East of CR-951 Bridges Reevaluation Study

Collier County Capital Project Planning, Impact Fees & Program Management Division

Bridge #8 – 13th St. NW
Neighborhood Information Meeting
October 1, 2020

Collier County

Stantec

Presentation Agenda

1. Introductions
2. History & Background
3. Purpose of the Study
4. Study Process
5. Analysis of Bridge # 8
6. Next Steps & Questions

Stantec

1 Introductions

- ✓ **Lorraine Lantz**, AICP, Principal Planner
  Collier County Project Manager
- ✓ **Trinity Scott**, Transportation Planning Manager
  Collier County
- ✓ **Yvonne McClellan**, Sr. Communications Manager
  Quest Corp. of America
- ✓ **Miranda Lansdale**, Sr. Communications Manager
  Quest Corp. of America
- ✓ **Jeff Perry**, AICP, Sr. Transportation Planner
  Stantec Consulting Project Manager

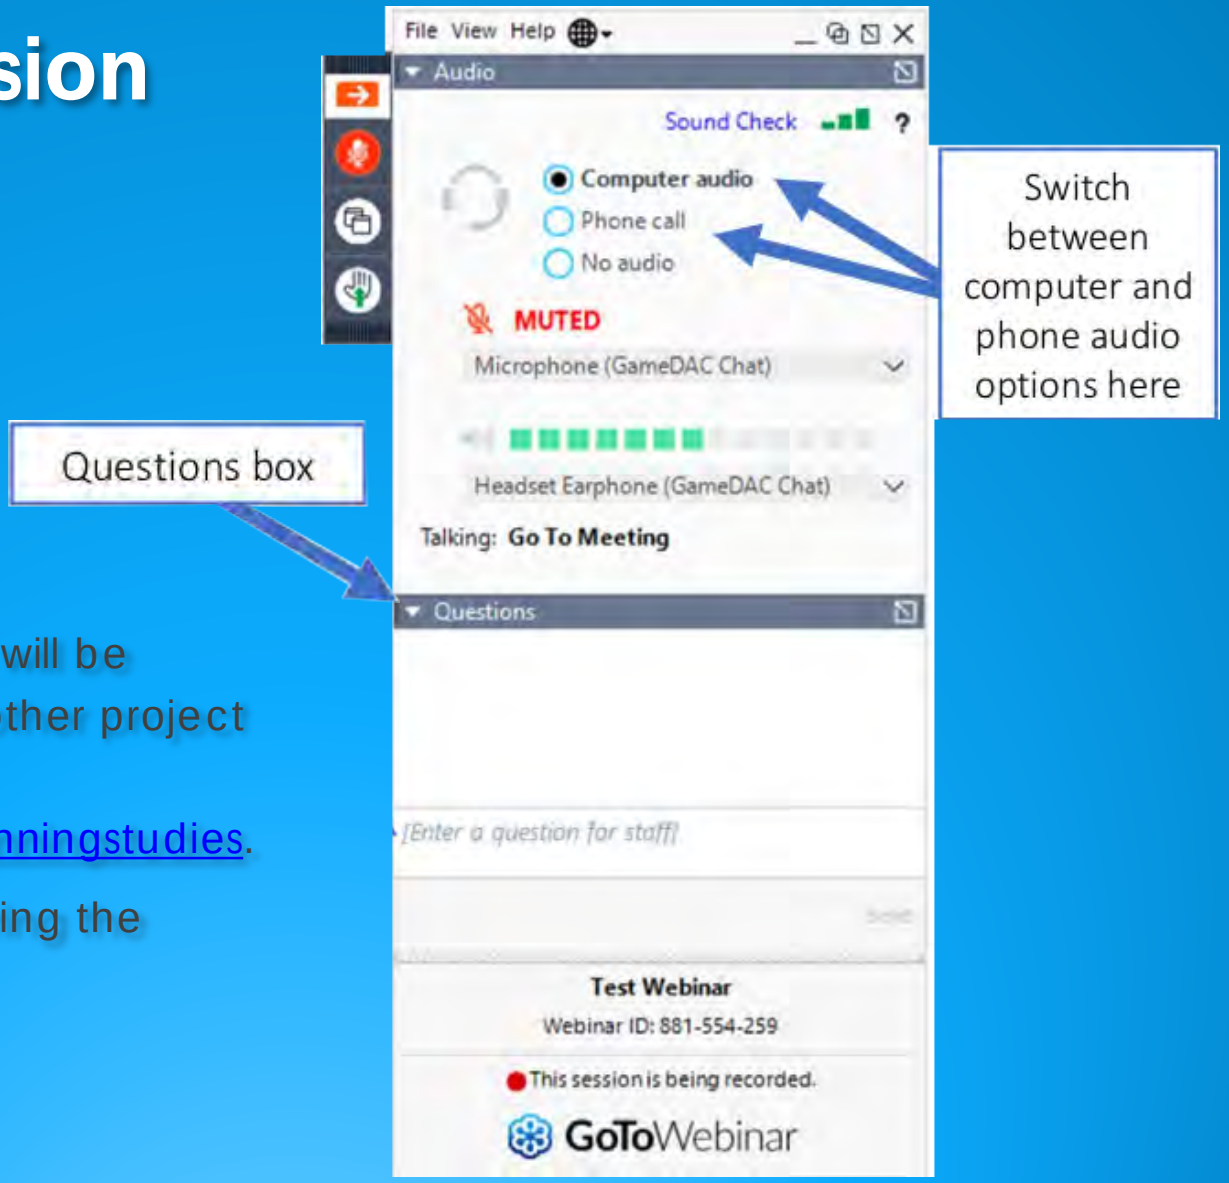
Stantec

Questions Session Guidelines

- The Questions Session will follow the formal presentation.
- Attendees can submit questions via the Questions chat box at any time following the start of the presentation, and questions will be answered in the order in which they were received.
- All participants will be muted throughout the presentation, and the project team will read aloud your question prior to providing a response for the benefit of all attendees.
- If you did not have the opportunity to ask a question during the meeting today, you can submit your questions/comments to Lorraine.Lantz@colliercountyfl.gov or call 239-252-5779, and they will be included as part of the public participation process.

