Inquiries concerning changes to the Board's Agenda should be made to the County Manager's Office at 252-8383.

EXECUTIVE SUMMARY

Recommendation to approve the Immokalee Road Corridor Congestion Study from Livingston Road to Logan Boulevard and authorize the County Manager or designee to pursue the recommended improvements. (Lorraine Lantz, Principal Planner; Capital Project Planning)

OBJECTIVE: To obtain approval of the Immokalee Road Corridor Congestion Study (Study) which evaluated the potential roadway improvements in the study area and recommended pursuing conventional and innovative intersection improvements, corridor improvements, and roadway network improvements throughout the corridor.

CONSIDERATIONS: In 2020, Collier County initiated the Immokalee Road Corridor Congestion Study (Study) which analyzed intersections along Immokalee Road from Livingston Road to Logan Boulevard. The County undertook this study in response to increased congestion with segments operating at or above capacity and to address the continued growth expected along the corridor.

The study evaluated both conventional (adding or extending travel lanes) and innovate solutions (non-conventional methods) along the corridor including the I-75 interchange and seven (7) intersections. The analysis followed Florida Department of Transportation's (FDOT) established methodology utilizing the Intersection Control Evaluation (ICE) process to evaluate and rank each intersection control alternative. Public safety, crash history, and design constraints were used to analyze the ICE-recommended alternative and develop the recommendations.

The resulting recommendations include interim treatments and traditional solutions including optimizing signal timing, restriping, and shoulder repurposing, three (3) innovative intersection solutions and several network roadway improvements such as utilizing an adaptive traffic signal control system along the corridor, conducting several network connectivity studies, and creating interconnections and access improvements where possible. A summary table of the study recommendations and planning estimate costs by intersection or segment is attached.

Both the Diverging Diamond Interchange at I-75 and the Livingston Road Overpass projects are fully funded through the Construction phase in the Collier Metropolitan Planning Organization (MPO) 2045 Long Range Transportation Plan (LRTP) Cost Feasible Plan between FY2026-2030. The Advanced Construction of the proposed study recommendations are currently in the County's 5-Year Work Program FY2021-2025.

FISCAL IMPACT: The current 5-Year Work Program includes funding, in the amount of \$1 Million, for proposed study recommendations. The preliminary planning level estimated costs of all recommendations in the study total \$82.3 Million. The County's 5-Year Work Program and Capital Improvement Plan (CIP) will be updated or amended, as necessary, to include the appropriate future phases or projects. The Board will have the opportunity to approve the funding allocations through the annual budget process and the adoption of the annual CIP. Approval of this item does not result in an additional fiscal impact of future phases of the project.

GROWTH MANAGEMENT IMPACT: The project is consistent with the Growth

Management Plan and the MPO's Long Range Transportation Plan.

LEGAL CONSIDERATIONS: This item has been reviewed by the County Attorney, raises no legal issues at this time and requires majority vote for Board acceptance of the report. -JAK

RECOMMENDATION: That the Board of County Commissioners accept the Immokalee Road Corridor Congestion Study from Livingston Road to Logan Boulevard and direct the County Manager or designee to:

1. Pursue an overpass at Immokalee Road and Livingston Road;
2. Pursue a Diverging Diamond Interchange (DDI) at the Immokalee Road/I-75 Interchange with coordination with FDOT;
3. Pursue a Partial Displaced Left Turn (PDLT) also known as a Continuous Flow Intersection (CFI) at Immokalee Road and Logan Boulevard;
4. Pursue other recommended activities necessary to manage congestion and improve the operational efficiency, safety and functionality of this corridor and the transportation network in the county;
5. Continue with public engagement with impacted stakeholders through the design and construction process;
6. Direct staff to implement adaptive traffic signal control and develop a phasing plan for the addition of combined through/right turn lanes, and incorporate into the upcoming capital improvement element.

Summary Table of Immokalee Road Corridor Congestion Study Recommendations

Intersection or Segment	Recommendation		Estimate Constructi Costs
	By 2025	By 2040	
Segment			
Livingston Road to Logan Boulevard	Restripe/modify the Immokalee Road westbound right-turn lane and shoulder area to a combination through/right-turn lane from west of Logan Boulevard to east of Livingston Road. <i>Note: Includes miscellaneous intersection improvements.</i>		\$10,000,00
Intersection			
Livingston Road	Construct a grade-separated overpass with Livingston Road over Immokalee Road. Only if overpass construction is postponed, include Livingston northbound and southbound free-flow right-turn lanes (with yield). Construct Livingston Road northbound and southbound triple left-turn lanes onto Immokalee Road.	A four-lane, grade-separated overpass will be constructed with Livingston Road over Immokalee Road. Construct triple left-turn lanes for southbound on Livingston Road. Provide channelized right-turn lanes for northbound and southbound on Livingston Road. Evaluate the addition of a dual northbound right and an at-grade southbound through lane during design.	\$38,000,00
Strand Boulevard/Juliet Boulevard	Conventional improvements: Add southbound left and dedicated right-turn lane. Increase storage lane lengths for the eastbound left-turn lanes on Immokalee Road and the northbound left turn lane on Juliet Boulevard.	Conventional improvements: Increase storage lane length for westbound left-turn lanes on Immokalee Road. Note: Must be constructed with I-75.	\$1,500,00
I-75 Interchange	Interim may include: Restripe northbound and southbound off-ramp(s) right-turn lanes as a shared RT/LT lane. Add second westbound on-ramp right-turn to I-75 northbound with ramp signal. Extend length of I-75 northbound with ramp signal. Extend length of I-75 northbound and southbound off ramps.	Construct DDI. Coordinate with FDOT. Timing (BD) depends on FDOT's I-75 Southwest Connect I-75 South Corridor Study.	\$9,000,00
Northbrook Drive/Tarpon Bay Boulevard	Conventional Improvements: Add southbound left-turn, right turn, and through lanes. Increase storage lane lengths for the westbound left-turn lane on Immokalee Road.	Conventional Improvements: Add a northbound left-turn lane, converting the existing northbound shared through/left lane into through only. Add an eastbound left-turn lane on Immokalee Road and extend the storage lang lengths. Note: must be constructed with the I-75 DDI improvements.	\$6,000,00
Oakes Boulevard	Extend the eastbound right-turn lane storage by 50 feet in conjunction with the extension of the westbound right-turn lanes onto Tarpon Bay Boulevard.		Included w Northbroc Drive Improve
Valewood Drive	N/A	Conventional improvements: Add a dedicated southbound right-turn lane. Restripe the through/left-turn lane as a through/right-turn lane.	\$300,000
Executive Drive	N/A	N/A	N/A
Logan Boulevard	Optimize signal timing after the Logan Boulevard Turn Lane improvement project.	Construct a PDLT (E-W). Note: Partial displaced lefts impact Logan Landings Plaza access on Immokalee Road and shall be further evaluated.	\$17,500,00
