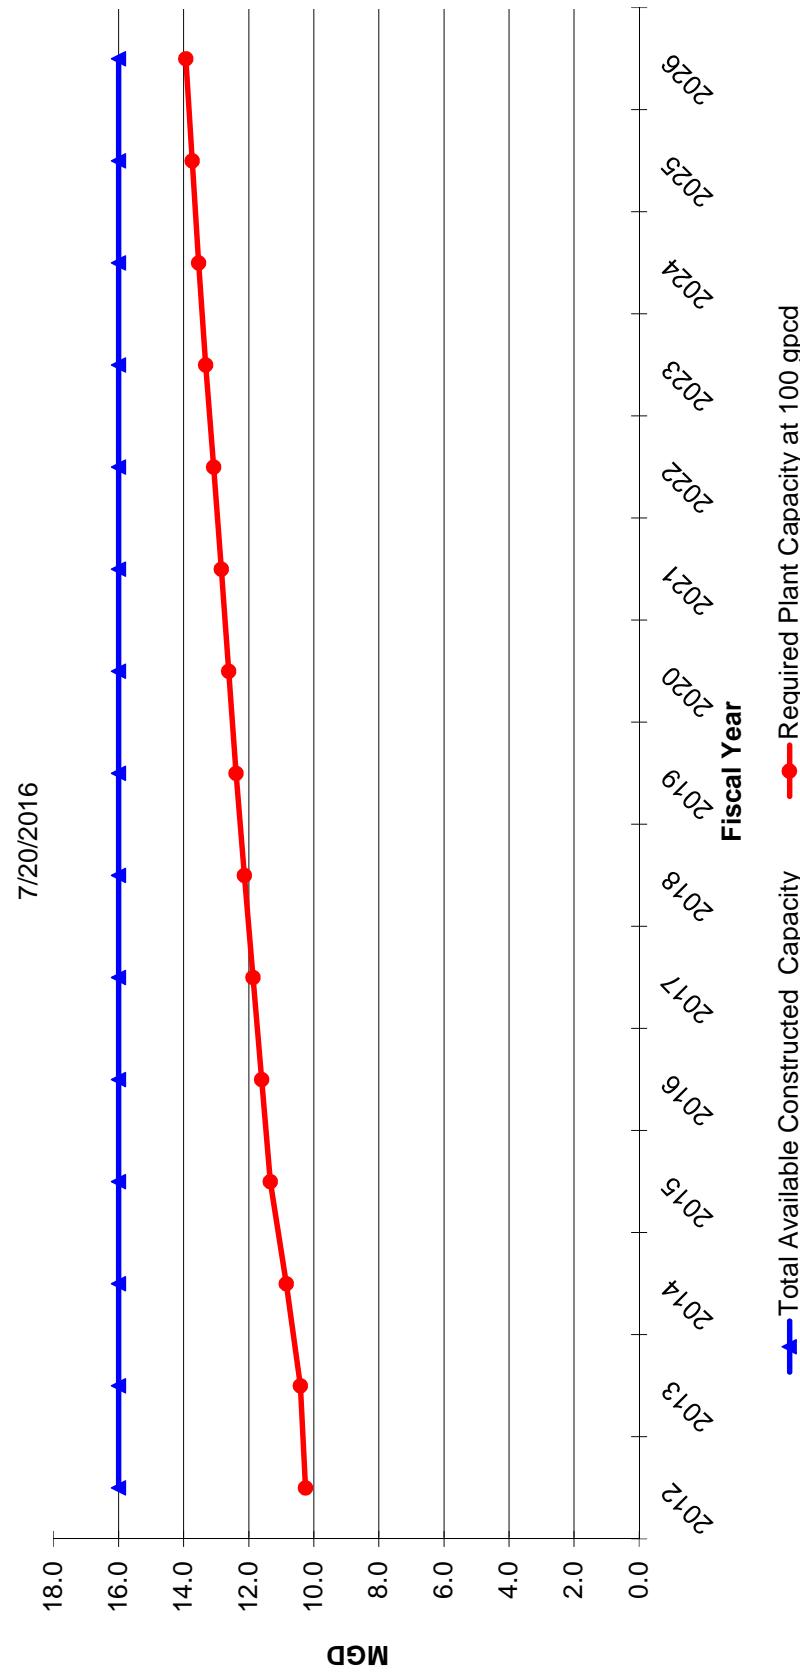

Fiscal Year	New Plant Capacity	Source of Information
NA	0	No new plant capacity is planned through 2026 based on concurrency analysis.

7. Total Available Constructed Capacity is the total of Constructed Plant Capacity On-line (Column 5) plus New Plant Capacity (Column 6).
8. Retained/(Deficit) Constructed Capacity is the difference between Total Available Constructed Capacity (Column 7) and Required Plant Capacity at 100 gpcd (Column 3).
9. Retained/(Deficit) Constructed Capacity Target Values for planning purposes are 0.3 MGD minimum and 2.1 MGD maximum through FY 2026. The target minimum capacity represents the average projected increase in the next year's demand. The SCWRF does not have a target maximum capacity due to limited space for expansion given current technologies.

