

EXECUTIVE SUMMARY

Recommendation to authorize the expenditure of \$15,704.00 to Grippo Pavement Maintenance, Inc. under Contract No. 21-7837 for the purchase of aggregate stone to stabilize the County-owned barge loading site at the Jolley Bridge and make a finding that this expenditure promotes tourism. (Project No. 80407).

OBJECTIVE: To obtain material to provide a stable surface for Coastal Zone Management operations at the County-Owned barge loading site at SR 951 / Jolley Bridge – Collier County Parcel No. 01049600004.

CONSIDERATIONS: A 0.5 acre parcel of vacant land on S.R. 951 near the northeast end of the Jolley Bridge at Marco Island is a County owned property. This site is one of the only County owned deep-water access points and is critical for the operations of Coastal Zone Management related to beach maintenance, pass and inlet maintenance, and channel maintenance. The site is typically used for on- and off-loading of heavy equipment and materials onto barges, staging dredging vessels and equipment, and docking other marine vessels used on beach and channel maintenance projects. For example, the site will be used for staging of equipment and materials when the County dredges Collier Creek, and for beach renourishment activities including staging of unsuitable shell material dredged from Caxambas Pass during future renourishments of South Marco Island Beach. The addition of #57 aggregate stone to this site is needed to stabilize and level the site for ongoing use.

FISCAL IMPACT: Funding is available in Fund 195 – Project No. 80407 “Jolly Bridge Parcel.”

GROWTH MANAGEMENT IMPACT: There is no Growth Management impact associated with this Executive Summary.

ADVISORY BOARD RECOMMENDATION: This item will be presented for recommendations to the CAC on Thursday, January 13, 2022 and the Tourist Development Council on Monday, January 24, 2021.

LEGAL CONSIDERATIONS: This item is approved as to form and legality and requires majority vote for approval. – CMG