Stantec

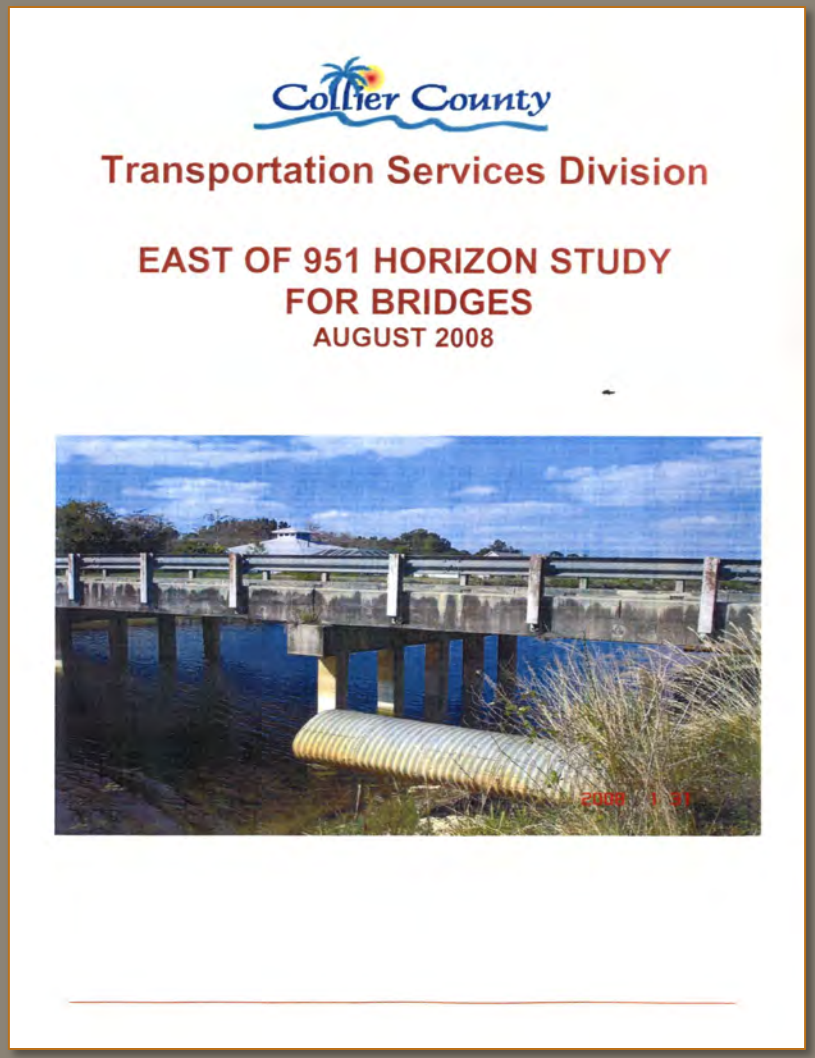
Questions Session Guidelines



- The webinar presentation will be available in PDF format with other project materials at http://colliercountyfl.gov/planningstudies.
- You will remain muted during the meeting.

Stantec

2 History & Background



In August 2008, Collier County completed the East of 951 Horizon Study for Bridges (2008 Study).

We would like to know if you are familiar with that study.

Stantec

2 History & Background

The 2008 Study was conducted to evaluate opportunities to construct missing bridge connections in the Golden Gate Estates Area roadway network.

- Within the 85 square miles of eastern Golden Gate Estates there are more than 300 dead-end streets.

Stantec

2 History & Background

The 2008 Study considered potential transportation circulation benefits:

- Improving connectivity to collectors and arterials
- Reducing trip length for personal travel
- Improving evacuation routes
- Reducing response times for first responders
- Improving access to schools, libraries, and parks

Stantec

2 History & Background

The 2008 Study's stakeholders identified 12 preferred canal-crossing locations.

Due to limited funding, bridges were ranked based on criteria related to emergency response, service efficiency and mobility.

Stantec

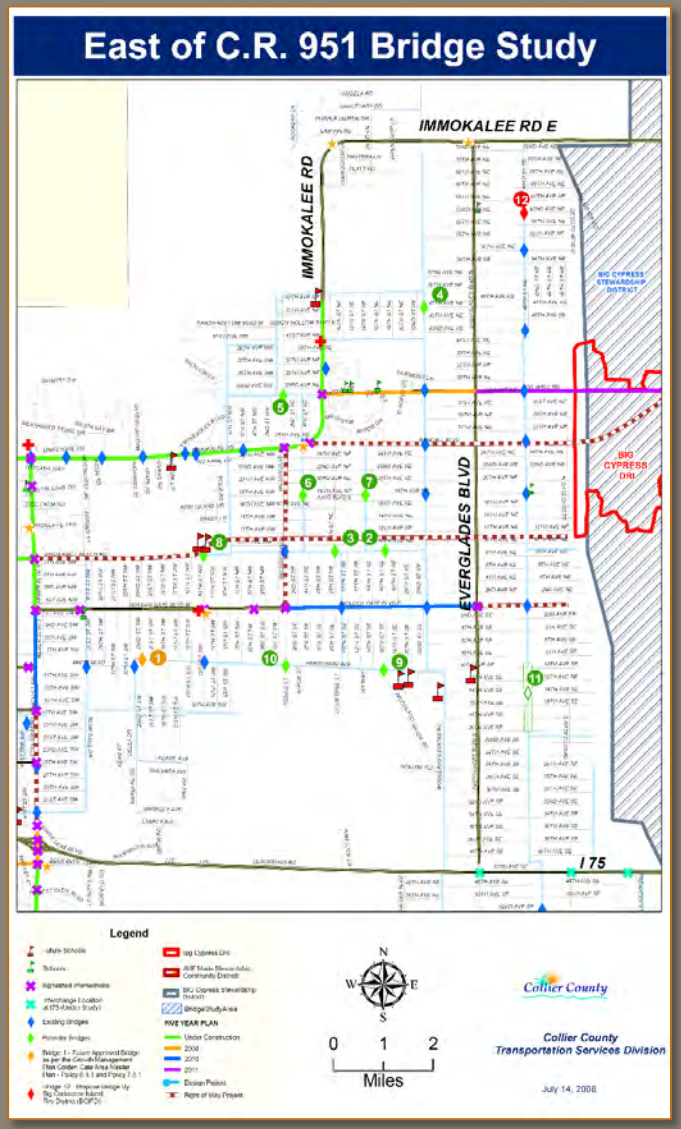
2 History & Background

2008 Study Bridge Ref. #	Bridge Locations
1	23rd St. SW (south of Golden Gate Blvd.)
2	16th St. NE (north of Golden Gate Blvd.)
3	8th St. NE (north of Golden Gate Blvd.)
4	47th Ave. NE (between Immokalee Rd. & Everglades Blvd.)
5	Wilson Blvd. N (south of 33rd Ave. NE)
6	18th Ave. NE (between Wilson Ave. & 8th St. NE)
7	18th Ave. NE (between 8th St. NE & 16th St. NE)
8	North End of 13th St. NW (north of Golden Gate Blvd.)
9	16th St. SE (south of Golden Gate Blvd.)
10	Wilson Blvd. S (south of Golden Gate Blvd.)
11	10th Ave. SE (between Everglades Blvd. & Desoto Blvd.)
12	62nd Ave. NE (between Everglades Blvd. and 40th St. NE)