**Notes: (References are to the column numbers on previous page)**

1. Fiscal Year starts October 1 and ends September 30.
2. Population Served. Estimates and projections for the served area were prepared by the Collier County Comprehensive Planning Section on May 26, 2016. Populations are based on using the Bureau of Economic and Business Research (BEBR) Medium Range growth rate through 2026. The population projections include the Orange Tree service area beginning in FY 2017.
3. Required Plant Capacity at 100 gpcd is obtained by multiplying the Population Served (Column 2) times 100 gallons per capita per day (gpcd) and is expressed in million gallons per day (MGD). 100 gpcd is the established Level of Service Standard (LOSS) for the North Service Area as adopted in the 2014 CCWSD Wastewater System AUIR approved by the Board of County Commissioners on November 18, 2014, based on the 2014 Water, Wastewater, Irrigation Quality Water and Bulk Potable Water Master/CIP Plan.
4. Required Plant Capacity Increase from Previous Year is the increase in the Required Plant Capacity at 100 gpcd (Column 3) for the year listed compared to the previous year.
5. Constructed Plant Capacity On-line is the plant capacity at the beginning of the fiscal year in million gallons per day (MGD). Capacity in FY 2017 is increased by 0.6 MGD (as currently sited) when Orange Tree Utilities is anticipated to be integrated into the CCWSD.
6. New Plant Capacity:

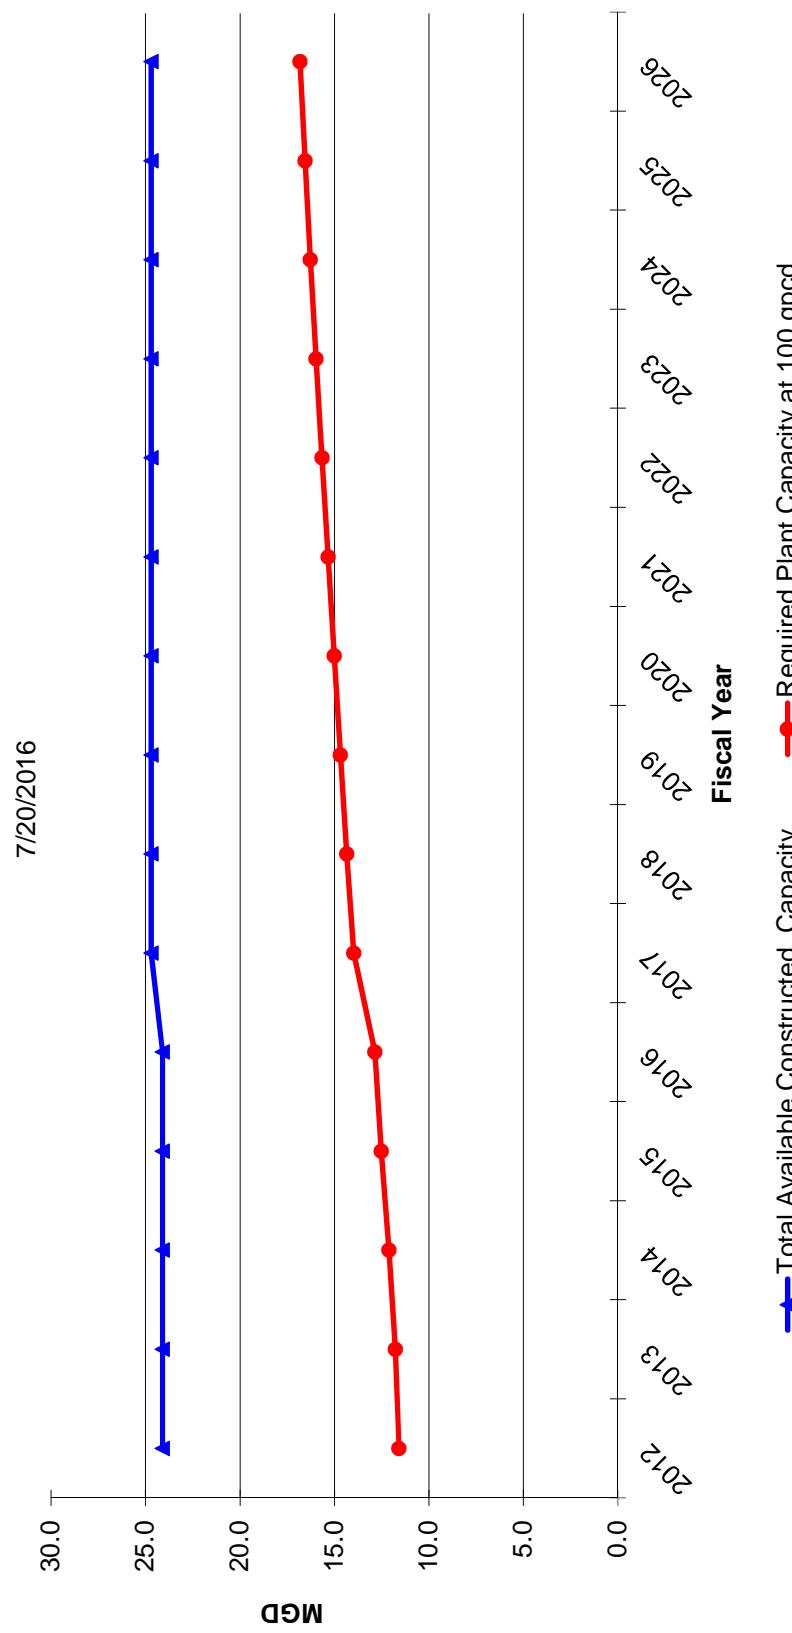

Fiscal Year	New Plant Capacity	Source of Information
NA	0	No new plant capacity is planned through 2026 based on concurrency analysis.

