#### Work Description

UPDATE 6/26: Move will have to be completed on JULY 11.

UPDATE 6/26: Please include the Sea Turtle staff in this order as well. They are currently located in the Softball building here at NCRP and will also be moving back to the Golden Gate Community Park.

Maura Kraus in the supervisor for the Sea Turtle staff.

Conservation Collier staff will be moving from our current temporary location in the Soccer Complex building at North Collier Regional Park back to our permanent office location in approximately 2 weeks. We do not know an exact moving date yet. The building is currently having environmental cleaning done. Ralph Bosa is the Facilities Project Manager for the building remediation. Next week the air quality testing will be done. If all goes well, I would anticipate we would be moving the week of July 1. After the results from the test come back we will be advised whether we can move back in. However, I wanted to coordinate with you in advance of our expected request.

We have the following items that will need to be moved by facilities staff that are equipped to do so:

•Plotter
<ul> <li>Copier/Printer</li> </ul>
•6ft tall supply cabinet
<ul> <li>3 under desk cabinets</li> </ul>
<ul> <li>4-5 large boxes</li> </ul>
•20-30 small boxes

Would you have staff available to provide moving services? I will put in a formal request when we know an exact moving date.

#### **Tradesworker Notes**

Kyle Benner: Waiting until customer is ready to move.6/19, 7/11 everything has been moved from ncrp to gold gate natural resources

Chris Cousins: moved items as requested

Work Request Number	201987845	Problem Location	4375 Progres Ave Inventory Warehouse Door #W26		
Date Work Requested	7/8/2019 9:35:59 AM	Actual Labor Hours	1.00		
Date Work Completed	7/30/2019 8:42:11 AM	Cost of Labor	\$46.75		
Requested By	George Cascio	Cost of Parts	\$0.00		
Building	Public Utilities Mercantile West	Other Costs	\$3,610.00		
		Total Cost	\$3,656.75		
Work Description					
Overhear door W26 is getting stu	ck. Door is critical to operations.				
hold the down button and unfortu		he limit switches and buckling the door. The	causing a problem because the user has to push and ne door is back on track and working normally I spoke correct the travel and limits.		
Tradesworker Notes					
John Happney: Send to Atlas. Door limit switches need re-setting also up down stop switch control needs to be changed to all latching type. Currently the up is latching the down is momentary and this is causing issues as the user Hass to hold the down button which causes the role door to exceed its limits and buckled the door.