Ranked order of 12 bridges from the 2008 Bridge Study

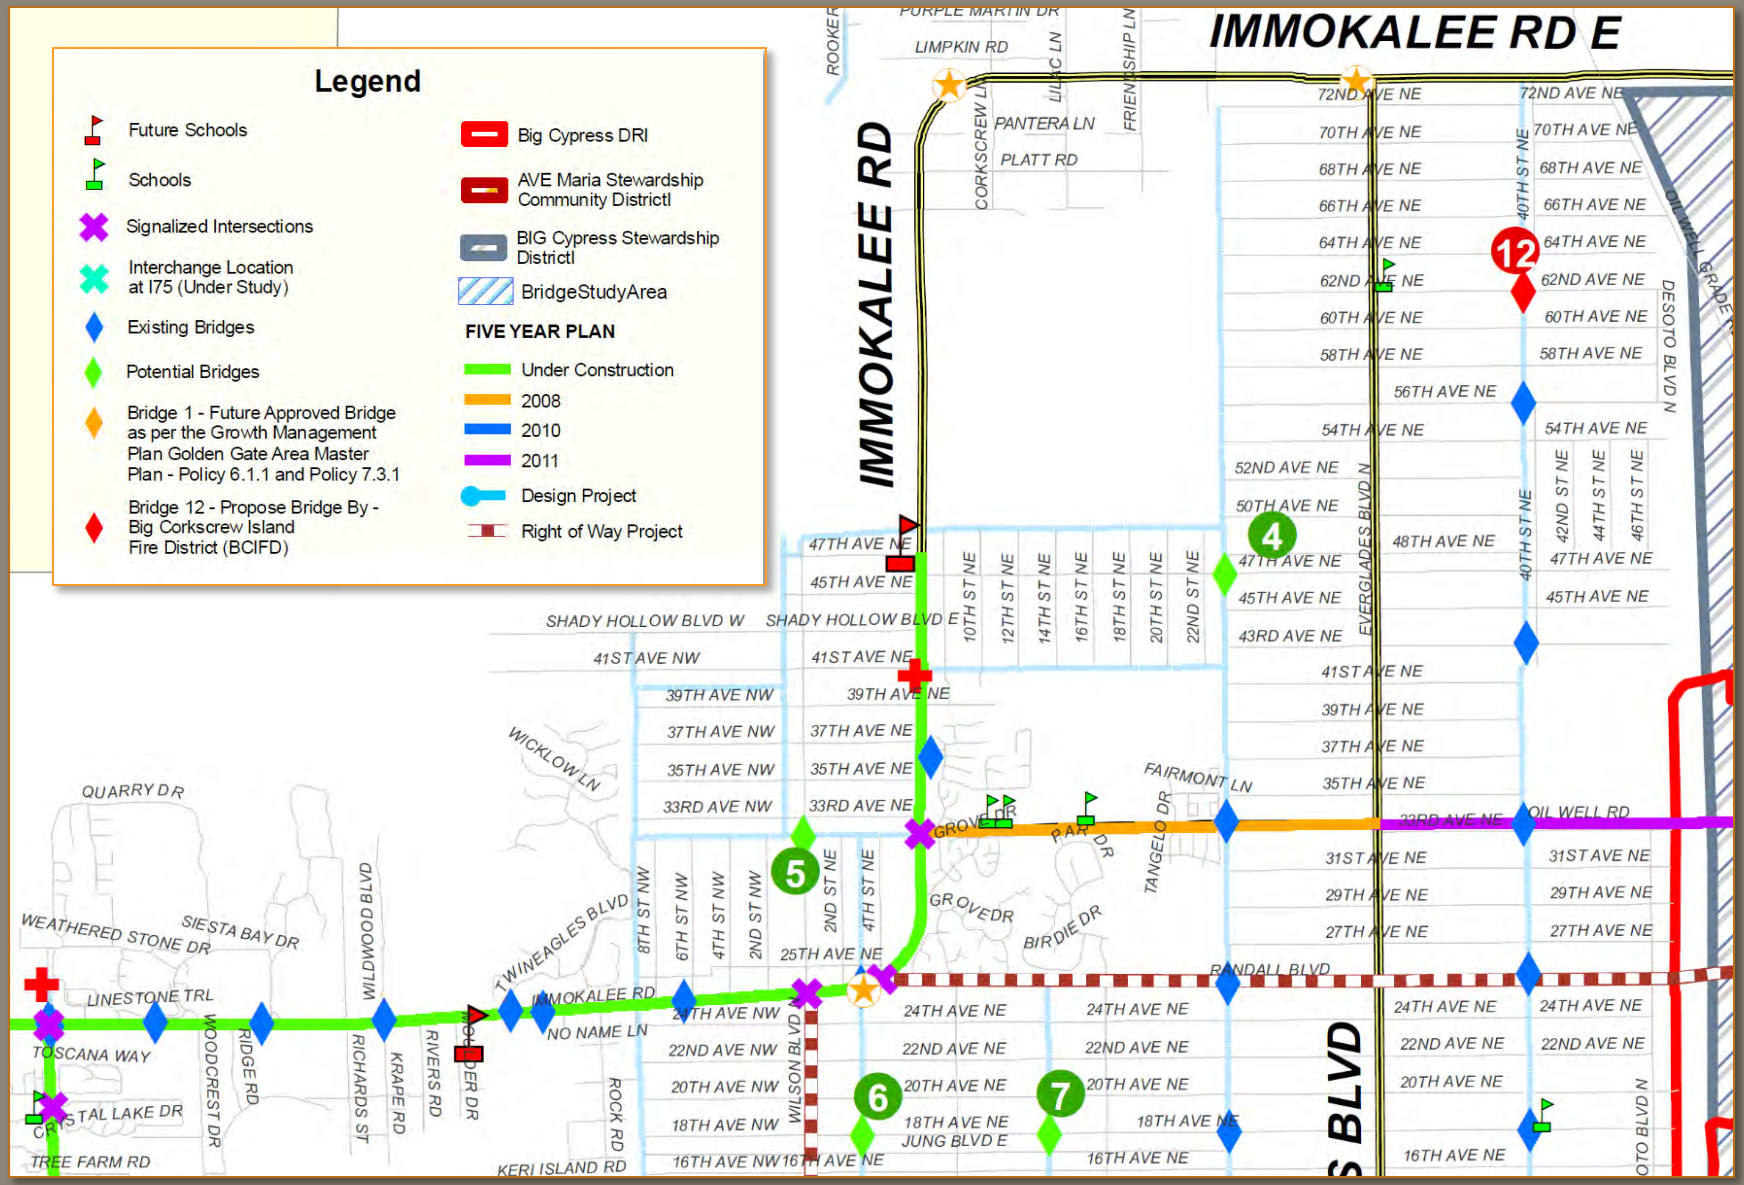
Stantec

2 History & Background



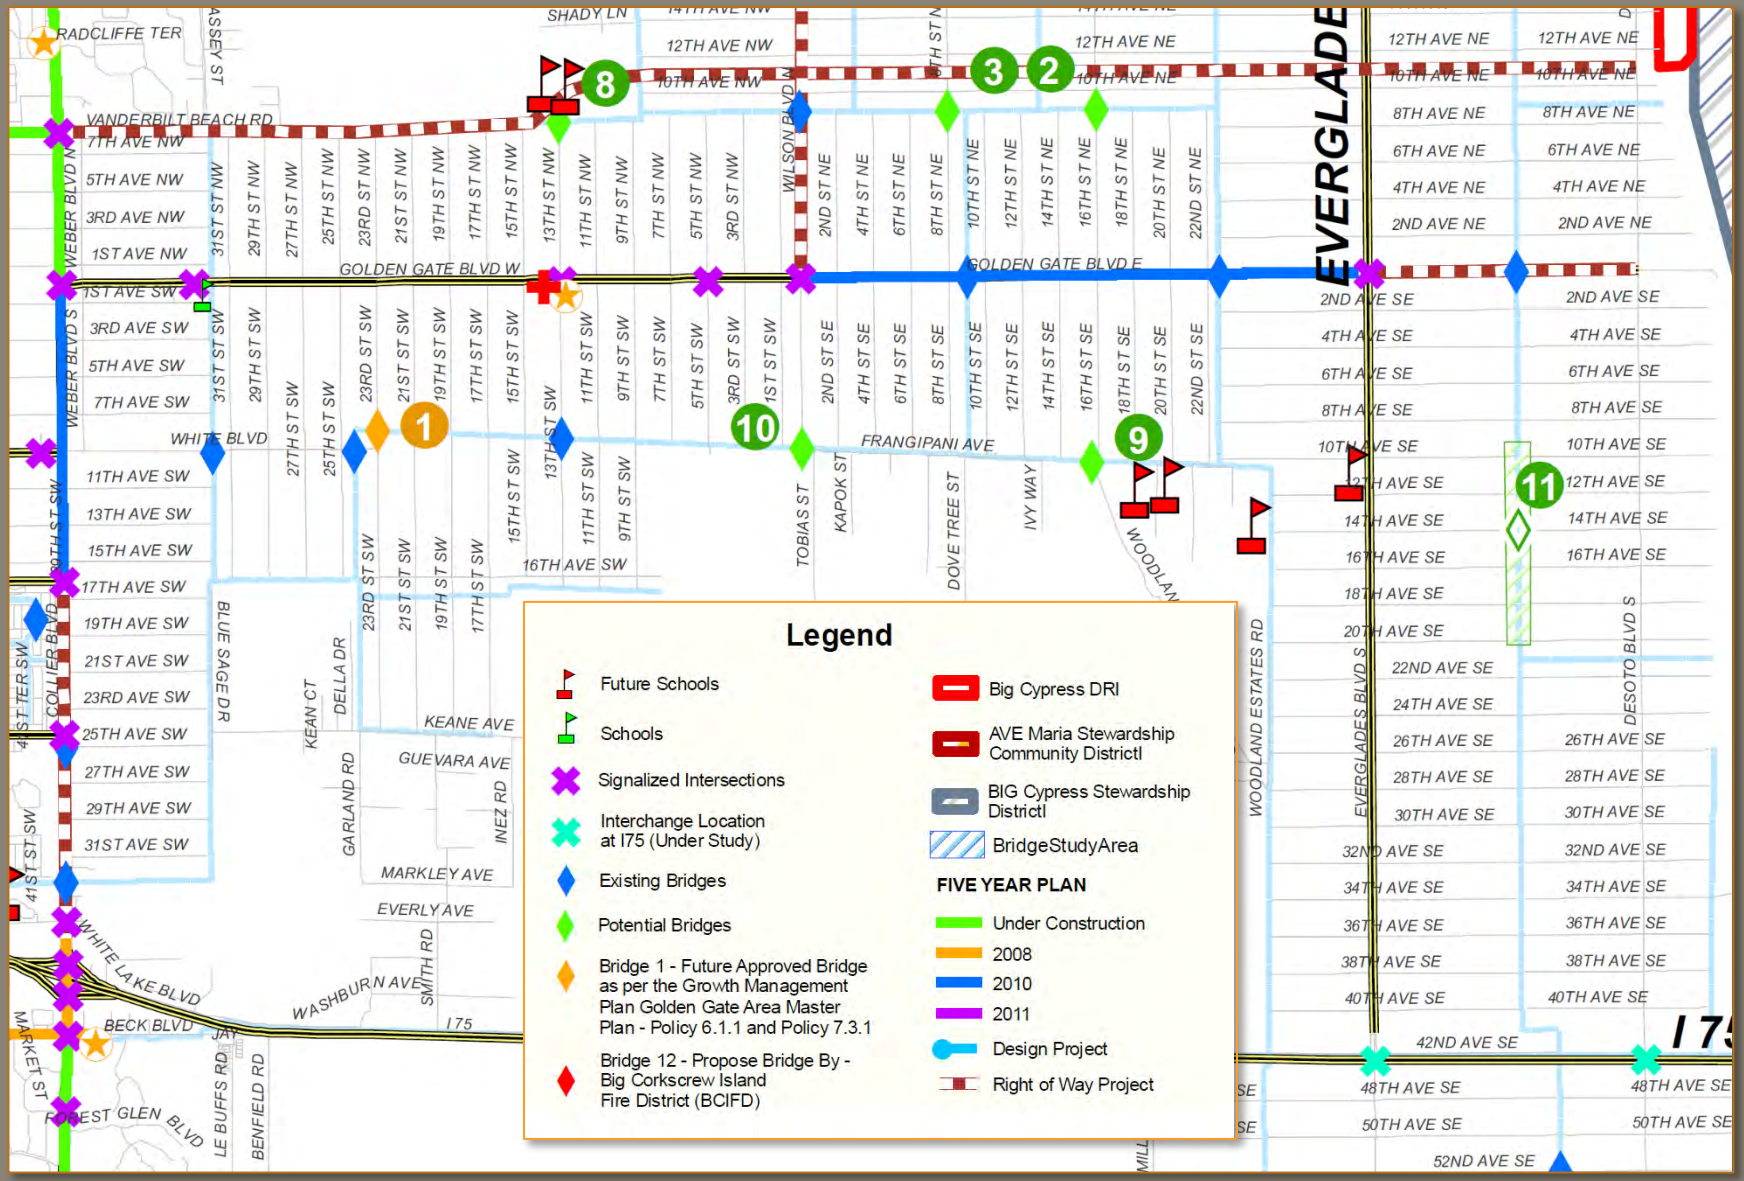
Map of 12 bridges from the 2008 Bridge Study

Stantec



Map of Bridges in the north portion of the Study Area

Stantec



Map of Bridges in the south portion of the Study Area

Stantec

2 History & Background

2018 - Collier County voters approved a 1-cent infrastructure surtax that included funding specifically earmarked to construct the bridges within the next 7 years.

We would like to know if you are aware of the Surtax.

Stantec

2 History & Background

2019 - Collier County completed construction of Bridge #3 on 8th St. NE with funding from the FDOT.

2019 - Collier County programmed construction of Bridge #2 on 16th St. NE in the 5-Year Work Program with funds from the infrastructure surtax proceeds.

Stantec

2 History & Background

The remaining 10 bridges are the subject of this 2020 Reevaluation Study.

Bridge#	Bridge Locations
1	23rd St. SW (south of Golden Gate Blvd.)
4	47th Ave. NE (between Immokalee Rd. & Everglades Blvd.)
5	Wilson Blvd. N (south of 33rd Ave. NE)
6	18th Ave. NE (between Wilson Ave. & 8th St. NE)
7	18th Ave. NE (between 8th St. NE & 16th St. NE)
8	North End of 13th St. NW (north of Golden Gate Blvd.)
9	16th St. SE (south of Golden Gate Blvd.)
