

### Watershed Model Activity

#### Watershed Model Tentative Agenda

- 10-minute intro
- 15-minute interactive PowerPoint
- 20-minute watershed model activity

#### Items to consider

- Scheduling
  - We work with one classroom (up to 25 students) at a time for 45 mins
  - I have an example schedule that can be modified based on your related arts and lunch
  - We can typically do up to 5 classes in one day, any more will require a second day
- The room
  - We need a room with a sink and preferably an area with no carpet
  - We need to be in the same room all day, students will come to us
  - This can be a teacher's room, pod between classes, science lab, or unused room but please ensure that we can have it all day!
- The students
  - Students do not need anything for this activity, just themselves 😊