7. Total Available Constructed Capacity is the total of Constructed Plant Capacity On-line (Column 5) plus New Plant Capacity (Column 6).
8. Retained/(Deficit) Constructed Capacity is the difference between Total Available Constructed Capacity (Column 7) and Required Plant Capacity at 100 gpcd (Column 3).
9. Retained/(Deficit) Constructed Capacity Target Values for planning purposes are 0.4 MGD minimum and 3.2 MGD maximum through FY 2026. The target minimum capacity represents the average projected increase in the next year's demand and the target maximum capacity represents the average projected increase in demand for the next eight years.

- **SOLID WASTE DISPOSAL FACILITIES SCHEDULES OF CAPITAL IMPROVEMENTS**

## **2016 AUIR SUMMARY**

### **SOLID WASTE DISPOSAL FACILITIES**

**Facility Type:** Solid Waste Disposal Facilities

**Level of Service Standard:** 10 years of permitted landfill capacity and 2 years of lined cell capacity at previous 3 years average tons per capita disposal rate

**Capacity:**

Total Permitted Landfill Capacity Remaining, 2016	17,725,691 Tons
Required Permitted Landfill Capacity, 2016	2,524,862 Tons
Total Lined Cell Capacity Remaining, 2016	2,939,318 Tons
Required Lined Cell Capacity, 2016	453,950 Tons
Estimated Life of landfill	54 Years

The Collier County Landfill is financed and operated under a design/build/operate Landfill Operating Agreement (LOA) with Waste Management Inc. of Florida (WWIF). All capital revenue and expenses incurred, including new cell construction, are paid through tipping fees paid to WWIF.

Under the LOA:

- No debt is carried by Collier County
- Design/build/operate provisions ensure proper cell capacity
- Landfill cells vary by size and disposal capacity

**Recommended Action:**

That the BCC find the Collier County Landfill Disposal Capacity in compliance with concurrency requirements found in FS Section 163, the Collier County Comprehensive Plan and the Land Development Code; that it continue its support of the Integrated Solid Waste Management Strategy initiatives to increase recycling to reach the 75% state goal; and that it approve the 2016 Solid Waste Disposal Facilities AUIR and CIE.

*Note: The Solid and Hazardous Waste Management Division reached a milestone in 2015, achieving a 63% recycling rate as reported by FDEP.*

Collier County Government  
Public Utilities Department  
2016 Annual Update and Inventory Report (AUIR)

## **COLLIER COUNTY LANDFILL DISPOSAL CAPACITY**

### Introduction:

The Public Utilities Department's 2016 AUIR submittals are based on "Collier County Peak Season Population Estimates and Projections" dated May 26, 2016, prepared by Collier County Comprehensive Planning Section. Populations are derived from data obtained from: The 2010 Census; Bureau of Economic and Business Research (BEBR) population bulletins; Collier County Comprehensive Planning staff; and, Planning staff from the Cities of Naples and Marco Island. FY 2035 - FY 2070 projected populations are based on average annual percentage increases for FY 2032 - FY 2034 (.20%). There are two notable observations from the 2016 Collier County Landfill Disposal Capacity AUIR; the third and fourth items are long range planning comments:

1. The 2016 Solid Waste AUIR projects that the Collier County Landfill will have zero capacity remaining in FY 2070, increase of one year compared to 2015 Solid Waste AUIR. This represents 54 years of projected capacity.
2. The projected Tons Per Capita Disposal Rate in the 2016 Solid Waste AUIR for 2017 forward is 0.54, which is a .02 % increase from the projected Tons Per Capita Disposal Rate in the 2015 Solid Waste AUIR.
3. Based on an estimate of 10 years for all federal, state and local permitting, site selection for a new landfill should be completed by 2050, to allow for permitting by 2060, preserving ten years of permitted landfill capacity in advance of 2070.
4. In FY2015, the Board of County Commissioners purchased 305 acres adjacent to the Collier County Landfill to provide sustainable renewable solid waste treatment and renewable energy planning capacity beyond 100 years.

The 2016 Solid Waste AUIR is presented as a snapshot of concurrency conditions. The Collier County Solid and Hazardous Waste Management Division is in compliance with concurrency requirements for FY 2017 and FY 2018, as required by FS Section 163, the Collier County Comprehensive Plan and the Land Development Code.

### Recommendations:

The Solid and Hazardous Waste Management Division reached a milestone, achieving a recycling rate of 63% in 2015, as reported by FDEP. In addition, Collier County has ranked 4th in traditional recycling in comparison to other Florida Counties. The Public Utilities Department's staff recommends that the Collier County Board of County Commissioners approve the 2016 Collier County Landfill Disposal Capacity AUIR and continue to support the Integrated Solid Waste Management Strategy initiatives to increase recycling to reach the 75% State goal, and to divert recyclables and hazardous waste from the Collier County Landfill. The 305 acres adjacent to the Collier County Landfill will provide a sustainable platform towards future disposal treatment and capacity for renewable energy that will extend the life of the landfill for an additional 100 plus years.