10	Wilson Blvd. S (south of Golden Gate Blvd.)
11	10th Ave. SE (between Everglades Blvd. & Desoto Blvd.)
12	62nd Ave. NE (between Everglades Blvd. and 40th St. NE)

Stantec

3 Purpose of the Study

The purpose of this 2020 Reevaluation Study is to reconfirm the validity of the remaining 10 recommended bridge locations before moving the bridge projects into production (design, permitting & construction).

Stantec

3 Purpose of the Study

This 2020 Reevaluation Study focused on the same important criteria considered in the original 2008 Study.

3 Purpose of the Study

The 2008 Study Criteria Included:

- Improved connectivity to collectors and arterials (route choice)
- Reduced trip length for personal travel
- Improved evacuation routes
- Reduced response times for first responders
- Improved access to schools, libraries, and parks

Stantec

3 Purpose of the Study

The Transportation Planning Team interviewed the same agency stakeholders from the 2008 Study:

- Collier County Sheriff's Office (CCSO)
- Emergency Services Division (EMS)
- North Collier Fire Control & Rescue District
- Greater Naples Fire & Rescue District
- Collier County Public School District

Stantec

3 Purpose of the Study

All the agencies interviewed reconfirmed the importance of the bridge locations that were recommended in the original 2008 Study.

Stantec

3 Purpose of the Study

The Transportation Planning Team also recognized that over time, the ownership of some of the properties along the dead-end roads leading to the new bridges would likely have changed since the 2008 Study's public engagement effort.

Stantec

3 Purpose of the Study

A notice of this meeting was mailed to property owners along the affected roadways, supplemented by door-to-door visits.

We would like to know how you heard about this meeting.

Stantec

3 Purpose of the Study

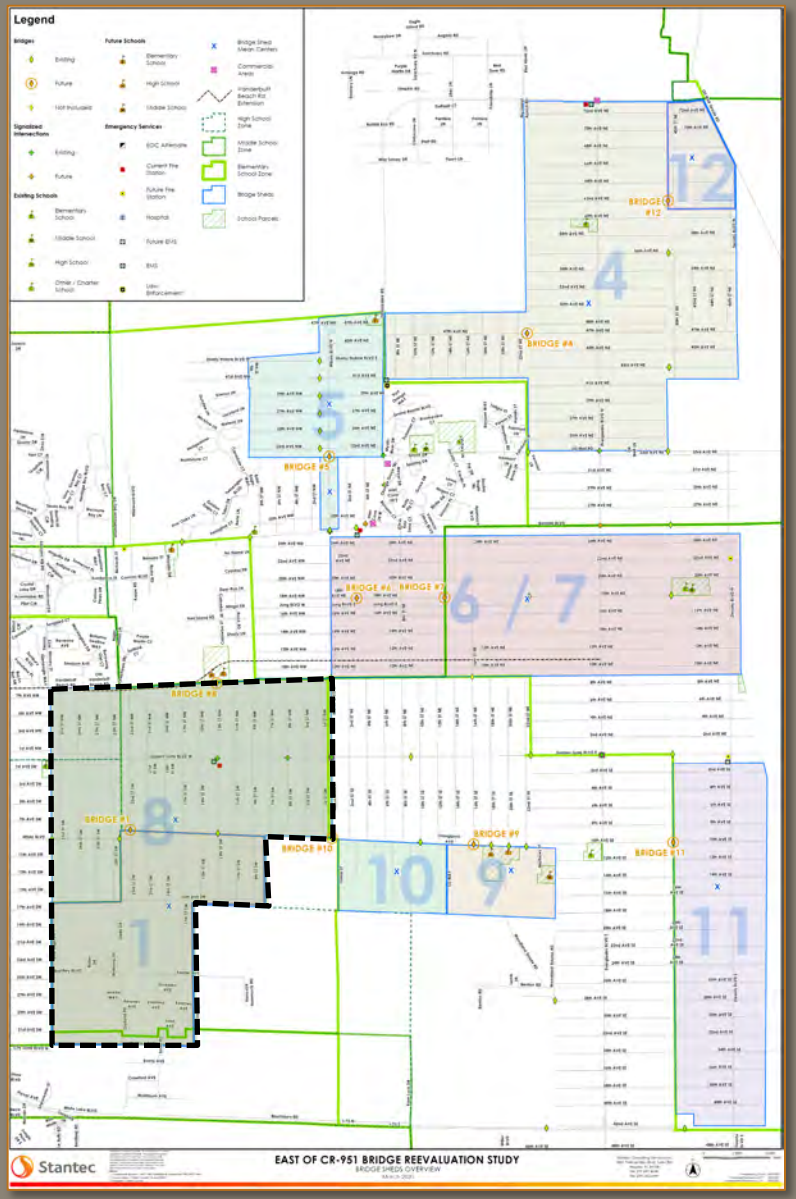
This neighborhood presentation is intended to provide the affected landowners with:

- The history & background of the bridges
- The Reevaluation Study findings
- The latest information about the bridge projects
- An opportunity to ask questions and provide comments

Stantec

4 Study Process

The study process established nine “Bridge-Sheds” with boundaries that recognized those parcels likely to benefit from a new bridge.



Stantec

4 Study Process

Analysts conducted a Geographic Information System (GIS) analysis of each Bridge-Shed to:

- Quantify the number of affected parcels, and
- Measure the benefits derived from a new bridge

Stantec

4 Study Process

The GIS analysis quantified the number of existing homes (2019) and the total number of parcels (Build-Out) in each Bridge-Shed.

Stantec

4 Study Process

Within each Bridge-Shed, the GIS analysis established and measured representative travel routes for different trip purposes (e.g., route to reach an arterial roadway), with and without a new bridge.

Stantec

4 Study Process

For each trip purpose, the GIS analysis quantified the number of homes in 2019 and at Build-Out in each Bridge-Shed that would benefit from the reduced trip length because of the new bridge.

Stantec

4 Study Process

The Residential Trip Purposes examined included:

- Travel to reach the arterial network
- Travel to school(s)
- Travel to commercial/retail
- Travel to parks

Stantec

4 Study Process

The Agency Trip Purposes examined included:

- Fire Department Response
- Sheriff's Office (CCSO) Response
- Emergency Medical Service Response
- Access to Future Schools

Stantec

4 Study Process

The study also included a supplemental Fire District analysis to determine if any parcels currently not within the Insurance Services Office (ISO) 5-mile drive distance from a fire station (Public Protection Classification Score of 3), would be included if a new bridge was constructed.