2016 Annual Update and Inventory Report (AUIR)

**Table 1: Collier County Landfill Disposal Capacity**  
**Level of Service Standard: Ten Years of Permitted Landfill Capacity**  
**at Previous Three Years Average Tons Per Capita Disposal Rate**

July 07, 2016

**NOTES: (References are to the column numbers on previous page)**

1. Fiscal Year starts October 1 and ends September 30.
2. Peak Population. Estimates and projections for the existing service area are based on "Collier County Peak Season Population Estimates and Projections" dated May 26, 2016, prepared by Collier County Comprehensive Planning Section. Populations are derived from data obtained from: 2010 Census; Bureau of Economic and Business Research (BEBR) population bulletins; Collier County Comprehensive Planning staff; and, Planning staff from Naples and Marco Island. FY 2035 - FY 2070 projected based on average annual percentage increase for FY 2032 - FY 2034 (.20%).
3. Tons Per Capita Disposal Rate for FY 2000 - FY 2016 is calculated by dividing the actual Annual Tons Disposed (column 4) by the Peak Population (column 2). FY 2017 forward is the average Tons Per Capita Disposal Rate (column 3) of previous 3 years (FY 2014, FY 2015, and FY 2016).
4. Annual Tons Disposed for FY 2015 is actual tonnage amount buried at the Collier County Landfill. FY 2016 reflects the projected tons disposed from the current year forecast. FY 2017 forward are derived from Peak Population (column 2) multiplied by the Tons Per Capita Disposal Rate (column 3).
5. Total Landfill Capacity Balance (tons) is the previous years Total Landfill Capacity Balance (column 5) minus Annual Tons Disposed (column 4) at the Collier County Landfill. The bolded value in the Total Landfill Capacity Balance (column 5) is from Waste Management, Inc. of Florida's (WMIF) Annual Estimate of Remaining Life and Capacity Letter that includes the Board approved and FDEP permitted vertical expansion plus 930,000 tons of contracted disposal capacity at the Okeechobee Landfill.
6. Next Ten Years Landfill Capacity Requirement (tons) is the sum of the next ten years of Annual Tons Disposed (column 4) at the Collier County Landfill.
7. Ten Year Permitted Landfill Capacity Surplus or Deficiency (tons) is the Total Landfill Capacity Balance (column 5) minus the Next Ten Years Landfill Capacity Requirement (column 6).

notes

- 1) Estimates and projections are derived from data obtained from: 2000 Census and 2010 Census; Bureau of Economic and Business Research (BEBR) population bulletins; Collier County Comprehensive Planning staff; and, Planning staff from Naples and Marco Island.
  - 2) Peak Season population is derived by increasing each year's October 1 permanent population by 20%.
  - 3) Based upon BEBR Medium Range growth rate projections.

Collier County Government  
Public Utilities Department  
2016 Annual Update and Inventory Report (AUIR)

**Table 2: Collier County Landfill Disposal Capacity**  
**Level of Service Standard: Two Years of Lined Cell Capacity**  
**at Previous Three Years Average Tons Per Capita Disposal Rate**

July 07, 2016

**NOTES: (References are to the column numbers on previous page)**

1. Fiscal Year starts October 1 and ends September 30.
2. Peak Population. Estimates and projections for the existing service area are based on "Collier County Peak Season Population Estimates and Projections" dated May 26,2016, prepared by Collier County Comprehensive Planning Section. Populations are derived from data obtained from: 2010 Census; Bureau of Economic and Business Research (BEBR) population bulletins; Collier County Comprehensive Planning staff; and, Planning staff from Naples and Marco Island. FY 2035 - FY 2070 projected based on average annual percentage increase for FY 2032 - FY 2034 (.20%).
3. Tons Per Capita Disposal Rate for FY 2000 - FY 2016 is calculated by dividing the actual Annual Tons Disposed (column 4) by the Peak Population (column 2). FY 2017 forward is the average Tons Per Capita Disposal Rate (column 3) of previous 3 years (FY 2014, FY 2015, and FY 2016).
4. Annual Tons Disposed for FY 2015 is actual tonnage amount buried at the Collier County Landfill. FY 2016 reflects the projected tons disposed from the current year forecast. FY 2017 forward are derived from Peak Population (column 2) multiplied by the Tons Per Capita Disposal Rate (column 3).
5. Lined Cell Capacity Balance (tons) is the previous years Lined Cell Capacity Balance (column 5) minus Annual Tons Disposed (column 4) at the Collier County Landfill. See below for explanations of the bolded values in the Lined Cell Capacity Balance (column 5).

Fiscal Year	New Capacity (tons)	Description	Source of Information
2002	930,000	Contracted disposal capacity at the Okeechobee Landfill.	June 12, 2001 Disposal Capacity Agreement, as amended.
2002	<b>1,173,575</b>	Lined Cell Expansion	Complete.
2006	<b>911,250</b>	Lined Cell Expansion	Complete.
2009	<b>845,250</b>	Lined Cell Expansion	Complete.
2016	<b>771,200</b>	Lined Cell Expansion	Waste Management, Inc. of Florida (WMIF) Commence Construction of Cell A6 / Cell Development Schedule dated 7/15/16.
2017	<b>1,465,000</b>	Lined Cell Expansion	WMIF 5-year Cell Development Completed Cell A6/Cell Development Schedule dated 7/15/16.