Stantec

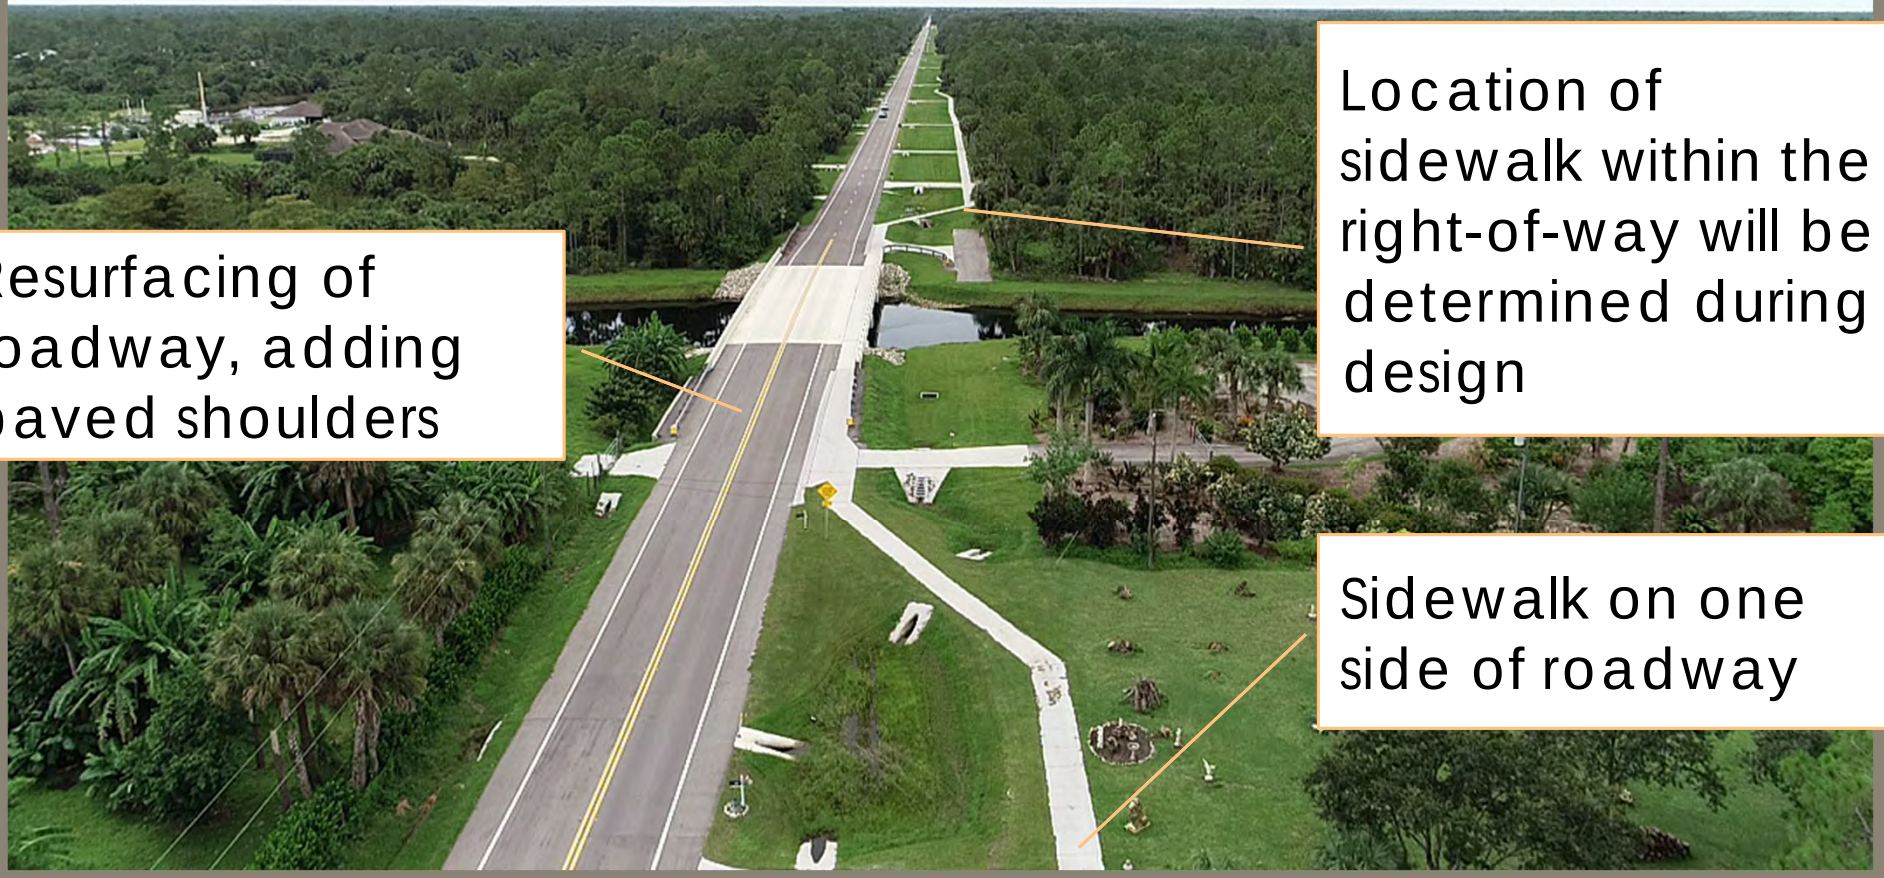
5 Bridge Project Prototype

As mentioned previously, Bridge #3 on 8th St. NE was recently constructed and will serve as the prototypical bridge project for the remaining 10 bridges.

Stantec

5 Bridge Project Prototype

The new bridge on 8th St. NW is seen as the prototypical bridge project to be constructed at the remaining 10 locations



Resurfacing of roadway, adding paved shoulders

Location of sidewalk within the right-of-way will be determined during design

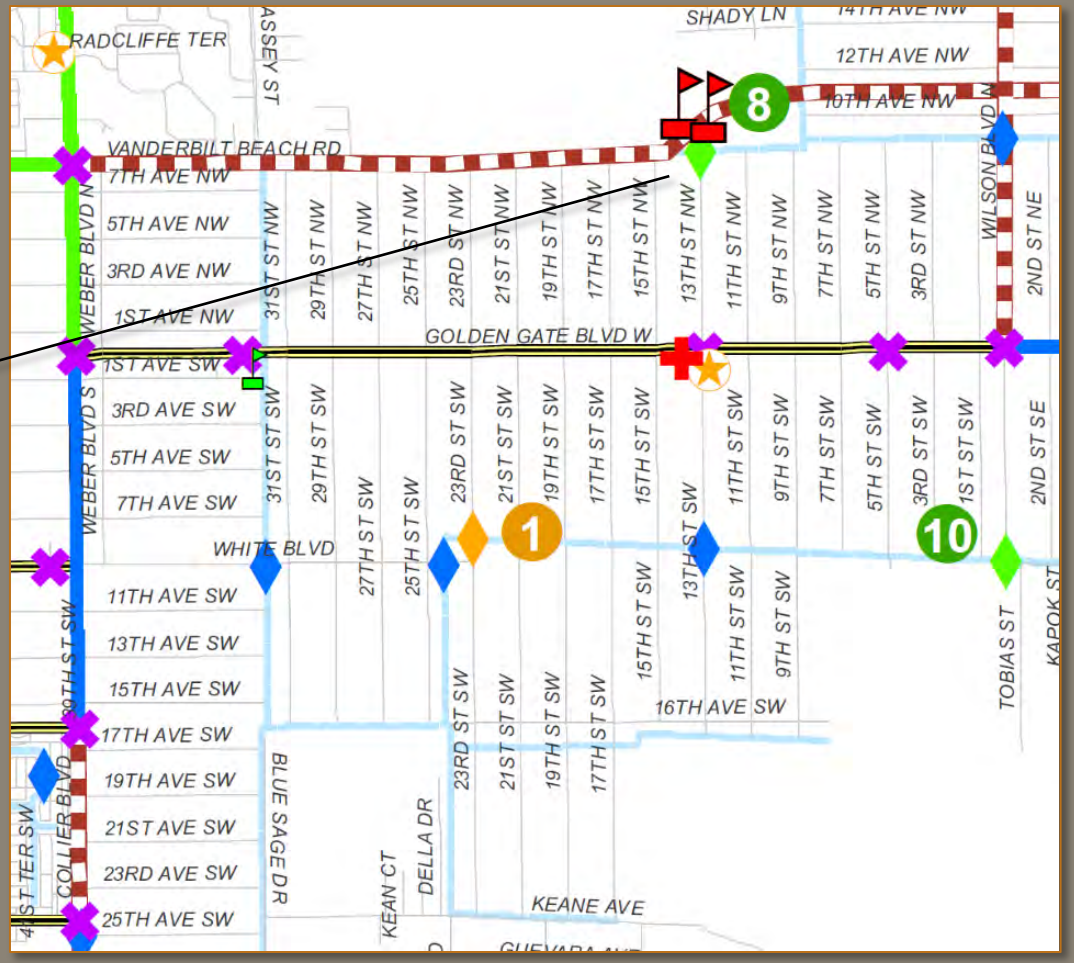
Sidewalk on one side of roadway

Stantec

5 Analysis of Bridge #8

13rd St. NW North of Golden Gate Blvd.