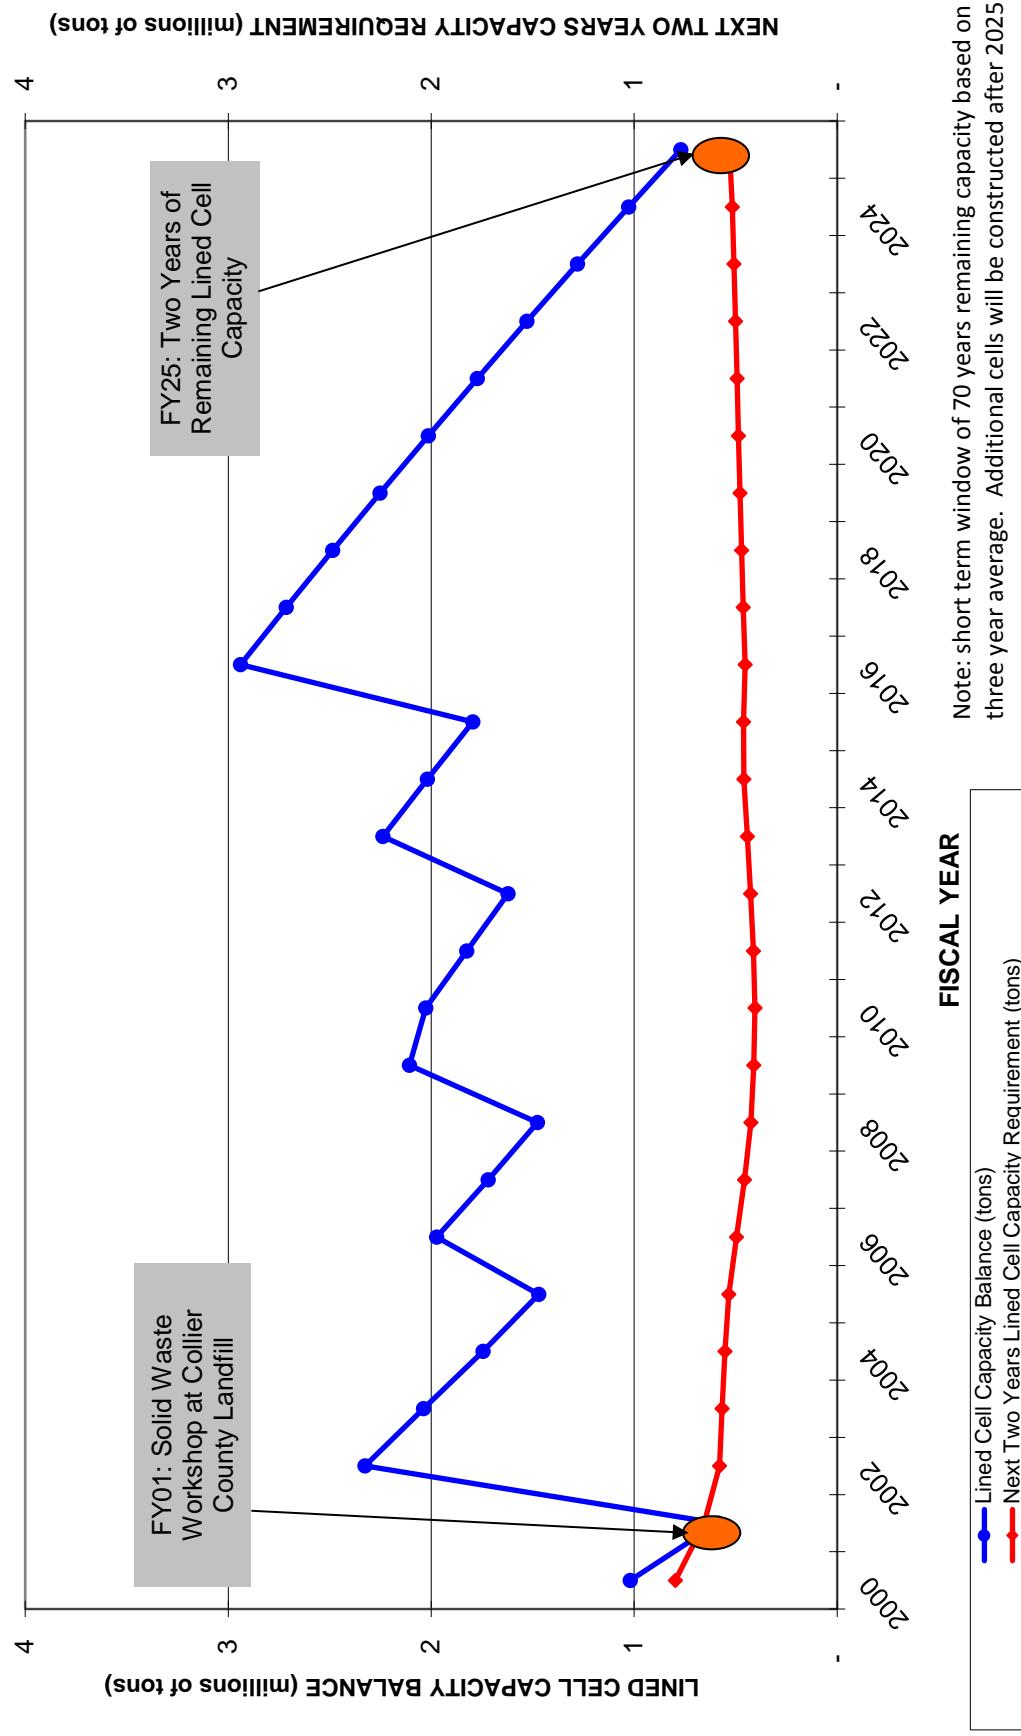

6. Next Two Years Lined Cell Capacity Requirement (tons) is the sum of the next two years of Annual Tons Disposed (column 4) at the Collier County Landfill.
7. Projected Lined Cell Capacity Surplus or Deficiency (tons) is the Lined Cell Capacity Balance (column 5) minus the Next Two Years Lined Cell Capacity Requirement (column 6).

### Revenue Definitions

**Impact Fee** – Impact fees are a charge on new development to pay for the construction or expansion of Schools related to growth created by new residential construction. Impact fees are levied against the construction of a dwelling unit at the same time that a permit is issued.

**Interest Income** – Interest earned on (idle) funds invested by the District in accordance with Board policy on investments.

**Capital Improvement Tax** – Capital Improvement Tax is an ad-valorem tax authorized by section 101.17(2), F.S., and allows School Boards to levy up to 1.50 mills for construction projects, remodeling and renovation, purchase of school buses and other eligible equipment purchases. Our voter approved referendum allowed a reduction of .25 mills in Capital Millage in exchange for an offsetting increase in Operating Millage. This plan is phasing out the referendum millage in the General Fund and restoring the Capital Millage to 1.50 mills in FY2017.

**Beginning Balance** – Beginning balance is the unencumbered and unspent funds available after all accounting records have been closed for a given fiscal year. Some of the beginning fund balance may represent rollover of unspent funds from the prior year for which projects have not yet been completed or encumbered.

**Other** – Other Income represents the refund of fuel taxes and any other miscellaneous revenue that could be received during the year.

**Capital Outlay and Debt Service (CO&DS)** – are derived from the motor vehicle license tax collected and distributed by the state.

**PECO Maintenance** – Gross Receipts Utility Taxes are the source of revenues for Public Education Capital Outlay (PECO) funding which is appropriated annually by the legislature.

**Charter Capital Flow Thru** – State funds that are received on behalf of Charter Schools.

**2016 AUIR SUMMARY**  
**COMMUNITY AND REGIONAL PARK LANDS**

**Facility Type:** Community and Regional Park Land (Category A)

**Level of Service Standards (LOSS):** 1.2 acres per 1,000/population (Community)  
 2.7 acres per 1,000/population (Regional)

**Unit Costs:** \$107,000 per acre\* (Community)  
 \$450,000 per acre\* (Regional)

Community Parks: Using the Peak Season population for unincorporated area of the County, the following is set forth:

	<u>Acres</u>	<u>Value</u>
Available Inventory as of 9/30/2016	594.74	\$63,637,180
Required Inventory as of 9/30/2021	501.6 **	\$53,671,200
Proposed AUIR FY 2016/17-2020/21	<u>0.00</u>	<u>\$0</u>
5-year Surplus or (Deficit)	93.14	<b>\$9,965,980</b>

Regional Parks: Using the Countywide Peak Season population, the following is set forth:

Available Inventory as of 9/30/2016	1,237.51	\$556,879,500
Required Inventory as of 9/30/2021	1,256.52 ***	\$565,434,000
Proposed AUIR FY 2016/17-2020/21	<u>0.00</u>	<u>\$0</u>
5-year Surplus or (Deficit)	(19.01)	<b>(-\$8,554,500)</b>

**Expenditures**

Proposed AUIR FY 16/17-20/21 (value of) Acquisitions	\$0
Debt Service Payments for 2006/2012 Bonds	\$17,424,700
<b>Total Expenditures</b>	<b>\$17,424,700</b>

**Revenues**

Impact Fees anticipated	\$41,550,400
Interest/Misc	\$465,000
Grant/Reimbursement	\$0
Available Cash for Future Projects/Payment of Debt Service	\$5,852,600
Proposed added value through commitments, leases and governmental transfers	\$0
<b>Total Revenues</b>	<b>\$47,868,000</b>

Surplus or (Deficit) Revenues\*\*\*\* \$30,443,300

Revenues needed to maintain existing LOSS none

**Recommendation:**

That the BCC approve the proposed Community and Regional Park Lands AUIR and adopt the CIE Update for FY 2016/17- FY 2020/21.