Bridge #8 is located on 13th St. NW, north of Golden Gate Blvd.



Stantec

5 Analysis of Bridge #8

13rd St. NW North of Golden Gate Blvd.

Location of Bridge #8

Stantec

5 Analysis of Bridge #8

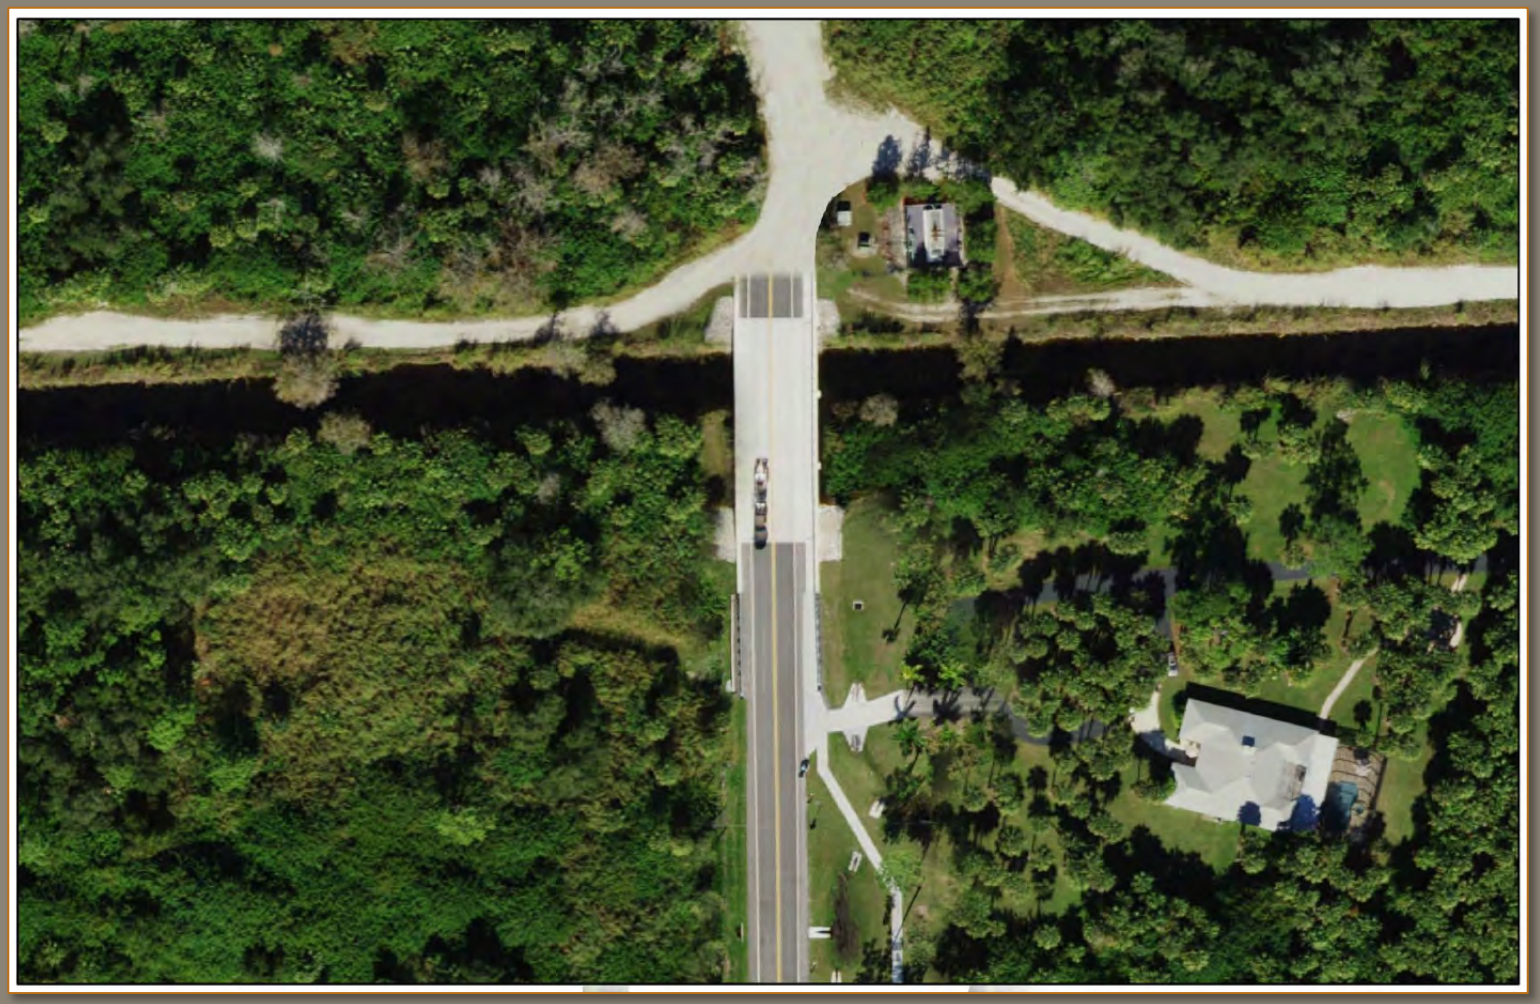
13rd St. NW North of Golden Gate Blvd.

Location of Bridge #8: Existing Condition

Stantec

5 Analysis of Bridge #8

13rd St. NW North of Golden Gate Blvd.



Location of Bridge #8: Proposed Condition

Stantec

5 Analysis of Bridge #8

13rd St. NW North of Golden Gate Blvd.

The Bridge #8 Project Includes the Following Improvements:

- Resurfacing 13th St. NW from Golden Gate Blvd. to the Bridge (+/- 1.08 miles)
- Adding bike lanes from Golden Gate Blvd. to the Bridge
- Adding a Sidewalk along both sides of roadway from Golden Gate Blvd. to the Bridge

Stantec

5 Analysis of Bridge #8

13rd St. NW North of Golden Gate Blvd.