**Notes:**

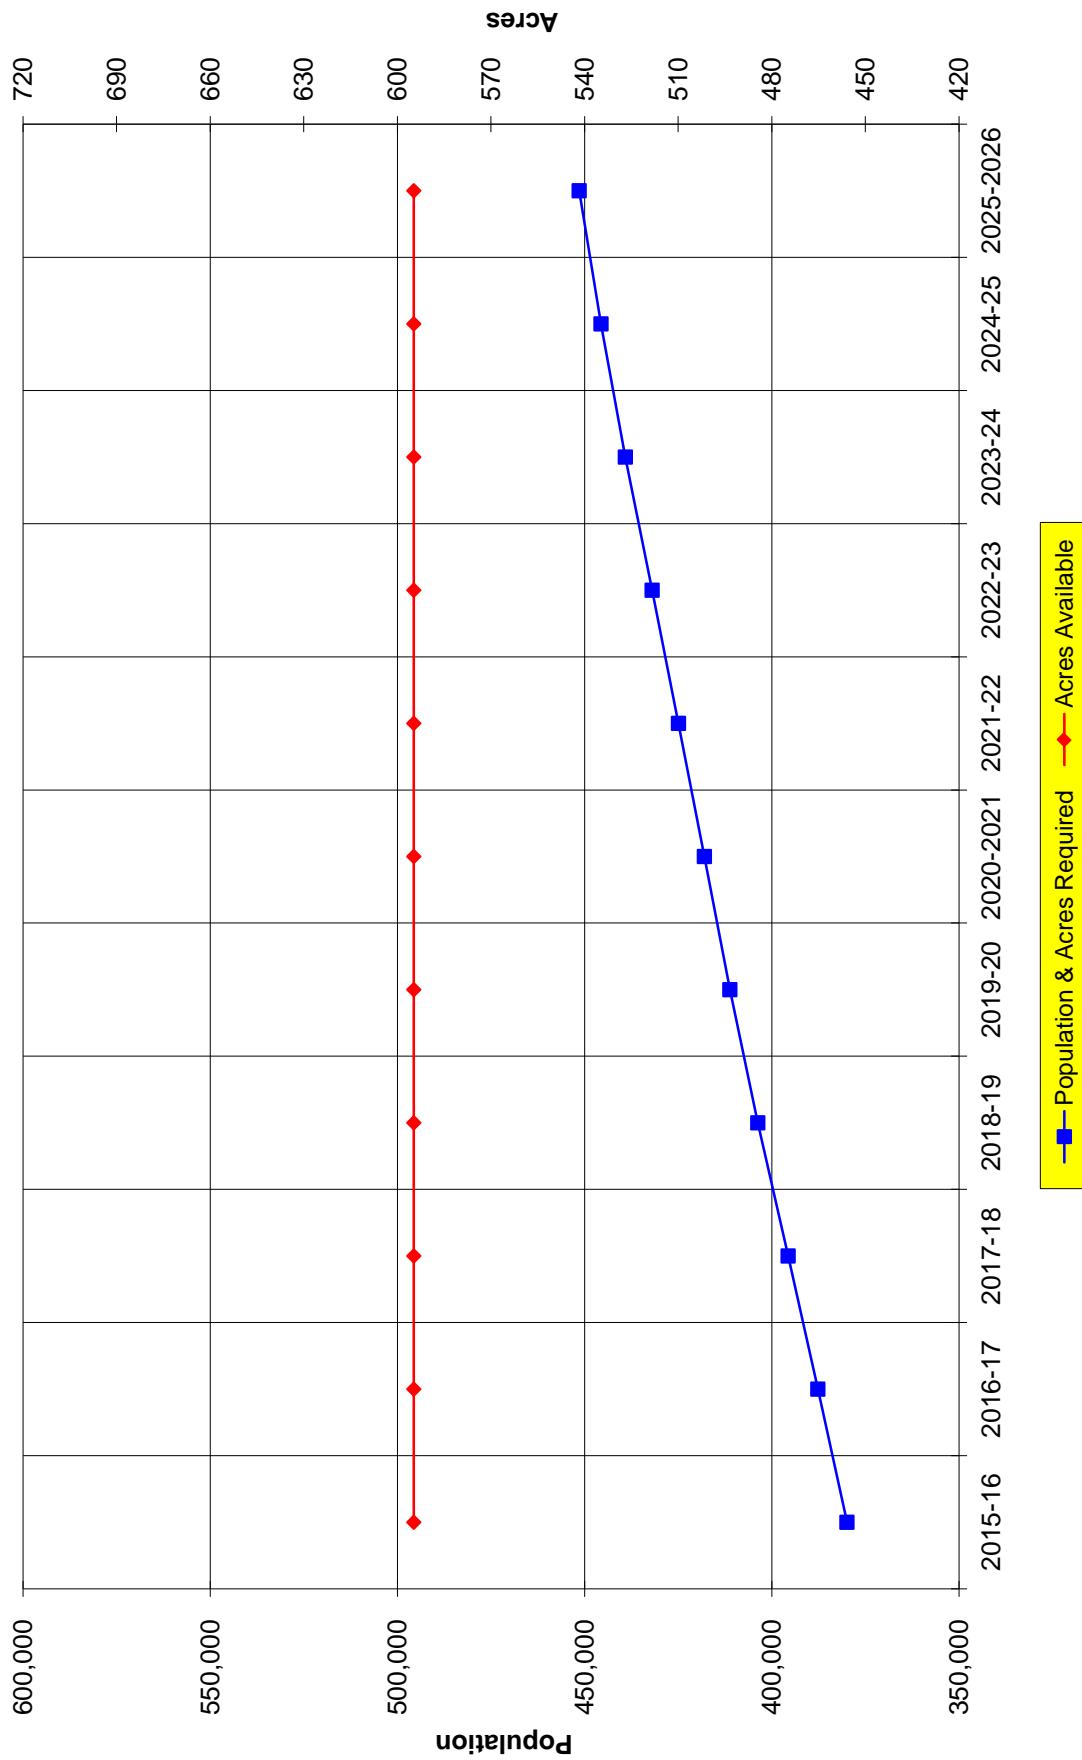

- \* Community Park Land and Regional Park Land Unit Cost values are based on the 2015 Impact Fee Study Update
- \*\* Peak Season population for the unincorporated area of the County of  $418,004 \times 0.0012$  LOSS  
= 501.60 acres
- \*\*\* Countywide Peak Season population of  $465,377 \times 0.0027$  LOSS = 1,256.52 acres
- \*\*\*\* Reserved for future growth.

**2016 AUIR**

# **CAPITAL IMPROVEMENT ELEMENT (CIE) AMENDMENT SUBMITTALS FOR CATEGORY “A” FACILITIES**

## **CONTENTS**

- EXHIBIT “A”, SCHEDULE OF CAPITAL IMPROVEMENTS FOR NEXT 5 FISCAL YEARS
- APPENDIX “H”, SCHEDULE OF CAPITAL IMPROVEMENTS FOR FUTURE FISCAL YEARS 6 – 10

### Updates and Amendments to the Capital Improvement Element

The Annual Update and Inventory Report includes updates to the Capital Improvement Element of the Growth Management Plan needed to eliminate existing deficiencies, replace obsolete or worn out facilities, and make available adequate facilities for future growth. These updates include the two following tables and two Collier County Public School District planning documents as provided for in Policy 4.2 of the Capital Improvement Element.

What follows as Exhibit A is the Schedule of Capital Improvements for the next five year period [Fiscal years 2017 through 2021]. Exhibit A is a component of the Capital Improvement Element and indicates the County's needs for arterial and collector roads and bridge facilities, parks and recreation facilities, stormwater management system, potable water system, solid waste disposal facilities, and wastewater collection and treatment system improvements – all Category "A" facilities subject to concurrency. Public schools are also Category "A" facilities, and planning for public schools over the next five year period is provided by the Collier County Public School District *Facilities Work Program*, as incorporated into the Capital Improvement Element as data and analysis.

What follows as Appendix H is the Schedule of Capital Improvements for the future five year period [Fiscal years 2022 through 2026]. Appendix H supplements the Capital Improvement Element for long term facilities planning of the same Category "A" facilities. Long term planning for public schools is provided by the Collier County Public School District *Capital Improvement Plan* that is incorporated by reference in the Capital Improvement Element.

Each Schedule of Capital Improvements table represents the revenue sources and expenditures for Category "A" public facilities to maintain the levels of service standards established by the Capital Improvement Element. These updated tables, together with updated references to School District documents, constitute the amendments to the Capital Improvement Element.

NOTE: Collier County has adopted a two-year Concurrency Management System. Figures provided for years three, four and five of this Schedule of Capital Improvements are not part of the Concurrency Management System but must be financially feasible with a dedicated revenue source or an alternative revenue source if the dedicated revenue source is not realized. Figures provided for years six through ten of the Schedule of Capital Improvements are estimates of revenues versus project costs but do not constitute a long term concurrency system. Revenue sources are estimates only, both the mix of sources and amounts will change when a rate study is completed.

**DATA SOURCES:**

- Expansion Related and Replacement & Rehabilitation Projects
- FY 2017 is obtained from the 2017 Proposed Budget.
- Department Capital:
  - FY 2017 is obtained from the 2017 Proposed Budget, split 50/50 between Water and Wastewater.
  - FY 2018 to FY 2020 are obtained from 2014 User Rate Study and FY 2021 is a 2% increase over FY 2020.
- Debt Service:
  - FY 2017 to 2021 are obtained from the Collier County Water and Sewer District Financial Statements and Other Reports. Summary of Debt service requirements to maturity. Total Debt Service amount is split 50/50 between Water and Wastewater.
  - Reserve for Contingencies -- Replacement and Rehabilitation Projects:
  - As per Florida Statutes Section 129.01(c), reserve for contingencies are up to 10% of expenses.

\* Pursuant to the Landfill Operating Agreement (LOA) with Waste Management, Inc. of Florida (WMIF), landfill cell construction is scheduled and guaranteed by WMIF over the life of the Collier County Landfill. Collier County landfill expansion costs are paid for by WMIF through agreed upon Collier County landfill tipping fees. By contract under the LOA, WMIF will construct any future required cells. Landfill cells vary in size and disposal capacity.

**EXHIBIT "A"**  
**COLLIER COUNTY SCHEDULE OF CAPITAL IMPROVEMENTS**  
**COST AND REVENUE SUMMARY TABLE**  
**FISCAL YEARS 2017-2021**

The table below itemizes the types of public facilities and the sources of revenue. The "Revenue Amount" column contains the 5-Year amount of facility revenues. The right column is a calculation of expenses versus revenues for each type of public facility. All deficits are accumulated as a subtotal. The subtotal deficit is the source of additional revenue utilized by Collier County to fund the deficit in order to maintain the levels of service standards as referenced in the Capital Improvement Element.

\* Pursuant to the Landfill Operating Agreement (LOA) with Waste Management, Inc. of Florida (WMIF) landfill cell construction is scheduled and guaranteed by WMIF over the life of the Collier County Landfill. Collier County landfill expansion costs are paid for by WMIF through agreed upon Collier County landfill tipping fees. By contract under the LOA, WMIF will construct any future required cells.

**APPENDIX H**  
**FUTURE COSTS AND REVENUES BY TYPE OF PUBLIC FACILITY**  
**COST AND REVENUE SUMMARY TABLE**  
**FISCAL YEARS 2022-2026**

The table below itemizes the types of public facilities and the sources of revenue. The "Revenue Amount" column contains the 5-Year amount of facility revenues. The right column is a calculation of expenses versus revenues for each type of public facility. All deficits are accumulated as a subtotal. The subtotal deficit is the source of additional revenue utilized by Collier County to fund the deficit in order to maintain the levels of service standards as referenced in the Capital Improvement Element.