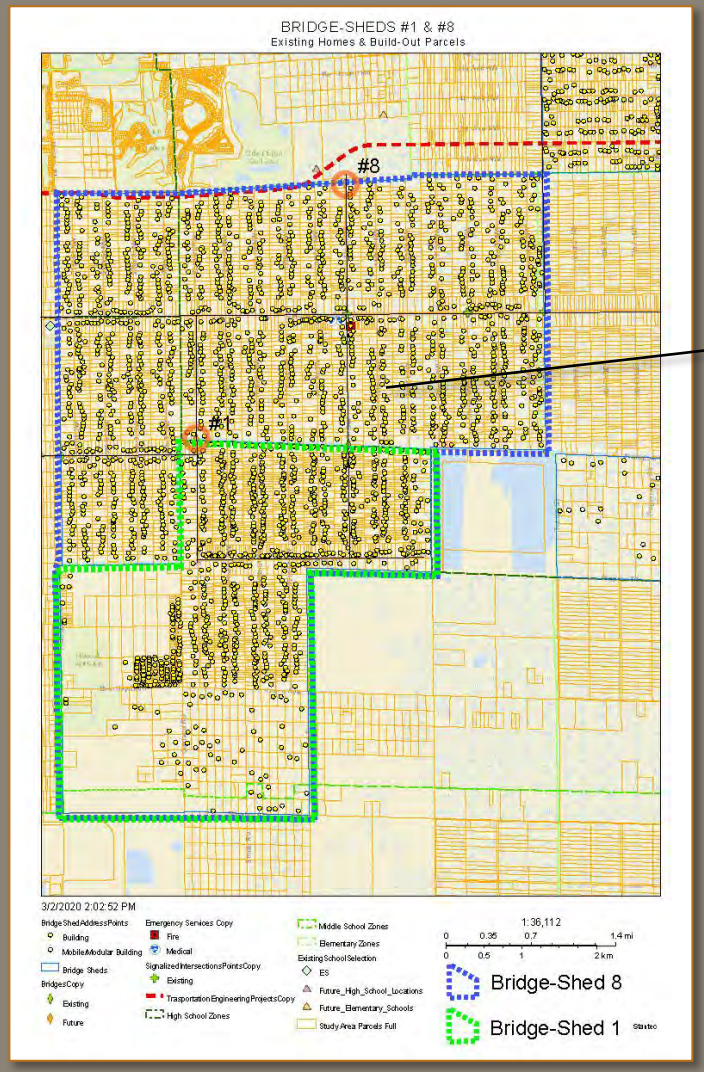
Design Considerations Include:

- Evaluating the need for intersection improvements (e.g., turn lanes, etc.) at the intersection of Golden Gate Blvd. and 13th St. NW

Stantec

5 Analysis of Bridge #8

13rd St. NW North of Golden Gate Blvd.



The number of existing homes and the total number of parcels that would benefit from a new bridge were quantified.

Stantec

5 Analysis of Bridge #8

23rd St. SW, North of White Blvd.

Importance of study criteria

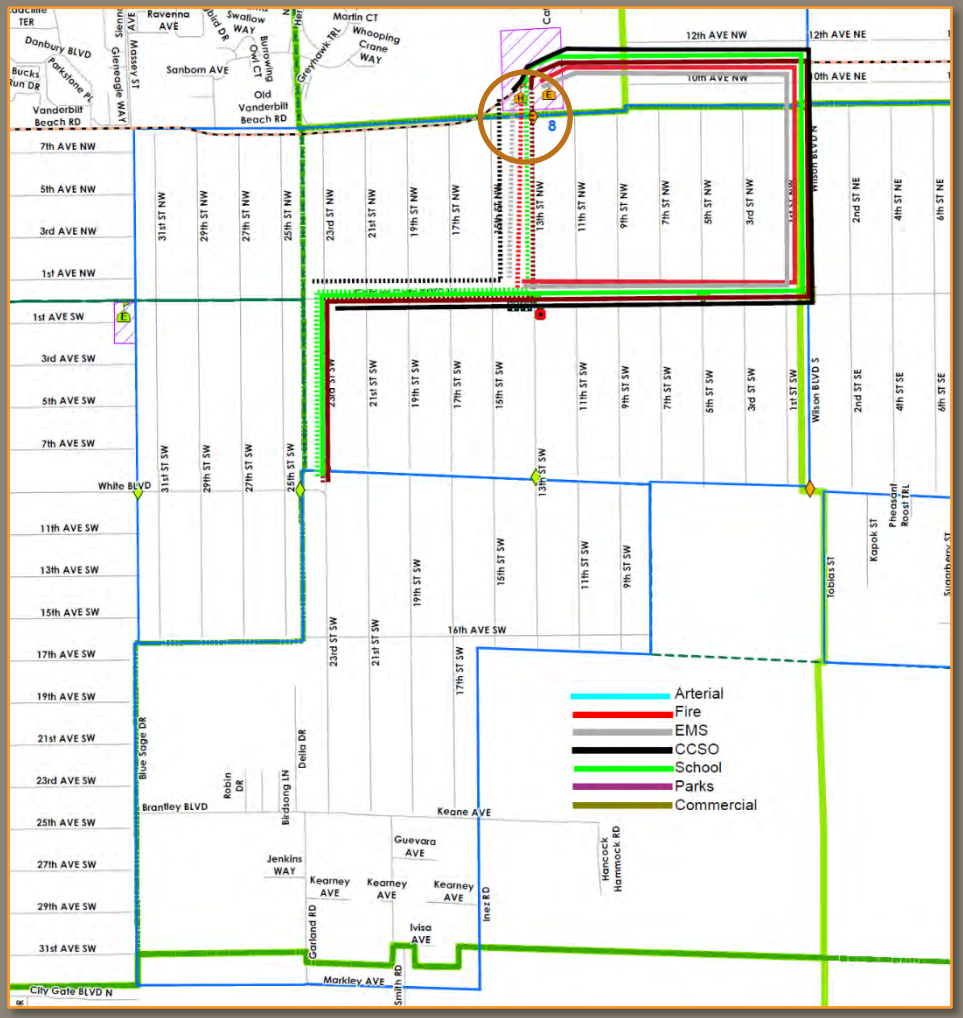
- Improved connectivity to collectors and arterials (route choice)
- Reduced trip length for personal travel
- Improved evacuation routes (route choice)
- Reduced response times for first responders
- Improved access to schools, libraries, and parks

We would like to know which of the criteria are important to you.

Stantec

5 Analysis of Bridge #8

13rd St. NW North of Golden Gate Blvd.



Dwelling units (DUs) within each bridge-shed that would benefit from a new bridge were identified and trip lengths for those applicable purposes were measured with and without the bridge.

Solid lines illustrate the existing routes, and dashed lines illustrate the "with a new bridge" trip routes.

Analysis of Bridge #8: Trip Length With & Without Bridge

Stantec

5 Analysis of Bridge #8

13rd St. NW North of Golden Gate Blvd.

The trip length and housing unit data was put into a worksheet to quantify the benefits realized with a new bridge.

2019													NOTES
		DUs	Distance (miles) W/O Bridge	Distance (miles) W/ Bridge	Distance (miles) Saved per Trip	Trips per Day	VMT[1] Saved per day	Gallons Saved per day @ 30 mpg	Gallons Saved per Home per Day	Days per Year	Gallons Saved per Home per Year	VMT[1] Saved per Home per day

5 Analysis of Bridge #8

13rd St. NW North of Golden Gate Blvd.

Potential Benefits Include:

- Increase in route choice options for public agencies, and 2,827 current residences (3,509 at buildout)
- Shorter trip lengths to parks & schools for some residents
- Shorter trip lengths for some CCSO responses

Stantec

5 Analysis of Bridge #8

13rd St. NW North of Golden Gate Blvd.

Potential Benefits Include:

- Reduction in travel distance to parks for 2,827 homes (3,509 at build-out)
- Reduction in travel distance to school for 273 homes (339 at build-out)

Stantec

5 Analysis of Bridge #8

13rd St. NW North of Golden Gate Blvd.

Potential Benefits Include:

- School & Park could benefit from up to a 59% decrease in response time (up to 7.1 minutes) for CCSO vehicles.
- School & Park could benefit from up to a 75% decrease in response time (up to 7.1 minutes) for EMS and Fire vehicles.
    - No additional homes meet ISO 3 Rating

Stantec

6 Next Steps

- ✓ Public Outreach to Other Affected Neighborhoods
- ✓ Presentation to the BCC tentatively for December 8, 2020
- ✓ Programming & Production to Complete the Bridges by 2027

Stantec
